What distinguishes history as a discipline from other fields of study? That's the animating question of Sarah Maza's *Thinking About History*, a general introduction to the field of history that revels in its eclecticism and highlights the inherent tensions and controversies that shape it. Designed for the classroom, *Thinking About History* is organized around big questions: Whose history do we write, and how does that affect what stories get told and how they are told? How did we come to view the nation as the inevitable context for history, and what happens when we move outside those boundaries? What is the relation among popular, academic, and public history, and how should we evaluate sources? What is the difference between description and interpretation, and how do we balance them? Maza provides choice examples in place of definitive answers, and the result is a book that will spark classroom discussion and offer students a view of history as a vibrant, ever-changing field of inquiry that is thoroughly relevant to our daily lives.

From Herodotus to H-Net: The Story of Historiography, Second Edition, offers a concise but comprehensive and up-to-date account of the many ways history has been studied and recounted, from the ancient world to the new universe of the Internet. Clearly written and organized, it shows how the same issues that historians debate today were already recognized in past centuries, and how the efforts of historians in the past remain relevant today. Balanced and fair-minded, the book covers the development of modern academic scholarship, but also helps students appreciate the contributions of popular historians and of the many forms of public history. Often drawing on what historians from Edward Gibbon to Natalie Zemon Davis have written about their own careers, *From Herodotus to H-Net, Second Edition*, brings the discipline of history alive for students and general readers.

This practical manual been written for the car-owner who is already a competent driver under normal road conditions but who would like to be a better-than-average driver, and especially for the man who wishes to try his hand at competition work—both racing and rallying. Paul Frère—Grand Prix driver and engineer, Le Mans winner and author—gives invaluable instruction based on his many years of experience on the racing circuits of Europe and America. He deals briefly with theoretical matters and then proceeds with his driving lessons: making the most of practice; learning a circuit; racing starts; cut-off and braking points; slides and drifts; taking advantage of road camber; passing and being passed; slipstreaming; driving under wet and icy conditions and racing at night. He also gives practical advice on race tactics, flag marshals, time keeping, pit signals, race wear, seat belts, the choice of gear ratios and tyres and the different problems posed by road and track racing. With the aid of 60 photographs and diagrams M. Frère explains the correct line to take on various types of corners and why, the effects of peculiarities of surface, and analyses the forces acting on a car in cornering. The book is “required reading” for every ambitious driver in Club and Formula Junior racing and

for Rallymen.

'Goold and Campbell, leading thinkers on corporate-level strategy, have turned their attention to corporate-level organization design. They bring a rigor to this topic that will help managers wrestling with multiple reporting dimensions, decentralization and cross-unit co-ordination.' Professor Gary Hamel, London Business School. Author of *Competing for the Future* and *Leading the Revolution*. 'Campbell and Goold are renowned for discovering entirely new and useful dimensions to seemingly familiar business issues. This book is another shining example. It allows executives to replace politics and personality as the rationales for an organizational design with clear, effective logic and experience.' Thomas H. Davenport, Director, Accenture Institute for Strategic Change. Author of *Process Innovation* and *Working Knowledge*. 'A "must read" for managers and consultants. Redesigning the organization is the most powerful and fastest means for aligning decisions and behavior with strategic objectives. Goold and Campbell provide the best and most comprehensive framework for developing and testing the validity of an organizational structure I have seen in recent years. Based on years of research and experience they offer clear principles and a process to guide managers in the many design decisions and trade-offs involved in developing a more effective organization.' Professor Michael Beer, Harvard Business School. Author of *The Critical Path to Corporate Renewal*. 'Books on organization design tend to fall into one of two categories: those that provide interesting concepts but not help on how to implement them and those that are full of check lists on implementation, based on sterile and over-simplified ideas. Michael Goold and Andrew Campbell have written perhaps the finest example of an exception I have ever seen - a very practical book, with detailed guidelines on implementation, yet based on a rich and sophisticated understanding of the real challenges of organization design. It will be of immense use to all careful readers.' Professor Sumantra Ghoshal, London Business School. Author of *The Individualized Corporation* and *Managing Across Borders*. 'As companies search for all sources of competitive advantage, many are discovering that the ability to organize and execute complex strategies is an important one. Campbell and Goold have again provided us with a good process through which leaders can give organizing its deserved focus.' Professor Jay Galbraith, author of *Designing the Global Corporation*. 'Campbell and Goold bring much needed clarity and precision to the language of organizational design and show how this can help managers avoid the misunderstandings and differing interpretations that frequently undermine new organization structures.' Paul Coombes, Director, Organization Practice Area, McKinsey & Company. 'Organization change is close to the top of many companies' agendas. Goold and Campbell's book equips you with ideas and frameworks to take on the journey. The real-world examples help make it both pragmatic and readable.' Steve Russell, Chief Executive, The Boots Company plc. 'An impressive work. The taxonomy of organizational units and organigram symbols will be especially useful to managers working on structures.' Philip Sadler, Patron, The Centre for Tomorrow's Company. Author of *The Seamless Organization*. 'Incredibly relevant in helping to pull together a complicated structure based around the dimensions of channels, products, customers and geography - immensely clear and valuable.' David Roberts, Chief Executive, Personal Financial Services, Barclays plc. 'A welcome breakthrough in designing more effective corporate organization structures. The nine design tests of Goold and

Campbell are a valuable addition to an otherwise sparse toolkit.' Jim Haymaker, Vice President, Strategy & Business Development, Cargill Inc. ...

In this third edition of *Globalization in World History*, Peter Stearns explores the roots of contemporary globalization, examining shifts in the global flow of people, goods, and ideas as early as 1000 CE. Exploring how four moments in history have accelerated the process of globalization, Stearns's narrative details how factors such as economics, migration, disease transmission, culture, the environment, and politics have influenced the nature of globalization as we understand it today. This revised edition includes: Updates to the whole study with appropriate recent references; New brief transition sections that focus attention on the Mongol period, debates over the role of the eighteenth century, and the partial retreat from globalization after World War I; A new final chapter that deals with the rise in attacks on globalization during the most recent decade, from populist objections to the implications of growing authoritarianism, raising the question of whether a new transition is taking shape around us today.

Through an interdisciplinary approach that links political, sociological, and historical perspectives, Stearns provides a comprehensive overview of globalization and the historical factors that have shaped it.
