Uncover never-before-told stories in this epic tale of self-discovery by a Rock n Roll disciple and member of the E Street Band. What story begins in a bedroom in suburban New Jersey in the early '60s, unfolds on some of the country's largest stages, and then ranges across the globe, demonstrating over and over again how Rock and Roll has the power to change the world for the better? This story. The first true heartbeat of Unrequited Infatuations is the moment when Stevie Van Zandt trades in his devotion to the Baptist religion for an obsession with Rock and Roll. Groups like the Beatles and the Rolling Stones created new ideas of

community, creative risk, and principled rebellion. They changed him forever. While still a teenager, he met Bruce Springsteen, a like-minded outcast/true believer who became one of his most important friends and bandmates. As Miami Steve, Van Zandt anchored the E Street Band as they conquered the Rock and Roll world. And then, in the early '80s, Van Zandt stepped away from E Street to embark on his own odyssey. He refashioned himself as Little Steven, a political songwriter and performer, fell in love with Maureen Santoro who greatly expanded his artistic palette, and visited the world's hot spots as an artist/journalist to not just better understand them, but to help change them. Most famously, he masterminded the recording of "Sun City," an anti-apartheid anthem that sped the demise of South Africa's institutionalized racism and helped get Nelson Mandela out of prison. By the '90s, Van Zandt had lived at least two lives—one as a mainstream rocker, one as a hardcore activist. It was time for a third. David Chase invited Van Zandt to be a part of his new television show, the Sopranos—as Silvio Dante, he was the unconditionally loyal consiglieri who sat at the right hand of Tony Soprano (a relationship that oddly mirrored his real-life relationship with Bruce Springsteen). Underlying all of Van Zandt's various incarnations was a devotion to preserving the centrality of the arts, especially the endangered species of Rock. In the twenty-first century, Van Zandt founded a groundbreaking radio show (Little Steven's Underground Garage), created the first two 24/7 branded music channels on SiriusXM (Underground Garage and Outlaw Country), started a fiercely independent record label (Wicked Cool), and developed a curriculum to teach students of all ages through the medium of music history. He also rejoined the E Street Band for what has now been a twenty-year victory lap. ?Unrequited Infatuations chronicles the twists and turns of Stevie Van Zandt's always surprising life. It is more than just

the testimony of a globe-trotting nomad, more than the story of a groundbreaking activist, more than the odyssey of a spiritual seeker, and more than a master class in rock and roll (not to mention a dozen other crafts). It's the best book of its kind because it's the only book of its kind.

People use online social forums for all sorts of reasons, including political conversations, regardless of the site's main purpose. But what leads some of these people to take their online political activity into the offline world of activism? In *Expect Us*, Jessica L. Beyer looks at political consciousness and action in four communities, each born out of chaotic online social spaces that millions of individuals enter, spend time in, and exit moment by moment: Anonymous (4chan), IGN, World of Warcraft, and The Pirate Bay. None of these sites began as places for political organization per se, but visitors to each have used them as places for political engagement to one degree or another. Beyer explains the puzzling emergence of political engagement in these disparate social spaces and offers reasons for their varied capacity to generate political activism. Her comparative ethnography of these four online communities demonstrates that the technological organization of space itself has a strong role in determining the possibility of political mobilization. Overall, she shows that political mobilization rises when a site provides high levels of anonymity, low levels of formal regulation, and minimal access to small-group interaction. Furthermore, her findings reveal that young people are more politically involved than much of the civic engagement literature suggests. *Expect Us* offers surprising and compelling insights for anyone interested in understanding which factors and online environments lead to the greatest amount of impact offline. Seven years ago, and seven miles below the surface of the Pacific Ocean, Dr. Jonas Taylor encountered something that changed the course of his life. Once a Navy deep-sea submersible pilot, now a marine paleontologist, Taylor is convinced that a remnant population of Carcharodon megalodon prehistoric sharks growing up to 70 feet long, that subsisted on whales lurks at the bottom of the Mariana Trench. When offered the opportunity to return to those crushing depths in search of the Megs, Taylor leaps at the chance... but the quest for scientific knowledge (and personal vindication) becomes a desperate fight for survival, when the most vicious predator that the earth has ever known is freed to once-again hunt the surface.

Images have never been as freely circulated as they are today. They have also never been so tightly controlled. As with the birth of photography, digital reproduction has created new possibilities for the duplication and consumption of images, offering greater dissemination and access. But digital reproduction has also stoked new anxieties concerning authenticity and ownership. From this contemporary vantage point, *After Uniqueness* traces the ambivalence of reproducibility through the intersecting histories of experimental cinema and the moving image in art, examining how artists, filmmakers, and theorists have found in the copy a utopian promise or a dangerous inauthenticity—or both at once. From the sale of film in limited editions on the art market to the downloading of bootlegs, from the singularity of live cinema to video art broadcast on television, Erika Balsom investigates how the reproducibility of the moving image has been embraced, rejected, and negotiated by major figures including Stan Brakhage, Leo Castelli, and Gregory Markopoulos. Through a comparative analysis of selected distribution models and key case studies, she demonstrates how the question of image circulation is central to the history of film and video art. *After Uniqueness* shows that distribution channels are more than neutral pathways; they determine how we encounter, interpret, and write the history of the moving image as an art form.

Beginning with a brief outline of Usenet's general structure and development over the past few years, the book addresses the problems of exploring virtual communities and distributed information systems in general, and of finding information in electronic information environments. It covers traditional approaches such as information filtering, collaborative filtering and information

retrieval, outlining their successes and failures, and discusses the prospects of novel approaches such as visualisations of social processes and social navigation.

The Best American Magazine Writing 2020 brings together outstanding writing, from in-depth reporting to incisive criticism. The anthology features excerpts from major projects that challenge American certitudes: the Washington Post Magazine's "Prison" issue, detailing the scope of mass incarceration, and the New York Times Magazine's "The 1619 Project," which recenters the nation's history around slavery and its legacies. It includes extraordinary globe-spanning journalism, including pieces on the genocide against the Rohingya (New York Times Magazine) and the unintended consequences of a dengue fever vaccine (Fortune). Pamela Colloff details prosecutors' reliance on an untrustworthy jailhouse informant (New York Times Magazine in partnership with ProPublica), and a ProPublica series investigates the disaster that befell the USS Fitzgerald. The anthology showcases the work of remarkable stylists, including Jia Tolentino's cultural commentary (New Yorker) and Ligaya Mishan's columns on food and culture (T: The New York Times Style Magazine). Columns by s.e. smith consider disability (Catapult), and the DeafBlind poet John Lee Clark writes about art he can touch (Poetry). Jordan Kisner visits a Martha

Washington-themed debutante ball in Texas near the Mexican border for *The Believer*, and Jacob Baynham offers a moving portrait of his father-in-law (Georgia Review). Arundhati Roy excoriates the increasing authoritarianism of Modi's India (The Nation in partnership with Type Media Center). The anthology concludes with Jonathan Escoffery's short story of homesickness for Jamaica, "Under the Ackee Tree" (Paris Review).

The gripping untold story of the music piracy revolution and the man who almost singlehandedly brought down the industry *How Music Got Free* is the incredible true story of Dell Glover, a factory worker at a compact-disc manufacturing plant who brought the music industry to its knees. Working from a small town in North Carolina, Glover was the Patient Zero of music piracy, leaking thousands of albums from the plant over nearly a decade. If you've ever pirated music? or even borrowed it? Glover's handiwork is on your hard drive. But Glover couldn't do it alone. He needed the help of his smuggling confederates, who conducted a years-long campaign of infiltration into the music industry's global supply chain. He needed the help of the men who invented the mp3, a group of academics working in a forgotten audio laboratory in Germany. He needed the help of the torrenters, who, from dormitories and bedrooms across the planet, built distribution networks for his leaks. Most of all, he needed the unwitting assistance of the music industry itself, and the powerful music executive whose strategy of

consolidation brought the biggest musical acts of the decade into Glover's reach. An irresistible story of greed, cunning, brilliance, and deceit, *How Music Got Free* isn't just a story of the music industry—it's a must-read history of the Internet itself. Collects *Star Wars: Vader - Dark Visions #1-5*. Who is Darth Vader? He has been many things: enforcer, commander, destroyer. He is, to many throughout the Galactic Empire, the ultimate symbol of power and fear. But there are those who have seen the Dark Lord in a different light. Some corners of the galaxy are so desperate that even Vader can be a knight in shining armor - while for certain Imperial Commanders, Vader's anger is the price of failure. But what is it like to lose your heart to a Sith Lord - and what fate awaits the star-crossed lover who has fallen for a man so unattainable? Plus, learn how it feels to be an X-wing pilot going head-to-head with Vader's TIE Fighter - and discover more of the many sides of the galaxy's greatest villain!

How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era

and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Give Me A Couple Of Hours And I'll Turn You Into An Internet Wizard! There are other internet secrets books and they work as excellent paperweights and have some therapeutic benefits, too: you can use them to put you to sleep. This book is not to be equated with all those boring-as-all-hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about the internet? You probably know more about Bangladesh (which ain't much, right?) than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO marketing. I can hear you from here: "Basic competence is good enough for me. Why would I want or need to do more than that?" You can use the Google or Bing search engine (but lazily, not with any genuine optimization), get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won

out, we'd still believe the world is flat and airplane flight is impossible. Do you really need to be told that the internet is one of those things you cannot afford to be complacent about? Your livelihood, your identity, your social networks, your ability to distinguish yourself from the competition will all one day be measured by the breadth and depth of your internet skills. Development of the web hasn't stood still. Should your skills? Who is CHROO? ... He's quite possibly the richest dog in the world, the ever-present Corona-swilling BFF to celebrity heiress Upferra Quiquis (pronounced "quickie"). Chroo's been everywhere, knows everyone, and (unusual for a Chihuahua) boasts an impressive track record with large-breed females. In this screwball literary fantasy, the fun starts when Upferra (who isn't the dumb blonde everyone thinks) finds out she's inheriting vastly more than the billions expected. It turns out her father was one of eight trillionaires controlling the world's economy by playing a strange, secretive Game. She's inherited his seat in this Game and it's now literally her move. The problem is, she doesn't care to play. So, she, Chroo, and an

ensemble cast of humans and animals work to take down the Game, thus restoring freedom to the entire world! CHROO brings readers along for a whirlwind global adventure. Those who like quirky tales will love the endless pop-culture and literary references, animal philosophy, and situational hijinks -- from the book's opening through its climax featuring an invasion of cross-dressing macaques (as told by a thespian cat in four pages of bona fide dactylic hexameter)! Who Would Enjoy Reading CHROO? Readers who enjoy well-crafted, literary prose; Readers who love plot-driven novels; Animal lovers -- especially dogs and cats (and perhaps most notably Chihuahua lovers); Those who appreciate humor, word-play, pop-culture and literary references, and a flirtation with meta-fiction at times; Readers who would appreciate a smart, complex female protagonist; Readers who might enjoy an ensemble-cast; Those who like quirky, mysterious, and adventurous tales with diverse international locations; Those who appreciate speculative, upmarket adult fantasy fiction (i.e., a world where a few select animals can talk to a few select humans, where the world run, in part, as a literal game, etc.). #weird #funny #chroo

First published in 1926, *The Torrents of Spring* is a hilarious parody of the Chicago school of literature. Poking fun at that “great race” of writers, it depicts a vogue that Hemingway himself refused to follow. In style and substance, *The Torrents of Spring* is a burlesque of Sherwood Anderson's *Dark Laughter*, but in the course of the narrative, other literary tendencies associated with American and British writers akin to Anderson—such as D. H. Lawrence, James Joyce, and John Dos Passos—come in for satirical comment. A highly entertaining story, *The Torrents of Spring* offers a rare glimpse into Hemingway's early career as a storyteller and stylist.

He has a darkness in his soul that he doesn't know if he can contain. She's smart as hell, or maybe she's actually from Hell.
