This book is the first to focus on violent and/or 'abusive' behaviours in lesbian, gay, bisexual and/or transgender, non-binary gender or genderqueer people's intimate relationships. It provides fresh empirical data from a comprehensive mixed-methods study and novel theoretical insights to destabilise and queer existing narratives about intimate partner violence and abuse (IPVA). Key to the analysis, the book argues, is the extent to which Michael Johnson's landmark typology of IPVA can be used to make sense of the survey data and accounts of 'abusive' behaviours given by LGB and/or T+ participants. As well as calling for IPVA scholars to challenge heteronormativity and cisnormativity and improve IPVA measurement, this book offers guidance and a new tool to assist practitioners from a variety of relationships services with identifying victims/survivors and perpetrators in LGB and/or T+ people's relationships. It will appeal to academics and practitioners in the field of domestic violence and abuse.?

Start with Why - A Complete Summary Start with Why is a book written by Simon Sinek. Someone may ask, what is so special about this

book? In this book, Sinek discusses success, but not in the usual, "follow these steps to achieve anything you want," way. Sinek uses a different approach than readers tend to find in other literature of the same type. The very first premise that the author uses to lead us into his book is a premise that contains one simple word: why. Why do some people reach success while others do not? Why do some groups manage to team-up and endure challenges, thus succeeding, while others fail to do so? What is it that makes some people different from others when it comes to achieving success? The entire book revolves around that question word. But the interesting thing about it, which eventually leads to even more interesting conclusion, is that there is an answer to this "why." Sinek uses many examples from real life and from people he knew or had researched, and shows how they managed to succeed. By using these examples, the author shows his readers that if others can succeed, so can we. When it comes to practical answers to "why," the author invests significant effort in finding all the answers. Start with Why is an intriguing and fascinating read, which will surely make readers ask themselves this simple, yet tricky question: why? Here Is A Preview Of What You Will Get: - A summarized version of the book. - You will find the book analyzed to further strengthen your knowledge. - Fun multiple choice quizzes, along with answers to help you learn about the book. This is a quintessential book for Cinema buffs and particularly those who are passionate about Tamil cinema, which has the distinction of having played a significant role in history of films in India. In the almost ten decades of its evolution, Tamil cinema has grown to exert a dominant influence on the social and political life of Tamil Nadu in a manner that is unparalleled elsewhere in the world. Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, *UNIX and Shell Programming* goes beyond providing a reference of commands to offer a guide to basic

commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scripting concepts, and cover all material required for understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells. Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom.

More than four million Palestinian refugees live in protracted exile across the Middle East. Taking a regional approach to Palestinian refugee exile and alienation across the Levant, this book proposes a new understanding of the spatial and political dimensions of refugee camps across the Middle East. Combining critical scholarship with ethnographic insight, the essays uncover host states' marginalisation of stateless refugees and shed light on new terminology on refugees, migration and diaspora studies.

The impact on the refugee community is detailed in novel studies of refugee identity, memory and practice and new legal approaches to compensation and "right of return". The book opens a critical debate on key concepts and proposes a new understanding of the spatial and political dimensions of refugee camps, better understood as laboratories of Palestinian society and "state-in-making". This strong collection of original essays is an essential resource for scholars and students in refugee studies, forced migration, disaster studies, legal anthropology, urban studies, international law and Middle East history.
