The Moon learns the importance of humility and the dangers of pride after boasting about being the greatest light in the sky.

"The authoritative masterpiece" (L. A. Times) on the Apollo space program and NASA's journey to the moon This acclaimed portrait of heroism and ingenuity captures a watershed moment in human history. The astronauts themselves have called it the definitive account of their missions. On the night of July 20, 1969, our world changed forever when Neil Armstrong and Buzz Aldrin walked on the moon. Based on in-depth interviews with twenty-three of the twenty-four moon voyagers, as well as those who struggled to get the program moving, A Man on the Moon conveys every aspect of the Apollo missions with breathtaking immediacy and stunning detail. A Man on the Moon is also the basis for the acclaimed miniseries produced by Tom Hanks, From the Earth to the Moon, now airing and streaming again on HBO in celebration of the 50th anniversary of Apollo 11.

Winner of the 2016 Tiptree Award! Longlisted for the 2016 National Book Award for Young People's Literature Stonewall Book Award Honor "McLemore's second novel is such a lush surprising fable, you half expect birds to fly out of the pages... McLemore uses the supernatural to remind us that the body's need to speak its truth is primal and profound, and that the connection between two people is no more anyone's business than why the dish ran away with the spoon." --Jeff Giles, New York Times Book Review Anna-Marie McLemore's debut novel *The Weight of Feathers* was greeted with rave reviews, a YALSA Morris Award nomination, and spots on multiple "Best YA Novels" lists. Now, McLemore delivers a second stunning and utterly romantic novel, again tinged with magic. To everyone who knows them, best friends Miel and Sam are as strange as they are inseparable. Roses grow out of Miel's wrist, and rumors say that she spilled out of a water tower when she was five. Sam is known for the moons he paints and hangs in the trees and for how little anyone knows about his life before he and his mother moved to town. But as odd as everyone considers Miel and Sam, even they stay away from the Bonner girls, four beautiful sisters rumored to be witches. Now they want the roses that grow from Miel's skin, convinced that their scent can make anyone fall in love. And they're willing to use every secret Miel has fought to protect to make sure she gives them up. Atmospheric, dynamic, and packed with gorgeous prose, *When the Moon was Ours* is another winner from this talented author.

Chief engineer Thomas J. Kelly gives a firsthand account of designing, building, testing, and flying the Apollo lunar module. It was, he writes, "an aerospace engineer's dream job of the century." Kelly's account begins with the imaginative process of sketching solutions to a host of technical challenges with an emphasis on safety, reliability, and maintainability. He catalogs numerous test failures, including propulsion-system leaks, ascent-engine instability, stress corrosion of the aluminum alloy parts, and battery problems, as well as their fixes under the ever-present constraints of budget and schedule. He also recaptures the exhilaration of hearing Apollo 11's Neil Armstrong report that "The Eagle has landed," and the pride of having inadvertently provided a vital "lifeboat" for the crew of the disabled Apollo 13.

An astonishing untold story from the nineteenth century—a "riveting...engrossing... 'American Epic'" (*The Wall Street Journal*) and necessary work of history that reads like *Gone with the Wind* for the Cherokee. "A vigorous, well-written book that distills a complex history to a clash between two men without oversimplifying" (*Kirkus Reviews*), *Blood Moon* is the story of the feud between two rival Cherokee chiefs from the early years of the United States through the infamous Trail of Tears and into the Civil War. Their enmity would lead to war, forced removal from their homeland, and the devastation of a once-proud nation. One of the men, known as The Ridge—short for He Who Walks on Mountaintops—is a fearsome warrior who speaks no English, but whose exploits on the battlefield are legendary. The other, John Ross, is descended from Scottish traders and looks like one: a pale, unimposing half-pint who wears modern clothes and speaks not a word of Cherokee. At first, the two men are friends and allies who negotiate with almost every American president from George Washington through Abraham Lincoln. But as the threat to their land and their people grows more dire, they break with each other on the subject of removal. In *Blood Moon*, John Sedgwick restores the Cherokee to their rightful place in American history in a dramatic saga that informs much of the country's mythic past today. Fueled by meticulous research in contemporary diaries and journals, newspaper reports, and eyewitness accounts—and Sedgwick's own extensive travels within Cherokee lands from the Southeast to Oklahoma—it is "a wild ride of a book—fascinating, chilling, and enlightening—that explains the removal of the Cherokee as one of the central dramas of our country" (Ian Frazier). Populated with heroes and scoundrels of all varieties, this is a richly evocative portrait of the Cherokee that is destined to become the defining book on this extraordinary people.

Insulted because Coyote will not sing to her, Moon leaves the sky and returns only to get away from Coyote's singing.

Powerful free verse and stunning illustrations tell the true story of the American effort to land the first man on the Moon. In 1961, President John F. Kennedy announced that the United States would try to land a man on the Moon by the end of the decade. During the two thousand, nine hundred and seventy-nine days that followed his speech, eighteen astronauts climbed into spaceships; three of them died before even leaving the ground. Eight rockets soared into space. And four hundred thousand people—engineers, technicians, scientists, mathematicians, and machinists—joined Project Apollo in hopes of making the dream a reality. Award-winning author and former mechanical engineer Suzanne Slade joins up with New York Times best-selling illustrator Thomas Gonzalez to tell the powerful story of the successes, failures, triumphs, tragedies, and lessons learned from Apollos 1 through 10 that led to the first Moon landing.

“A whole culture is imaginatively and authoritatively illuminated” in this “suspenseful, insightful, poignant” novel of prehistoric times (Publishers Weekly). Twenty thousand years ago, a courageous girl lived in Siberia near Woman Lake, a place you won’t find on any modern map. Only thirteen, Yanan and her companions—hunters of deer, gatherers of roots and twigs—struggle to survive the harsh realities of hunger and cold, bound by an unending cycle of birth, kinship, violence, and death. As Yanan recounts the terrible adventures of her brief life, she departs on spirit journeys that evoke the lives of the animals to which she and her people are intimately linked. A lyrical novel of our species’ prehistory, *Reindeer Moon* opens up corridors to the imagination that lead us back to the long-forgotten echoes of our distant human past. “Unforgettable . . . *Reindeer Moon* beautifully resurrects a lost world of merciless magnificence. Dozens of memorable characters live and die in this moving tale, which should become a classic.” —Chicago Tribune Book World “Those familiar with the author’s landmark study, *The Harmless People*, will not be surprised at the range of anthropological information she brings to her first novel, or at the lucidity of her prose. What will astonish, engross and move readers in her narrative of a group of hunter-gatherers who lived 20,000 years ago is the dramatic immediacy of the story and the depth and range of character development.” —Publishers Weekly

Instant New York Times Bestseller As the fiftieth anniversary of the first lunar landing approaches, the award winning historian and perennial New York Times bestselling author takes a fresh look at the space program, President John F. Kennedy's inspiring challenge, and America's race to the moon. "We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win."—President John F. Kennedy On May 25, 1961, JFK made an astonishing announcement: his goal of putting a man on the moon by the end of the decade. In this engrossing, fast-paced epic, Douglas Brinkley returns to the 1960s to recreate one of the most exciting and ambitious achievements in the history of humankind. American Moonshot brings together the extraordinary political, cultural, and scientific factors that fueled the birth and development of NASA and the Mercury, Gemini and Apollo projects, which shot the United States to victory in the space race against the Soviet Union at the height of the Cold War. Drawing on new primary source material and major interviews with many of the surviving figures who were key to America's success, Brinkley brings this fascinating history to life as never before. American Moonshot is a portrait of the brilliant men and women who made this giant leap possible, the technology that enabled us to propel men beyond earth's orbit to the moon and return them safely, and the geopolitical tensions that spurred Kennedy to commit himself fully to this audacious dream. Brinkley's ensemble cast of New Frontier characters include rocketeer Wernher von Braun, astronaut John Glenn and space booster Lyndon Johnson. A vivid and enthralling chronicle of one of the most thrilling, hopeful, and turbulent eras in the nation's history, American Moonshot is an homage to scientific ingenuity, human curiosity, and the boundless American spirit.
