

The Win Without Pitching Manifesto

A short, sharp guide to tackling life's biggest challenges: understanding ourselves and making the right choices. Every day offers moments of decision, from what to eat for lunch to how to settle a dispute with a colleague. Still larger questions loom: How can I motivate my team? How can I work more efficiently? What is the long tail anyway? Whether you're a newly minted MBA, a chronic second-guesser, or just someone eager for a new vantage point, The Decision Book presents fifty models for better structuring, and subsequently understanding, life's steady challenges. Interactive and thought-provoking, this illustrated workbook offers succinct summaries of popular strategies, including the Rubber Band Model for dilemmas with many directions, the Personal Performance Model to test whether to change jobs, and the Black Swan Model to illustrate why experience doesn't guarantee wisdom. Packed with familiar tools like the Pareto Principle, the Prisoner's Dilemma, and an unusual exercise inspired by Warren Buffet, The Decision Book is the ideal reference for flexible thinkers.

Does the character of our leaders matter? You may think this question was answered long ago. Countless business authors and analysts have assured us that great leadership demands great character. Time and again, we've seen that truth play out, as once-thriving organizations falter and fail under the guidance of leaders behaving badly. Why, then, do so many executives remain skeptical about the true value of leadership character? A winning strategy and a sound business model are what really matter, they argue; character is just the icing on the cake. What's been missing from this debate is hard evidence: data that shows not only that leadership character matters for organizational success, but how it matters; and concrete evidence that it leads to better business results. Now, in this groundbreaking book, respected leadership researcher, adviser, and author Fred Kiel offers that evidence—solid data that demonstrates the connection between character, leadership excellence, and organizational results. After seven years of rigorous research based on a landmark study of more than 100 CEOs and over 8,000 of their employees' observations, Kiel's findings show that leaders of strong character achieved up to five times the ROA for their organizations as did leaders of weak character. Return on Character goes on to reveal:

- How leadership character is formed, how it creates value, and how that value spreads throughout the organization
- How low-character leaders undermine the success of even the best business plans
- How leaders at any level can develop the habits of strong character and "unlearn" the habits of poor character

The book also provides a character-building methodology—step-by-step advice and techniques for assessing your own character habits and improving your performance and that of your organization. Return on Character provides the blueprint for building your own leadership character and creating a character-driven organization that achieves superior business results.

This book by A. Ralph Epperson purports to uncover hidden and sinister meanings behind all the symbols found on the Great Seal of the United States, committing America to "A Secret Destiny."

THE BRAND GAP is the first book to present a unified theory of brand-building. In an entertaining two-hour read you'll learn:

- the new definition of brand
- the five essential disciplines of brand-building
- how branding is changing the dynamics of competition
- the three most powerful questions to ask about any brand
- why collaboration is the key to brand-building
- how design determines a customer's experience
- how to test brand concepts quickly and cheaply
- the importance of managing brands from the inside

IDEO founder and Stanford d.school creator David Kelley and his brother Tom Kelley, IDEO partner and the author of the bestselling *The Art of Innovation*, have written a powerful and compelling book on unleashing the creativity that lies within each and every one of us. Too often, companies and individuals assume that creativity and innovation are the domain of the "creative types." But two of the leading experts in innovation, design, and creativity on the planet show us that each and every one of us is creative. In an incredibly entertaining and inspiring narrative that draws on countless stories from their work at IDEO, the Stanford d.school, and with many of the world's top companies, David and Tom Kelley identify the principles and strategies that will allow us to tap into our creative potential in our work lives, and in our personal lives, and allow us to innovate in terms of how we approach and solve problems. It is a book that will help each of us be more productive and successful in our lives and in our careers.

"The Motivation Manifesto is a poetic and powerful call to reclaim our lives and find our own personal freedom. It's a triumphant work that transcends the title, lifting the reader from mere motivation into a soaringly purposeful and meaningful life. I love this book." —Paulo Coelho

The Motivation Manifesto is a pulsing, articulate, ferocious call to claim our personal power. World-renowned high performance trainer Brendon Burchard reveals that the main motive of humankind is the pursuit of greater Personal Freedom. We desire the grand liberties of choice—time freedom, emotional freedom, social freedom, financial freedom, spiritual freedom. Only two enemies stand in our way: an external enemy, defined as the social oppression of who we are by the mediocre masses, and an internal enemy, a sort of self-oppression caused by our own doubt and fear. The march to Personal Freedom, Burchard argues, can be won only by declaring our intent and independence, stepping into our personal power, and battling through self-doubt and the distractions of the day until full victory is won. Recalling the revolutionist voices of the past that chose freedom over tyranny, Burchard—at times poetic yet always fierce—motivates us to free ourselves from fear and take back our lives once and for all.

Offers advice on real-world practices, professional do's and don'ts, and business rules for those in the graphic arts.

Are your sales results always awesome? Or do some months leave you wondering if you'll be able to pay your mortgage? One of the most difficult parts of being a professional salesperson is managing the emotional peaks and valleys that accompany the ups and downs of sales. But according to Weldon Long, there is no challenge you can't overcome, and he shows how salespeople can thrive in the face of adversity if they are just willing to create the right mindset and implement the right sales process--consistently. Unreliable performance and unpredictable results are likely, says Long, because you aren't doing the same thing consistently on every sales call. If sales activities are random, results will be random. And random sales activities will never accidentally start producing consistent sales results, just as consistent sales activities will never start producing random results. It just can't happen. Whether it's a bad economy, a cheap competitor, bad leads, or a personal challenge, Long provides step-by-step advice on how you can make committed, consistent activities part of your daily sales routine so you will consistently be rewarded with the sales you deserve. Weldon Long is a successful entrepreneur, sales expert, and author, who--in 2003--walked out of a homeless shelter where he was living and within sixty months, had grown a sales organization to over \$20 million in sales.

Justin Cohen's internationally acclaimed six-step formula is designed to do just that. Having taught and refined his 'Pitch To Win' programme for five years, and having helped win numerous multimillion-dollar deals in that time, Justin now shares his secrets for success in the Pitch To Win book. In it he reveals: The number one reason a winning pitch gets chosen over the competition. The mindset of people who win the most pitches. A step by step guide to creating and delivering a winning pitch script. How to reduce nervousness and develop 'big pitch temperament.' How to win without being "salesy." How to win with integrity, by living your purpose. In an age of me-too products and instant communications, keeping up with the competition is not a winning strategy. Today you have to out-position, outmanoeuvre, and out-design the competition. The new rule? When everybody zigs, zag. In the recent bestseller, *The Brand Gap* (AIGA/New Riders), Neumeier showed companies how to bridge the distance between business strategy and design. In his latest book *Zag*, he illustrates the first big step in building a high-performance brand-radical differentiation.

Despite critics' claims that technology has dealt a death-blow to the centuries old art form of book making, this volume proves that the bound

book is indeed alive and well. A comprehensive guide to printed volumes, featuring not only finished projects but also the techniques and materials of book making, as well as definitions of the terminology.

Best-selling brand expert Marty Neumeier shows you how to make the leap from a company-driven past to the consumer-driven future. You'll learn how to flip your brand from offering products to offering meaning, from value protection to value creation, from cost-based pricing to relationship pricing, from market segments to brand tribes, and from customer satisfaction to customer empowerment. In the 13 years since Neumeier wrote *The Brand Gap*, the influence of social media has proven his core theory: "A brand isn't what you say it is – it's what they say it is." People are no longer consumers or market segments or tiny blips in big data. They don't buy brands. They join brands. They want a vote in what gets produced and how it gets delivered. They're willing to roll up their sleeves and help out—not only by promoting the brand to their friends, but by contributing content, volunteering ideas, and even selling products or services. At the center of the book is the Brand Commitment Matrix, a simple tool for organizing the six primary components of a brand. Your brand community is your tribe. How will you lead it?

He is on a radical crusade to align the interests of service providers with those of their customers by having lawyers, accountants, and consultants charge based on the value they provide, rather than the effort it takes. *Implementing Value Pricing* is a manifesto that establishes a clear case for the revolution. It provides detailed guidance that includes not only strategies and tactics, but key predictive indicators for success. It is richly illustrated by the successes of firms that have embraced value-based pricing to make their services not only more cost-effective for their customers, but more profitable as well. The hallmark of a manifesto is an unyielding sense of purpose and a call to action. Let the revolution begin." —Robert G. Cross, Chairman and CEO, Revenue Analytics, Inc. Author, *Revenue Management: Hard-Core Tactics for Market Domination*

In his New York Times bestseller *Steal Like an Artist*, Austin Kleon showed readers how to unlock their creativity by “stealing” from the community of other movers and shakers. Now, in an even more forward-thinking and necessary book, he shows how to take that critical next step on a creative journey—getting known. *Show Your Work!* is about why generosity trumps genius. It's about getting findable, about using the network instead of wasting time “networking.” It's not self-promotion, it's self-discovery—let others into your process, then let them steal from you. Filled with illustrations, quotes, stories, and examples, *Show Your Work!* offers ten transformative rules for being open, generous, brave, productive. In chapters such as *You Don't Have to Be a Genius*; *Share Something Small Every Day*; and *Stick Around*, Kleon creates a user's manual for embracing the communal nature of creativity— what he calls the “ecology of talent.” From broader life lessons about work (you can't find your voice if you don't use it) to the etiquette of sharing—and the dangers of oversharing—to the practicalities of Internet life (build a good domain name; give credit when credit is due), it's an inspiring manifesto for succeeding as any kind of artist or entrepreneur in the digital age.

It's not the best companies that prevail in the marketplace, but rather the best brands. The goal of business strategy is not just to be better, but different. Learn how to build a differentiating value proposition by clearly and carefully defining your brand boundaries: *Calling, Competencies, Customers, and Culture*. *Positioning for Professionals* shows how a well-defined value proposition can help professional service firms create their own success instead of copying the success of others, including such concepts as: How and why professional service brands become homogenized Why standing for everything is the same as standing for nothing Why there's no such thing as full service Deep and narrow as a strategic imperative Why it's better to be a profit leader than a market leader Differentiation and price premiums How to map your brand on the matrix of relevance and differentiation How to define a value proposition that will make your firm intensely appealing to the customers who want you for what you do best Based on the proven premise that the most profitable business strategy is not to aim at the center of the market, but rather at the edges, *Positioning for Professionals* is written for leaders, managers, and other senior executives of service companies in with a particular emphasis on professional service firms.

The Levitan Pitch. Buy This Book. Win More Pitches. is the definitive how-to guide for every advertising, design, digital and PR agency that wants to increase its odds of winning new accounts. Based on 30 years of pitching for new accounts, I know that there is no such thing as a standard marketing services pitch scenario. Every client category, assignment, timetable, budget, search consultant, procurement system, and client personality is unique. However... While there is no standard pitch or agency, I know from experience that there are universal pitch

criteria that can be identified and addressed regardless of the type or size of client, specific marketing objectives, or agency. To that extent, The Levitan Pitch is designed to deliver one master benefit: You will win more new clients. In Chapter One of this book, I discuss the very high cost of failing to run well-crafted, efficient pitches. The costs of failure include poor agency staff morale, individual employee burnout, and the financial cost to an agency's bottom-line that comes from the cost of participating in four-month agency searches and funding an agency's annual business development plan. This chapter tells the story of Saatchi & Saatchi Advertising's "The Worst Advertising Pitch Ever." Chapter Two offers an escape hatch. You should not pitch every account that comes knocking. I give you a handy tool to gauge both the value of the prospective client and your agency's chances of winning. Chapter Three begins to help you position the pitch for success. We look at the essential facts of the pitch and dig into understanding the client's mindset by understanding the type of assignment, type of relationship they are looking for, and what type of agency will fulfill their needs. Chapter Four delivers the list of "The 12 Deadliest Presentation Mistakes." These are identified pitch killers that come from my personal experience and the experiences of agency CEO's, clients, and search consultants. The accompanying cartoons wouldn't be as funny if these mistakes were not being made over and over, even by the most sophisticated agencies. In Chapter Five I lay out thirty short but very sweet suggestions for how to build a brilliant presentation that I know will greatly increase your odds of winning. These ideas cover three core elements of a successful pitch: process management, content development, and how to deliver a standout presentation. Each rule is supported by a tip or insight that offers a fast way to achieve your objectives. Chapter Six is all about don't take my word for it. This chapter brings in valuable learning via fourteen interviews with a range of communications industry experts. It is informative and often mind-blowing to hear the pitch related experiences and advice of agency search consultants, compensation experts, an ex P&G procurement executive, a negotiation trainer, the 4A's, the Association of National Advertisers, a silicon valley presentation guru, a leading agency strategist, an ex-Nike and W+K executive on building chemistry, an IP lawyer on who actually owns your pitch ideas, the CEO of a London advertising agency, and the CEO of an independent agency network who has been on both sides of the table. Finally, I've included insights about all too common agency pitch mistakes from 16 of the world's leading search consultants. I hope that you will find the book informative, insightful, occasionally humorous, and most importantly, a good read that ultimately results in more wins for your company.

The world's economy has been transformed from a twentieth-century materials-based economy to the Age of the Knowledge-Based Economy - and the currency of this realm is ideas, imagination, creativity, and knowledge. According to The World Bank, 80% of the developed world's wealth now resides in human capital. Perhaps President Ronald Reagan said it best in his address to Moscow State University on May 31, 1988: "Like a chrysalis, we're emerging from the economy of the Industrial Revolution - an economy confined and limited by the Earth's physical resources - into, as one economist titled his book, "the economy in mind," in which there are no bounds on human imagination and the freedom to create is the most precious natural resource." Written by Ronald Baker and Ed Kless, hosts of *The Soul of Enterprise: Business in the Knowledge Economy*, the popular radio show on Voice America's Business Channel, *The Soul of Enterprise: Dialogues on Business in the Knowledge Economy* sounds the clarion call that organizations can no longer ignore this seismic shift that has occurred in the economy since 1959. *The Soul of Enterprise* introduces the three components of Intellectual Capital - human capital, social capital, and structural capital - and how to leverage them to create wealth in today's economy, by revealing: The physical fallacy - why wealth no longer consists of tangible things, but of ideas, imagination and knowledge from human minds The best learning tool ever invented: After Action Reviews Why Frederick Taylor and the Scientific Management movement was a fraud and the wrong focus for knowledge workers The fact that effectiveness always and everywhere trumps efficiency The First Law of Pricing: All value is subjective The Second Law of Pricing: All prices are contextual The Morality of Markets: Doing well and doing good Why your organization - and you - need to be driven by a higher purpose than profit *The Soul of Enterprise* will inspire and challenge readers to unlock the enormous financial and competitive power hidden in the intellectual capital of their organizations and knowledge workers."

—Reed Holden, founder, Holden Advisors Corp., www.holdenadvisors.com coauthor, *The Strategy and Tactics of Pricing: A Guide to Profitable Decision Making*, Third Edition "With *Pricing on Purpose*, Ron Baker had made an enormous contribution to the better understanding of pricing that will be accessible to anyone who wants to learn. People are intrigued by instances of what they see as idiosyncratic pricing. Sometimes it is idiosyncratic, but oft-times it is fiendishly clever and well researched. So is this book. There are examples that at first sight seem to have nothing to do with the subject at hand, but the learning points are all made and explained in any number of interesting and memorable ways. *Pricing on Purpose* is a welcome and valuable addition to the learning on pricing and I recommend it to professional pricers, marketers, and anyone interested in capturing the value their business creates." —Eric G. Mitchell, President, Professional Pricing Society, www.pricingsociety.com "Ron Baker is what I'd call a 'thought giant.' In his first two books he literally began a revolution in the accounting and legal professions. Thousands of professionals in public practice now lead far better, more rewarding lives thanks to him. Now he's broadened his impact in a huge way. Read this book, implement the ideas and you'll never look at your prices or your pricing policies in the same way again. You'll be richer in many ways because of it." —Paul Dunn, founder and CEO, ResultsNet Australia, coauthor, *The Firm of the Future: A Guide for Accountants, Lawyers, and Other Professional Services*, www.resultsnetaustralia.com "As a reader of hundreds of business books, I am thrilled when I come across one that has something new to say. *Pricing on Purpose* does just that. Instead of presenting a set of feel-good items to check off a list, Ron Baker encourages us 'to think with him, not like him.' He methodically builds his argument leading us through the labyrinth of pricing theory and encourages us to look at pricing as the strategic tool that it is rather than taking the lazy cost-based tactical approach of most businesses. To paraphrase Karl Marx in terms of Baker's book, 'Cost-based pricing is the opium of business.'" —Ed Kless, Director, Partner Development and Recruitment, Sage Software "Baker has done it again! Building on the core principles that he advanced in *Professional's Guide to Value Pricing* and *The Firm of the Future*, Ron Baker has again evolved thought leadership on the critical dynamics of value and pricing. Baker's latest work, *Pricing on Purpose: Creating and Capturing Value*, provides real-world examples and practical strategies that provide a framework for pricing optimization. His clarity of purpose and passionate call to action resonates in today's intellectual capital economy." —Thomas Finneran, Executive Vice President, American Association of Advertising Agencies "We love this book! With detailed research, thorough references, and recommendations for further reading, this could be considered a textbook. That it is so readable and engaging is a triumph. The chapter providing the epitaph for cost-plus pricing is worth many times the price of this book. 'Got price-sensitive customers? Wonder why? Read and stop weeping. Who's in charge of value in your company?' Baker asks. If you can't immediately answer, you'd better read this book. Bravo, Baker!" —Paul O'Byrne and Paul Kennedy, partners, O'Byrne and Kennedy LLP, Chartered Accountants, United Kingdom, www.obk.co.uk "Ron Baker is nothing short of brilliant, and his enthusiasm for pricing is contagious. *Pricing on Purpose* will add more value to your firm than anything else you could do. As usual in Ron's books, he presents cutting-edge ideas. There is no greater value to your company than to read *Pricing on Purpose* and implement its ideas." —Scott Abbott, entrepreneur, former regional business development, manager, BDO Dunwoody, LLP, Manitoba, Canada

The brilliant creator of NPR's Planet Money podcast and award-winning New Yorker staff writer explains our current economy: laying out its internal logic and revealing the transformative hope it offers for millions of people to thrive as they never have before. Contrary to what you may have heard, the middle class is not dying and robots are not stealing our jobs. In fact, writes Adam Davidson—one of our leading public voices on economic issues—the twenty-first-century economic paradigm offers new ways of making money, fresh paths toward professional fulfillment, and unprecedented opportunities for curious, ambitious individuals to combine the things they love with their careers. Drawing on the stories of average people doing exactly this—an accountant overturning his industry, a sweatshop owner's daughter fighting for better working conditions, an Amish craftsman meeting the technological needs of Amish farmers—as well as the latest academic research, Davidson shows us how the twentieth-century economy of scale has given way in this century to an economy of passion. He makes clear, too, that though the adjustment has brought measures of dislocation, confusion, and even panic, these are most often the result of a lack of understanding. *The Passion Economy* delineates the ground rules of the new economy, and armed with these, we begin to see how we can succeed

in it according to its own terms—intimacy, insight, attention, automation, and, of course, passion. An indispensable road map and a refreshingly optimistic take on our economic future.

We are now living in a world with over one hundred brands of bottled water. The United States alone is home to over 45,000 shopping malls. And there are more than 19 million customized beverage choices a barista can whip up at your local Starbucks. Whether it's good or bad, the real question is why we behave this way in the first place. Why do we telegraph our affiliations or our beliefs with symbols, signs, and codes? *Brand Thinking and Other Noble Pursuits* contains twenty interviews with the world's leading designers and thinkers in branding. The interviews contain spirited views on how and why humans have branded the world around us, and the ideas, inventions, and insight inherent in the search.

It gives examples of how others do it well, and the pitfalls to avoid. In addition, it discusses more general aspects which are linked to PR and BD, such as being a good employer, ethics for architects and the challenges when working abroad. Too often a design or architecture degree is seen as a means to an end (a job in an established practice). But imagine for one moment that there are no employers, no firms to send your resumé to, no interviews to be had—what would you do? How would you forge your own path after graduation? The current economic climate has seen many graduates chasing a finite number of positions. The most ingenious and driven designers have found weird and wonderful ways of making opportunities for themselves, often by applying their skills across the creative disciplines of art, design, architecture, and interiors. Knowing what you want from your design career and being able to adapt your strategy to suit is basic and vital—just like in the wild, designers need to evolve. The book celebrates the various strategies that students and graduates are taking to gain exposure, while also including interviews and inspirational advice from those who are now enjoying success as a result of their creative approach to employment.

The Win Without Pitching Manifesto Creative Strategy and the Business of Design Simon and Schuster

You don't need to be a genius, you just need to be yourself. That's the message from Austin Kleon, a young writer and artist who knows that creativity is everywhere, creativity is for everyone. A manifesto for the digital age, *Steal Like an Artist* is a guide whose positive message, graphic look and illustrations, exercises, and examples will put readers directly in touch with their artistic side. When Mr. Kleon was asked to address college students in upstate New York, he shaped his speech around the ten things he wished someone had told him when he was starting out. The talk went viral, and its author dug deeper into his own ideas to create *Steal Like an Artist*, the book. The result is inspiring, hip, original, practical, and entertaining. And filled with new truths about creativity: Nothing is original, so embrace influence, collect ideas, and remix and re-imagine to discover your own path. Follow your interests wherever they take you. Stay smart, stay out of debt, and risk being boring—the creative you will need to make room to be wild and daring in your imagination.
