The first edition was called "the most valuable film reference in several years" by Library Journal. The new edition published in hardcover in 2001 includes more than 670 entries. The current work is a paperback reprint of that edition. Each entry contains a mini-essay that defines the topic, followed by a chronological list of representative films. From the Abominable Snowman to Zorro, this encyclopedia provides film scholars and fans with an easy-to-use reference for researching film themes or tracking down obscure movies on subjects such as suspended animation, viral epidemics, robots, submarines, reincarnation, ventriloquists and the Olympics ("Excellent" said Cult Movies). The volume also contains an extensive list of film characters and series, including B-movie detectives, Western heroes, made-for-television film series, and foreign film heroes and villains.

Michelle Allison is a tall brunette of twenty-six. She is the proud owner of an antique shop and has built up a nice clientele for herself. Her private life is marred by dreams that have haunted her for years. They intensify in hallucinogenic leaps during the day and appear also at night in an ethereal voyage on the doomed ship Titanic. During her frantic search for a link between her dreams and reality, she happens upon a message written on a napkin left in her grandmothers trunk, which notes that it was written on the Titanic and ironically dated April 15, 1912, the day of the great liners demise. The next day she notices an article in the newspaper about a lecture

on Genetic Memory. Professor Matt Sommerfield, the speaker, more than resembles the Matthew of her dreams. They meet in a French restaurant the next morning. The French ambiance sends Michelle into a somnambular trance. The solving of Michelle's connection to the Titanic only leads the reader deeper into Michelle's French background as her Egyptian past threads its needle through her life. Read and find out what common thread binds these actual historical events to one another.

After a particularly grueling day taking abuse from three popular girls, Margaret finds a strange package in the alley behind the shop. Inside are the three girls' dresses—mangled, muddied, and completely ruined. Plenty of people hate the popular clique, but why take it out on their prom dresses? A few days later, Margaret sneaks off from the senior picnic to enjoy the view from the old lighthouse. A scream pierces the air, and Margaret sees one of the popular girls, Stephanie, dead

Despite an often unfair reputation as being less popular, less successful, or less refined than their bona-fide Broadway counterparts, Off Broadway musicals deserve their share of critical acclaim and study. A number of shows originally staged Off Broadway have gone on to their own successful Broadway runs, from the ever-popular *A Chorus Line* and *Rent* to more off-beat productions like *Avenue Q* and *Little Shop of Horrors*. And while it remains to be seen if other popular Off Broadway shows like *Stomp*, *Blue Man Group*, and *Altar Boyz* will make it to the larger Broadway theaters, their Off Broadway runs have been enormously successful in their own right. This book discusses more than 1,800 Off Broadway, Off Off Broadway, showcase, and workshop musical productions. It includes detailed descriptions of Off Broadway musicals that closed in previews or in rehearsal, selected musicals that opened in Brooklyn and in New Jersey, and American operas that opened in New York, along with general overviews of Off Broadway institutions such as the Light Opera of Manhattan. The typical entry includes the name of the host theater or theaters; the opening date and number of performances; the production's cast and creative team; a list of songs; a brief plot synopsis; and general comments and reviews from the New York critics. Besides the individual entries,

the book also includes a preface, a bibliography, and 21 appendices including a discography, filmography, a list of published scripts, and lists of musicals categorized by topic and composer.

The Fly (1958), an American science fiction/horror film that was produced and directed by Kurt Neumann, and the film was a huge success, especially with stars such as David Hedison (credited as Al Hedison), Patricia Owens, Vincent Price, and Hebert Marshall. Who can forget the horrifying plea of the man turned into a fly? "Help me! Help me!" His wail and the startling close-up that followed etched permanently into the minds of science fiction fans worldwide. The story follows Andre Delambre, a devoted husband, a loving father and a brilliant scientist. When his body is found in his laboratory with his arm and head crushed by a hydraulic press, his wife Helene admits to having killed him. Believing Helene incapable of such a crime, Andre's brother slowly uncovers the truth - that an experiment with Andre's new teleportation device went horribly wrong and Andre persuaded Helene to assist him in suicide. When the American Film Institute distributed a ballot with 400 nominated movie quotes to a jury of over 1500 film industry figures, the above quote came in

123rd. The Fly's influence extends far beyond a simple quote. The movie's concept, ending, and the quote have permeated pop culture from 1958 to The Simpsons to a 2008 opera based on a 1986 film remake by David Cronenberg. The original movie was the surprise hit on 1958. Shot in eighteen days at a cost of \$450,000, it brought in \$6 million, at a time when 20th Century Fox Studios was in desperate need of a hit. This film made a star of David Hedison and cemented Vincent Price's place among the horror film immortals. It is more than a tale of science gone wrong and hideous mutants. It is a film classic, the rare perfect blending of story, cast, and crew, with the fantastic elements in sync with the universality of Andre's struggle with what he had hoped to do with this technology and what actually happened to him. That struggle touches everyone who has ever watched this film and is why, after 50 years, it remains a classic. Complete with reminiscences from David Hedison, this book covers the history and legacy of this seminal science fiction film.

Titanic scholars contend that the demise of “the unsinkable ship” left more behind than a memory of April 15, 1912, as an important point in history. Through books, films, stories, and songs, the archetypal shipwreck has endured as a metaphor for the perils of mankind's hubris and the fallibility of technology. In 1985, the discovery of the long-missing wreckage two miles below the surface of the Atlantic revitalized interest in the Titanic and spawned a new generation of books, films, and, for the first time, websites, and computer games. James Cameron's blockbuster Titanic became the biggest movie of all time and engendered still greater popular interest in the tragic event. This bibliography is a survey of the immense volume of literary, dramatic, and commercial endeavors that came out of history's most compelling shipwreck. Organized by genre in accessible categories and short entries, the book includes Titanic-inspired documentaries, narrative films, children's books, histories, short stories, novels, plays, articles, essays, software, websites, poems, and songs. Each entry includes a brief review, bibliographic information, and the technical details of the specific source. The reviews include subjective analysis designed to reflect the usefulness of the source and to be of benefit to researchers and scholars. Five appendices include lists of the actors appearing in more than one Titanic film, brief film and television appearances of the Titanic, films never or not yet released, books that survived the wreck, and books written by passengers.

Whole World on Fire focuses on a technical riddle wrapped in an organizational mystery: How and why, for more than half a century, did the U.S. government fail to predict nuclear fire damage as it drew up plans to fight strategic nuclear war? U.S. bombing in World War II caused massive fire damage to Hiroshima and Nagasaki, but later war plans took account only of damage from blast; they completely ignored damage from atomic firestorms. Recently a small group of researchers has shown that for modern nuclear weapons the destructiveness and lethality of nuclear mass fire often--and predictably--greatly exceeds that of nuclear blast. This has major implications for defense policy: the U.S. government has underestimated the damage caused by nuclear weapons, Lynn Eden finds, and built far more warheads, and far more destructive warheads, than it needed for the Pentagon's war-planning purposes. How could this have happened? The answer lies in how organizations frame the problems they try to solve. In a narrative grounded in organization theory, science and technology studies, and primary historical

sources (including declassified documents and interviews), Eden explains how the U.S. Air Force's doctrine of precision bombing led to the development of very good predictions of nuclear blast--a significant achievement--but for many years to no development of organizational knowledge about nuclear fire. Expert communities outside the military reinforced this disparity in organizational capability to predict blast damage but not fire damage. Yet some innovation occurred, and predictions of fire damage were nearly incorporated into nuclear war planning in the early 1990s. The author explains how such a dramatic change almost happened, and why it did not. *Whole World on Fire* shows how well-funded and highly professional organizations, by focusing on what they do well and systematically excluding what they don't do well, may build a poor representation of the world--a self-reinforcing fallacy that can have serious consequences. In a sweeping conclusion, Eden shows the implications of the analysis for understanding such things as the sinking of the Titanic, the collapse of the Tacoma Narrows Bridge, and the poor fireproofing in the World Trade Center.
