

Times Tables The Fun Way Book For Kids A Picture And Story Method Of Learning Multiplication

This little book has times tables from 1 to 20 with 12 rows of multiplication. That is all children should ideally learn! This book is suitable for children from the ages of pre-school and upwards. They can memorize the tables then test it afterwards. There is no magic formula for learning the times tables, they must do it the hard way which is to memorize them by heart. It will take months so there is no need for parents to get upset and panic if they aren't able to memorize it in an instance. Remember each child is different. Just ask your child to memorize these times tables one by one.

The fun, engaging program that will help your child master the multiplication facts once and for all--without spending hours and hours drilling flash cards!

A brilliantly interactive book that makes times tables fun! Lift the flaps and pull the tabs to learn all the times tables up to twelve. Join Noah as he counts the animals into the ark, help an octopus work out how many shoes she has and find the secret times tables hidden in the sweet factory.

Designed for all teachers, this book provides a wealth of materials and resources to support the needs of learners, aged 6 to 14 years, who have difficulty with maths and number. Packed full with 220 activities and 55 games, the author provides you with a complete toolkit to enable you to understand dyscalculia and implement practical and innovative strategies to use in the classroom or at home. This fourth edition is updated with new content including: - more on dice and board games, multiplication and division; - new downloadable and printable teaching materials (including tracking sheets, activity sheets, game boards and teaching resources); - updated videos.

Rhymes x pictures = times tables made easy! Nine year old Harry Moraghan never found maths easy. Then he discovered he REALLY hated it when it came to learning multiplication tables So Harry's mum invented an ingenious way of remembering his tables by using rhymes and pictures. In two weeks Harry had all his multiplication tables down pat. Soon after, Harry's teacher gave the class a test. Harry finished it in five minutes and got every question right! News of Harry's Magic Tables spread like wildfire in his school. In no time, the book was shared with some lucky classmates, friends, cousins, and eventually complete strangers too! Now many happy children know their tables inside out – and so can you!

Pictures and stories make memorization easy with the Times Tables The Fun Way Activity Book. Number characters in a story interact to cause an outcome which is the answer to the fact. For example, to teach 6×6 , the story tells of twin sixes crossing the desert, they get low on water becoming thirsty sixes, a word play on 36.

Learning times tables is a necessity for all children and this book makes it clear, easy and fun to do. Once they have mastered all the numbers in the yellow panels they will know them all!

Children can have fun learning up to their 12 times table with this colourful book and 300-piece jigsaw set. Bright illustrations of planets,

pirates and more provide an ideal way to count and visualise the calculations and build confidence in multiplication skills. Assembling the jigsaw provides a fun and interactive approach to what can be a dry and tricky subject.

Halloween Multiplication table 1 to 25 Workbook Times Tables the Fun Way Book for Kids Ages 8 and 12, Grades 3 to 6. A cute Ghost Halloween Illustration Cartoon Learning the Multiplication Facts Made Easy Workbook, Memorization of the multiplication facts is fun For kids with learning differences, many say this is the best way to learn time tables. Best gifts to your friends, family and yourself, it will bring them more surprise and joy. Great gift idea for men, women, teens, boys, girls, Moms, Dads, Back to School, Birthday, Valentine's Day - Easter Day - Mother's Day - Father's Day - Labor Day - Halloween - Thanksgiving Day and Christmas.

An updated edition of a standard in its field that remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics, with an afterword from Hochschild that addresses how far working mothers have come since the book's first publication, and how much farther we all still must go.

An evocative, gorgeous four-season look at cooking in Maine, with 100 recipes No one can bring small-town America to life better than a native. Erin French grew up in Freedom, Maine (population 719), helping her father at the griddle in his diner. An entirely self-taught cook who used cookbooks to form her culinary education, she now helms her restaurant, *The Lost Kitchen*, in a historic mill in the same town, creating meals that draw locals and visitors from around the world to a dining room that feels like an extension of her home kitchen. The food has been called "brilliant in its simplicity and honesty" by *Food & Wine*, and it is exactly this pure approach that makes Erin's cooking so appealing—and so easy to embrace at home.

13 multiplication and division games and activities for 3rd graders! Different activities for each phase of multiplicative thinking. Uses pictures, stories and activities to help children learn the multiplication tables.

These easy-to-use resources will help students to quickly master basic multiplication facts, using an amazingly simple, proven method developed by the author through years of research and classroom instruction. Each day, students memorize specific facts, a letter is sent home for parent involvement, and students review and are tested on the previous day's facts. After 7 days, student knowledge is assessed with a series of four tests. Includes black line masters of tests, parent letters, and teaching notes.

Teach Your Child the Multiplication Tables - 2nd Edition Like most third graders, my son found learning the multiplication tables through rote memorization a challenge. After an afternoon of tiresome drills, I knew there had to be a better way! I drew a grid for tables 1-10. Not surprisingly, Scott knew tables 1, 2, 5 and 10, the tables with easy patterns. Well, then, why not find patterns for the rest of the tables? Tables for EVEN numbers 2, 4, 6 and 8, we discovered, end in some combination of 2-4-6-8-0 and are easy to learn. Tables for ODD numbers, we found, also have distinct patterns. Patterns made Scott smile. He could see the underlying structure and knew he got it right. The traditional method of learning one math fact at a time, such as $8 \times 6 = ?$, is not only difficult but highly inefficient. Rote memorization is passive and

Download Ebook Times Tables The Fun Way Book For Kids A Picture And Story Method Of Learning Multiplication

mechanical. Students typically find it boring. Why not learn one pattern for the entire table? Discovering patterns is active, creative and engaging. The essence of mathematics is patterns. Learning to recognize patterns at an early age develops analytical skills. Patterns greatly benefit children with special needs, such as those with ADD/ADHD, autism and dyslexia. They can better recall and visualize the table when they see a pattern. This is true for all children. Patterns aid recall. My workbook utilizes both left and right-brain strategies to teach multiplication. There are marked differences between children who are left-hemisphere dominant and those who are right dominant. Whereas the left-hemisphere dominant child can construct the whole from the parts, the right dominant prefers the big picture, seeing patterns and making connections. Special needs children are often right-brain dominant. Learning the multiplication tables is much easier when both hemispheres are engaged. It is the responsibility of parents and teachers to ensure children learn the multiplication tables. Without them a child will not progress beyond third grade math. Fractions, decimals, percentages and algebra will be beyond a child's reach. In California, the number one reason students do not graduate from high school is failure to pass algebra. A leading cause is: failure to master the times tables! It is a national disgrace that fifteen-year olds in the U.S. rank near the bottom of industrialized nations in math skills. We must reverse this alarming trend. The time to intervene is in the third grade. Teachers, why not a more effective approach to the multiplication tables than the "drill and kill" of rote memorization? Why not bring the "magic" of math into the classroom? If all third graders were to genuinely like math, they would be more likely to succeed in school. Parents too must do their part. Parents have a huge influence over a third grader. By high school it may be too late. Mastery of the multiplication tables is essential to your child's future. The goal of this workbook is not only multiplication mastery for all children but to instill in them a love of numbers and fascination with math. Free instructional TeaChildMath(tm) videos can be found on YouTube.

Practice makes perfect with Turn to Learn Multiplication, an engaging and innovative book that teaches a hands-on approach to multiplication and times tables. Young students can test themselves by spinning the wheel built right into the book's cover and watching the times tables appear. On each page in the book, readers will then find great tips and tricks to help memorize times tables from 1 to 12. Turn to Learn Multiplication uses various techniques such as number grids, times tables charts, tips and memory clues, and number lines to help reinforce the times tables until young readers have them memorized. With its spinning wheel, lift-the-flaps, and colorful spreads, Turn to Learn Multiplication creates a whole new spin on times table learning.

A modern multiplication primer that tackles the terrors of a typical school year. Learning math has never been this much fun! Inspired by a Victorian math primer, Terrible Times Tables is a modern take on learning one's multiplication tables, from numbers 2 to 10, featuring elementary school themes of homeroom, field trips, cafeteria food, holidays, and recitals.

Download Ebook Times Tables The Fun Way Book For Kids A Picture And Story Method Of Learning Multiplication

Featuring a reluctant narrator and a few unwitting critters, learning math has never been so much fun or amusing. For sample pages PREVIEW, visit www.lidiastanton.com. This step-by-step guide is for learners of all ages who: have tried (without success) rote learning methods based on repetition of whole multiplication facts enjoy active learning through discovery and experience have gaps in their times tables knowledge need fast and foolproof strategies to recall times tables in formal assessments, particularly timed ones may have a specific learning difficulty (SpLD), such as dyslexia, dyscalculia and ADD/ADHD The book works by: helping over-learn secure reference points in the times tables, from which more tricky facts can be worked out. validating alternative methods for learning times tables. Rote learning does not work for everyone. Using fingers is not a sign of cheating. For those who are self-conscious, the book's preferred (but not exclusive) way of using fingers is gentle tapping on the table (instead of raising hands) to avoid attracting attention to oneself. offering multisensory instruction methods that help counteract the effects of weak sequential working memory and poor long-term memory for number facts. How to use this book Only practise one 'trick' at a time (until its recall becomes fully automatic) before moving on to the next one. This is to avoid becoming confused or overwhelmed. Once you've learned a trick, practise it as often as you can: later the same day and in the following days and weeks. Share it with other people; use it as a family, class, or party trick. Test yourself during quiet times at home. The book doesn't need to be read from cover to cover. You can dip in and out, starting with the trick that looks most appealing or makes the most sense to you. Different brains respond differently to maths methods. Don't worry if some tricks don't make sense straight away. Leave them for now, enjoy another trick, then come back to it later. It's fine to learn only some tricks in this book.

Times Tables the Fun Way Book for Kids

This is the first title in a new Maths Activity Books Series, to be followed by Adding and Substratcing, Fractions, and Telling the Time. This write-in activity book, filled with loads of illustrated activities and scenes, will help you practise your times tables. Each double spread has a different theme to tie the activities together. There are two spreads of stickers, some of which are used in the activites, some are used as rewards for the 'Test yourself' page.

The Cambridge Advanced Learner's Dictionary gives the vital support which advanced students need, especially with the essential skills: reading, writing, listening and speaking. In the book: * 170,000 words, phrases and examples * New words: so your English stays up-to-date * Colour headwords: so you can find the word you are looking for quickly * Idiom Finder * 200 'Common Learner Error' notes show how to avoid common mistakes * 25,000 collocations show the way words work together * Colour pictures: 16 full page colour pictures On the CD-ROM: * Sound: recordings in British and American English, plus practice tools to help improve pronunciation * UNIQUE! Smart Thesaurus helps you choose the

right word * QUICKfind looks up words for you while you are working or reading on screen * UNIQUE! SUPERwrite gives on screen help with grammar, spelling and collocation when you are writing * Hundreds of interactive exercises Translated in Spanish version of Times Tables the Fun Way. Students learn to memorize their times tables by associating the fact with a cartoon and story. Written in spanish and proven to aid memorization

For a child at home or students in a classroom, this 8.5"x11," 244 page resource book is full of reproducible activities to help ALL learners memorize the basic times tables 0-9. Times to Remember is a unique and innovative multi-sensory product. Fast, easy, effective, and fun, the key is found in beautifully illustrated rhymes, created with careful consideration to both visual and auditory learning. Hands-on activities, requiring minimal instruction, also provide kinesthetic learning so that all learners, regardless of learning styles, can celebrate success. Not only is Times to Remember fun and easy, it takes only minutes for results. It can be presented to an entire classroom, small groups, or individual learners, and is especially effective for students who struggle with rote memorization, including those with special needs. Included are innovative graphic-hint flashcards and quizzes, 21 illustrated rhymes in a trace-and-color format, review pages, games and more. Perfect for parents, grandparents, home school families, teachers, special education and tutors. Combine with Times to Remember Sing-ALong Songs or children's hardcover book for additional fun and learning.

In 1966 when Judy became pregnant at the age of 16, her family kept her plight a secret and was compelled to give up her daughter. Judy felt the grief and shame as a tangible lump within her body and fought to keep it contained within the shadows of silence. But as an adult, she felt compelled to address the loss by searching for her birth daughter and bringing her story to light--From back cover.

Memorization of the multiplication facts is fun and easy with this colorful and clever book of cartoons and stories. Children learn to associate the numbers with the characters in the story. To teach 4x4, the story tells about Bart who loves to go hang gliding and can't wait until he turns 16 so he can get his driver's license and drive his 4 by 4. Children easily remember once the story is learned. The caption below the story says: Remember: you have to be 16 to drive a 4x4. There are cartoons and stories for all the difficult facts, ie. the 3's, 4's, 6's, 7's, and 8's. Tricks are used to teach the easier ones ie. 1's, 2's, 5's, and 9's. Kids love the stories and will never forget "You have to be 16 to drive a 4 by 4, (4x4). Over 500,000 copies have been sold to schools in the US since 1992.

Time Tales uses mnemonic stories to trigger the memory when a set of facts are presented. This approach will appeal to visual, auditory and kinesthetic learners.

Times tables come alive with this revolutionary method of learning the multiplication facts. The facts are presented as part of a complete mini-story of colorful cartoon characters. Children easily visualize the animated scene, & then

Download Ebook Times Tables The Fun Way Book For Kids A Picture And Story Method Of Learning Multiplication

remember the characters which trigger the answer to the fact. Proven by numerous studies, visualization & association enhance retention of facts in long term memory. To teach six times six, the story tells of twin sixes who travel across the desert to visit cousins. The twin sixes get low on water becoming thirsty sixes, a word play on 36. The picture shows perspiring, hot & drooping sixes crossing the Sahara. A reminder under the illustration reads: When 6 is with 6, they are very thirsty sixes (36). The book covers the multiplication facts through the nines. Numerical tricks & association are used to teach the ones, twos, fives, & nines while the remaining facts have their own picture & story. Studies have shown a 33% increase in retention with the picture-story method versus conventional methods. Children are eager to learn the stories & parents & teachers enjoy the refreshing approach of the picture method. Also available are the TIMES TABLES THE FUN WAY Flash Cards, Student Workbook, & Teacher's Manual.

Multiplication tables 2-12

Wipe-clean Times Tables 7-8 is the third title in our exciting new 'Key Skills' series that supports Maths and English learning for the 5 to 8 age group. These workbooks are wipe-clean so fully reusable and a new thinner, branded pen is attached to the covers. At the back of each book there are answers and a section with notes and tips for parents, teachers and caregivers. Each age group across the whole series features a set of 10 themed animal characters: woodland animals (5-6), jungle animals (6-7) or animal park (7-8). There is a different illustrator for each age group. Times tables is a perennial challenge for children and parents alike and this fun, interactive practice will be welcomed by parents.

"Help children practice and perfect their 2 to 12 times tables with this entertaining write-in activity pad. There are a range of different puzzles and activities for each times table, from number wheels and multiplying machines to speed calculations and multiplication grids. Top tips, times tables and puzzle answers are at the back of the book."

Pull down the tab to reveal the answers to times tables questions! This entertaining and educational title is the perfect way for kids age 6+ to master their math skills, from the 2 x table to the 12 x table. Children can test their knowledge of these tables and then pull down the tab to reveal the answer. The fantastic illustrations encourage kids to engage with and enjoy learning the tables, while the interactive tab reinforces numeracy skills. Learning your times tables has never been so fun or so easy!

The brain is a wonderful thing to tease. Two hundred grid-based logic puzzles from Puzzle Baron, the mega-popular online puzzle site! For each puzzle, readers are given a background story and a list of clues and then left with only pure logic to arrive at the correct answer. Unlike other logic puzzle books, every puzzle includes statistics-such as the average completion time, the record completion time, and the percentage of people to complete the puzzle-to bring out the competitor in each puzzler and better inform them on how easy or difficult each puzzle is. ?Features 200 grid-based logic puzzles ?Includes puzzles statistics for added excitement ?Ideal for kids and adults
