Christianity and migration have greatly influenced society and culture of sub-Saharan Africa, yet their mutual impact is rarely studied. Through oral history research in north eastern Congo (DRC), this book studies the migration of Anglicans and the subsequent reconfiguring of their Christian identity. It engages with issues of religious contextualisation, revivalism and the rise of Pentecostalism. It examines shifting ethnic, national, gender and generational expressions, the influence of tradition, contemporaneity, local needs and international networks to reveal mobile group identities developing through migration. Borrowing the metaphor of 'home' from those interviewed, the book suggests in what ways religious affiliation aids a process of belonging. The result is an original exploration of important themes in an often neglected region of Africa.

Professor Temperley suggests that the Elizabethan metrical psalm tunes were survivors of a mode of popular music that preceded the familiar corpus of ballad tunes. Passed on by oral transmission through several generations of unregulated singing, these once lively tunes changed gradually into very slow, quavering chants. Temperley guides the reader through the complex social, theological and aesthetic movements that played their part in the formation of the late Victorian ideal of the surpliced choir in every chancel, and he makes a fresh assessment of that old bugbear, the Victorian hymn tune. His findings show that the radical liturgical experiments of the last few years have not dislodged the Victorian model for the music of the English parish church. This volume provides an anthology of parish church music of all kinds from the fifteenth century to the twentieth, newly edited from primary sources for study or for performance [Publisher description].

A comprehensive text which explores the foundation, principles, methods, administration and organization involved in teaching choral music to adolescents. It applies the history, philosophy and psychology of music to the teaching of choral music and includes study projects for each chapter.

This anthology contains over 60 hymns from all ages and traditions. Each one is presented with a profile of the hymn's author, the personal and cultural context in which it was written, a note on the source of the tune and, where useful, the treble line of the tune.

Studying the role of music within religious congregations has become an increasingly complex exercise. The significant variations in musical style and content between different congregations require an interdisciplinary methodology that enables an accurate analysis, while also allowing for nuance in interpretation. This book is the first to help scholars think through the complexities of interdisciplinary research on congregational music-making by critically examining the theories and methods used by leading scholars in the field. An international and interdisciplinary panel of contributors introduces readers to a variety of research methodologies within the emerging field of congregational music studies. Utilizing insights from fields such as communications studies, ethnomusicology, history, liturgical studies, popular music studies, religious studies, and theology, it examines and models methodologies and theoretical perspectives that are grounded in each of these disciplines. In addition, this volume presents several "key issues" to ground these interpretive frameworks in the context of congregational music studies. These include topics like diaspora, ethics, gender, and migration. This book is a new milestone in the study of music amongst congregations, detailing the very latest in best academic practice. As such, it will be of great use to scholars of religious studies, music, and theology, as well as anyone engaging in ethnomusicological studies more generally.

The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education examines the many methods and motivations for vocal pedagogy, promoting singing not just as an art form arising from the musical instrument found within every individual but also as a means of communication with social, psychological, and didactic functions. Presenting research from myriad fields of study beyond music—including psychology, education, sociology, computer science, linguistics, physiology, and neuroscience—the contributors address singing in three parts: Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume II: Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer, wishes to become a singer, works with singers, or is interested in the application of singing for the purposes of education.

The interrelationship of music and theology is a burgeoning area of scholarship in which conceptual issues have been explored by musicologists and theologians including Jeremy Begbie, Quentin Faulkner and Jon Michael Spencer. Their important work has opened up opportunities for focussed, critical studies of the ways in which music and theology can be seen to interact in specific repertoires, genres, and institutions as well as the work of particular composers, religious leaders and scholars. This collection of essays explores such areas in relation to the religious, musical and social history of nineteenth-century Britain. The book does not simply present a history of sacred music of the period, but examines the role of music in the diverse religious life of a century that encompassed the Oxford Movement, Catholic Emancipation, religious revivals involving many different denominations, the production of several landmark hymnals and greater legal recognition for religions other than Christianity. The book therefore provides a valuable guide to the music of this complex historical period.

In this text, Muller breaks new ground in the study of this changing region and along the way she includes details of her own poignant journey, as a young, white South African woman, to the other side of a divided society.

The present Reader is a selection of texts on South African music which are chosen not only for their importance or the frequency of citations, but with the express purpose of providing the reader with a deep understanding of the music itself. Consequently, there are readings that are chosen because they have been influential, but there are also many which, though published, have not enjoyed very wide circulation. There are those which are of obvious historic interest, and others which speak to contemporary issues. Among other things, the volume provides an excellent sense of the varying ideologies and approaches that determine the relationship between author and subject. The reader is indispensable to scholars and enthusiasts of South African music and it is of great interest to ethnomusicologists more generally. It is also an excellent resource for those who do not have immediate access to harder-to-find articles, and is perhaps most vital to those who are looking to find a way into the world of South African music.

A record of the letters of the energetic and magnanimous Es'kia Mphahlele When Chabani Manganyi published the first edition of selected letters 25 years ago as a companion volume to, Exiles and Homecomings: A Biography of Es'kia Mphahlele the idea of Mphahlele's death was remote and poetic. The title, Bury Me at the Marketplace, suggested

that immortality of a kind awaited Mphahlele, in the very coming and going of those who remember him and whose lives he touched. It suggested, too, the energy and magnanimity of Mphahlele, the man, whose personality and intellect as a writer and educator would carve an indelible place for him in South Africa's public sphere. That death has now come and we mourn it. Manganyi's words at the time have acquired a new significance: in the symbolic marketplace, he noted, "the drama of life continues relentlessly and the silence of death is unmasked for all time." The silence of death is certainly unmasked in this volume, in its record of Mphahlele's rich and varied life: his private words, his passions and obsessions, his arguments, his loves, hopes, achievements, and even some of his failures. Here the reader will find many facets of the private man translated back into the marketplace of public memory. Despite the personal nature of the letters, the further horizons of this volume are the contours of South Africa's literary and cultural history, the international affiliations out of which it has been formed, particularly in the diaspora that connects South Africa to the rest of the African continent and to the black presence in Europe and the United States. This selection of Mphahlele's own letters has been greatly expanded; it has also been augmented by the addition of letters from Mphahlele's correspondents, among them such luminaries as Langston Hughes and Nadine Gordimer. It seeks to illustrate the networks that shaped Mphahlele's personal and intellectual life, the circuits of intimacy, intellectual inquiry, of friendship, scholarship, and solidarity that he created and nurtured over the years.

Music, Power, and Politics presents sixteen different cultural perspectives on the concept of music as a site of socio-political struggle. Essays by scholars from around the world explore the means by which music's long-acknowledged potential to persuade, seduce, indoctrinate, rouse, incite, or even silence listeners, has been used to advance agendas of power and protest. The essays included examine: music used to convey political ideology in Nazi Germany, apartheid-era South Africa, and modern-day North Korea postcolonial musical efforts to reclaim ethnic heritage in Serbia and the Caribbean music as a means of establishing new cultural identities for recently empowered social groups in the UK and Brazil the subversion of racial stereotypes through popular music in the USA music as a tool of popular resistance to oppressive government policies in modern day Iran and the Bolivian Andes
