The Reluctant Land Cole Harris, 2009-01-01 Winner, 2008 K.D. Srivastava Prize for Excellence in Scholarly Publishing, UBC Press The Reluctant Land describes the evolving pattern of settlement and the changing relationships of people and land in Canada from the end of the fifteenth century to the Confederation years of the late 1860s and early 1870s. It shows how a deeply indigenous land was reconstituted in European terms, and, at the same time, how European ways were recalibrated in this non-European space. It also shows how an archipelago of scattered settlement emerged out of an encounter with a parsimonious territory, and suggests how deeply this encounter differed from an American relationship with abundance. The book begins with a description of land and life in northern North America in 1500, and ends by considering the relationship between the pattern of early Canada and the country as we know it today. Intended to illuminate the background of modern Canada, The Reluctant Land is an intelligent discussion of people and place that will be welcomed by scholars and lay readers alike.

The Biopolitics of Development Sandro Mezzadra, Julian Reid, Ranabir Samaddar, 2013-12-27 This book offers an original analysis and theorization of the biopolitics of development in the postcolonial present, and draws significantly from the later works of Michel Foucault on biopolitics. Foucault's works have had a massive influence on postcolonial literatures, particularly in political science and international relations, and several authors of this book have themselves made significant contributions to that influence. While Foucault's thought has been inspirational for understanding colonial biopolitics as well as governmental rationalities concerned with development, his works have too often failed to inspire studies of political subjectivity. Instead, they have been used to stoke the myth of the inevitability of the decline of collective political subjects, often describing an increasingly limited horizon of political possibilities, and provoking a disenchantment with the political itself in postcolonial works and studies. Working against the grain of current Foucauldian scholarship, this book underlines the importance of Foucault's work for the capacity to recognize how this degraded view of political subjectivity came about, particularly within the framework of the discourses and politics of 'development', and with particular attention to the predicaments of postcolonial peoples. It explores how we can use Foucault's ideas to recover the vital capacity to think and act politically at a time when fundamentally human capacities to think, know and to act purposively in the world are being pathologized as expressions of the hubris and 'underdevelopment' of postcolonial peoples. Why and how it is that life in postcolonial settings has been depoliticized to such dramatic effect? The immediacy of these themes will be obvious to anyone living in the South of the world. But within the academy they remain heavily under-addressed. In thinking about what it means to read Michel Foucault today, this book tackles some significant questions and problems: Not simply that of how to explain the ways in which postcolonial regimes of governance have achieved the debasements of political subjectivity they have; nor that of how we might better equip them with the means to suborn the life of postcolonial peoples more fully; but that of how such peoples, in their subjection to governance, can and do resist, subvert, escape and defy the imposition of

modes of governance which seek to remove their lives of those very capacities for resistance, subversion, flight, and defiance.

Visual Global Politics Roland Bleiker,2018-02-13 We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, *Visual Global Politics* is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

Twitter and Tear Gas Zeynep Tufekci,2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

Painted Love Hollis Clayson,2003-10-30 In this engrossing book, Hollis Clayson provides the first description and analysis

of French artistic interest in women prostitutes, examining how the subject was treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their contemporaries. Clayson not only illuminates the imagery of prostitution-with its contradictory connotations of disgust and fascination-but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the commercialization and the ambiguity of modern life.

Coding Freedom E. Gabriella Coleman,2013 Who are computer hackers? What is free software? And what does the emergence of a community dedicated to the production of free and open source software--and to hacking as a technical, aesthetic, and moral project--reveal about the values of contemporary liberalism? Exploring the rise and political significance of the free and open source software (F/OSS) movement in the United States and Europe, Coding Freedom details the ethics behind hackers' devotion to F/OSS, the social codes that guide its production, and the political struggles through which hackers question the scope and direction of copyright and patent law. In telling the story of the F/OSS movement, the book unfolds a broader narrative involving computing, the politics of access, and intellectual property. E. Gabriella Coleman tracks the ways in which hackers collaborate and examines passionate manifestos, hacker humor, free software project governance, and festive hacker conferences. Looking at the ways that hackers sustain their productive freedom, Coleman shows that these activists, driven by a commitment to their work, reformulate key ideals including free speech, transparency, and meritocracy, and refuse restrictive intellectual protections. Coleman demonstrates how hacking, so often marginalized or misunderstood, sheds light on the continuing relevance of liberalism in online collaboration.

Oil to Cash Todd Moss,Caroline Lambert,Stephanie Majerowicz,2015-06-10 Oil to Cash explores one option to help countries with new oil revenue avoid the so-called resource curse: just give the money directly to citizens. A universal, transparent, and regular cash transfer would not only provide a concrete benefit to regular people, but would also create powerful incentives for citizens to hold their government accountable. Oil to Cash details how and where this idea could work and how policymakers can learn from the experiences with cash transfers in places like Mexico, Mongolia, and Alaska.

American Vaudeville as Ritual Albert F. McLean Jr., 2021-10-21 This study affords an entirely new view of the nature of modern popular entertainment. American vaudeville is here regarded as the carefully elaborated ritual serving the different and paradoxical myth of the new urban folk. It demonstrates that the compulsive myth-making faculty in man is not limited to primitive ethnic groups or to serious art, that vaudeville cannot be dismissed as meaningless and irrelevant simply because it fits neither the criteria of formal criticism or the familiar patterns of anthropological study. Using the methods for criticism developed by Susanne K. Langer and others, the author evaluates American vaudeville as a symbolic manifestation of basic values shared by the American people during the period 1885-1930. By examining vaudeville as folk ritual, the book reveals the unconscious symbolism basic to vaudeville—in its humor, magic, animal acts, music, and playlets, and also in the performers and the managers—which gave form to the dominant American myth of success. This striking view of the new mass man as a folk and of his mythology rooted in the very empirical science devoted to dispelling myth has implications for the serious study of all forms of mass entertainment in America. The book is illustrated with a number of striking photographs.

Seeing Like a State James C. Scott, 2020-03-17 “One of the most profound and illuminating studies of this century to have been published in recent decades.”—John Gray, *New York Times Book Review* Hailed as “a magisterial critique of top-down social planning” by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—*New Yorker* “A tour de force.”—Charles Tilly, *Columbia University*

Learning Power Jeannie Oakes, John Rogers, 2006-04-24 In cities across the nation, low-income African-American and Latino parents hope their children's education will bring a better life. But their schools, typically, are overcrowded, ill equipped, and shamefully under-staffed. This work offers a radical approach to school reform that stresses grassroots public activism.

Voice and Agency Jeni Klugman, Lucia Hanmer, Sarah Twigg, Tazeen Hasan, Jennifer McCleary-Sills, Julieth Santamaria, 2014-09-29 Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

The State Nobility Pierre Bourdieu, 1998 Examining in detail the work of consecration carried out by elite education systems, Bourdieu analyzes the distinctive forms of power—political, intellectual, bureaucratic, and economic—by means of which contemporary societies are governed.
