A new edition of the classic bestseller from the original authors, with additional material specifically prepared for Canadian readers by long-time This Morning CBC producer, Ira Basen, and Jane Farrow, the author of *Wanted Words*. In 1977, a publishing sensation was born. *The Book of Lists*, the first and best compendium of facts weirder than fiction, was published. Filled with intriguing information and must-talk-about trivia it has spawned many imitators — but none as addictive or successful. For nearly three decades since, the editors have been researching curious facts, unusual statistics and the incredible stories behind them. Now the most entertaining and informative of these have been brought together in a long-awaited, thoroughly up-to-date new edition that is also the first Canadian edition. Ira Basen and Jane Farrow have augmented the existing lists with fascinating homegrown material, and compiled lists specifically of relevance to Canadian readers. So if you've always wanted to find out how porcupines really mate, how comedy can kill and — that most essential piece of knowledge — how long the longest recorded nose was, this is the book for you. With contributions from a variety of celebrities and experts including Margaret Atwood, Mike Myers, Michael Ondaatje, Dave Eggers, Phillip Pullman and Charlotte Gray, this anthology has something for everyone — and more than you ever suspected you wanted to know. A list of lists from *The Book of Lists*: 10 Notable Film Scenes Left on the Cutting Room Floor 10 Afflictions and Their Patron Saints 14 Nations with More Sheep Than People 5 Trips to the Canadian Wilderness That Ended in Disaster 10 Really Bad Canadian Sports Teams 14 Last Words of Famous Canadians Kurt Browning's 9 Turning Points in Figure Skating History 7 Trial Verdicts That Caused Riots 12 Museums of Limited Appeal 10 Unusual Canadian Place Names That Start with a "B" 7 Well-Known Sayings Attributed to the Wrong Person 10 Celebrated People Who Read Their Own Obituaries Sloan's Jay Ferguson's 10 Perfect Pop Songs 13 Possible Sites for the Garden of Eden 9 Canadian Sports Stars Who Became Politicians First Sexual Encounters of 13 Prominent Canadians

On a day when everything goes wrong for him, Alexander is consoled by the thought that other people have bad days too. A celebration of failures, doom, disaster, mistakes, miscalculations, hubris, folly and really, really bad albums. Written by the author of the cult hit, *Crap Towns*. Most books celebrate the exceptions rather than the rule. They focus on the over-achievers, the unique and strange success stories. They don't provide a fair reflection of the general tide of history - but they do make your average reader feel, well, more average. *The 10 Worst of Everything* redresses this imbalance and shows that you maybe shouldn't take it too badly if your own plans aren't working out. And there's nearly always someone worse off than you. Which is reassuring, if nothing else. This is a fascinating compendium of disappointing facts about the world, vital information about places to avoid, mind-boggling information about medicine, history and science, pop culture misses, as well as all the daft things we do to each other. It will help to prove the old adage that you can always learn more from failure than you can from success. And hey, even if you don't want to boost your brain, there's still the fun of watching other people go wrong.

A collection of jokes and riddles for every aspect of summer, from the beach to camp to the baseball diamond.

National Book Award Finalist A clear-sighted revelation, a deep penetration into the world of Scientology by the Pulitzer Prize-winning author of *The Looming Tower*, the now-classic study of al-Qaeda’s 9/11 attack. Based on more than two hundred personal interviews with current and former Scientologists—both famous and less well known—and years of archival research, Lawrence Wright uses his extraordinary investigative ability to uncover for us the inner workings of the Church of Scientology. At the book’s center, two men whom Wright brings vividly to life, showing how they have made Scientology what it is today: The darkly brilliant science-fiction writer L. Ron Hubbard, whose restless, expansive mind invented a new religion. And his successor, David Miscavige—tough and driven, with the unenviable task of preserving the church after the death of Hubbard. We learn about Scientology’s complicated cosmology and special language. We see the ways in which the church pursues celebrities, such as Tom Cruise and John Travolta, and how such stars are used to advance the church’s goals. And we meet the young idealists who have joined the Sea Org, the church’s clergy, signing up with a billion-year contract. In *Going Clear*, Wright examines what fundamentally makes a religion a religion, and whether Scientology is, in fact, deserving of this constitutional protection. Employing all his exceptional journalistic skills of observation, understanding, and shaping a story into a compelling narrative, Lawrence Wright has given us an evenhanded yet keenly incisive book that reveals the very essence of what makes Scientology the institution it is.

“With . . . evidence from recent genetic and anthropological research, [Zuk] offers a dose of paleoreality.”—Erin Wayman, *Science News* We evolved to eat berries rather than bagels, to live in mud huts rather than condos, to sprint barefoot rather than play football—or did we? Are our bodies and brains truly at odds with modern life? Although it may seem as though we have barely had time to shed our hunter-gatherer legacy, biologist Marlene Zuk reveals that the story is not so simple. Popular theories about how our ancestors lived—and why we should emulate them—are often based on speculation, not scientific evidence. Armed with a razor-sharp wit and brilliant, eye-opening research, Zuk takes us to the cutting edge of biology to show that evolution can work much faster than was previously realized, meaning that we are not biologically the same as our caveman ancestors. Contrary to what the glossy magazines would have us believe, we do not enjoy potato chips because they crunch just like the insects our forebears snacked on. And women don’t go into shoe-shopping frenzies because their prehistoric foremothers gathered resources for their clans. As Zuk compellingly argues, such beliefs incorrectly assume that we’re stuck—finished evolving—and have been for tens of thousands of years. She draws on fascinating evidence that examines everything from adults’ ability to drink milk to the texture of

our ear wax to show that we've actually never stopped evolving. Our nostalgic visions of an ideal evolutionary past in which we ate, lived, and reproduced as we were "meant to" fail to recognize that we were never perfectly suited to our environment. Evolution is about change, and every organism is full of trade-offs. From debunking the caveman diet to unraveling gender stereotypes, Zuk delivers an engrossing analysis of widespread paleofantasies and the scientific evidence that undermines them, all the while broadening our understanding of our origins and what they can really tell us about our present and our future. Drawing on their work on performance management within the 'beyond budgeting' movement over the past ten years, including many interviews and case studies, Jeremy Hope, Peter Bunce and Franz Rössli set out in this book an executive guide to building a new management model based on eight key change management issues: 1. Governance: From rules and budgets to purpose and values 2. Success: From fixed targets to relative improvement 3. Organization: From centralized functions to customer-oriented teams 4. Accountability: From narrow targets to holistic success criteria 5. Trust: From central control to local autonomy 6. Transparency: From closed information to open book management 7. Rewards: From individual incentives to team-based reward 8. Risk: From complying with rules to understanding pressure points This book is about rethinking how we manage organizations in a post-industrial, post credit crunch world where innovative management models represent the only remaining source of sustainable competitive advantage.[i] The changes suggested by the authors will enable and encourage a cultural climate change that will help organizations to attract and keep the best people as well as drive continuous innovation and growth. Above all, The CEO's Dilemma is about learning how to change business - based on best practice and innovation drawn from leaders world-wide who have built and managed successful organizations.

Turtle Croakies: Naida's old mentor, Alice Parker is back, and she's brought a problem with her. A big one. One that's already testing the sprite's ability to keep it in lettuce and strawberries. Love Croakies: Banshee bunions! As if Naida didn't already have enough trouble with her love life. Now she has to save someone else from dying of love. Piped Croakies: Just when Naida thought her life couldn't get any weirder, life upped the strangeness quota to a never-before-seen level. When a long line of critters, dazed and seemingly oblivious, marched past Croakies, Naida knew she had a situation on her hands.

Winner of the National Book Award, the long-awaited novel from the author of the acclaimed collection, *Jenny and the Jaws of Life*, is an unusual and wonderful novel that is somehow able to be at once bleak and hilarious, light-hearted and profound. It's the story of two sisters. Abigail Mather is a woman of enormous appetites, sexual and otherwise. Her fraternal twin Dorcas couldn't be more different: she gave up on sex without once trying it, and she lives a controlled, dignified life of the mind. Though Abigail exasperates Dorcas, the two love each other; in fact, they complete each other. They are an odd pair, set down in an odd Rhode Island town, where everyone has a story to tell, and writers, both published and unpublished, carom off each other like billiard balls. What is it that makes the two women targets for the new man in town, the charming schlockmeister Conrad Lowe, tall, whippet-thin and predatory? In Abigail and Dorcas he sees a new and tantalizing challenge. Not the mere conquest of Abigail, with her easy reputation, but a longer and more sinister game. A game that will lead to betrayal, shame and, ultimately, murder. In her darkly comic and unsettling first novel, *Jincy Willett* proves that she is a true find: that rare writer who can explore the shadowy side of human nature with the lightest of touches.

Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history.

Regine’s blog about living with Leukemia gained a huge following, and eventually became this book. She writes openly about emotional and physical aspects of her 15-month struggle to recover, and explains how her disease impacts her life. In the course of her illness, Regine has photography exhibits, goes to concerts, enjoys her friends ? and the lessons she learned have relevance for all of us. She died at home on December 3, 2009 with her family and cat by her side.

“Emily Oster is the non-judgmental girlfriend holding our hand and guiding us through pregnancy and motherhood. She has done the work to get us the hard facts in a soft, understandable way.” —Amy Schumer \*Fully Revised and Updated for 2021\* What to Expect When You're Expecting meets Freakonomics: an award-winning economist disproves standard recommendations about pregnancy to empower women while they're expecting. From the author of Cribsheet and The Family Firm, a data-driven decision making guide to the early years of parenting Pregnancy—unquestionably one of the most profound, meaningful experiences of adulthood—can reduce otherwise intelligent women to, well, babies. Pregnant women are told to avoid cold cuts, sushi, alcohol, and coffee without ever being told why these are forbidden. Rules for prenatal testing are similarly unexplained. Moms-to-be desperately want a resource that empowers them to make their own right choices. When award-winning economist Emily Oster was a mom-to-be herself, she evaluated the data behind the accepted rules of pregnancy, and discovered that most are often misguided and some are just flat-out wrong. Debunking myths and explaining everything from the real effects of caffeine to the surprising dangers of gardening, Expecting Better is the book for every pregnant woman who wants to enjoy a healthy and relaxed pregnancy—and the occasional glass of wine.

A whimsical collection of essays traces the author's haphazard experiences as a Southern debutante who after a youth of boarding schools and shrimp forks transitioned to New York living, where she hid her genteel upbringing and learned the skills of a hipster. Original.

Most programming languages contain good and bad parts, but JavaScript has more than its share of the bad, having been developed and released in a hurry before it could be refined. This authoritative book scrapes away these bad features to reveal a subset of JavaScript that's more reliable, readable, and maintainable than the language as a whole—a subset you can use to create truly extensible and efficient code. Considered the JavaScript expert by many people in the development community, author

Douglas Crockford identifies the abundance of good ideas that make JavaScript an outstanding object-oriented programming language—ideas such as functions, loose typing, dynamic objects, and an expressive object literal notation. Unfortunately, these good ideas are mixed in with bad and downright awful ideas, like a programming model based on global variables. When Java applets failed, JavaScript became the language of the Web by default, making its popularity almost completely independent of its qualities as a programming language. In *JavaScript: The Good Parts*, Crockford finally digs through the steaming pile of good intentions and blunders to give you a detailed look at all the genuinely elegant parts of JavaScript, including: Syntax Objects Functions Inheritance Arrays Regular expressions Methods Style Beautiful features The real beauty? As you move ahead with the subset of JavaScript that this book presents, you'll also sidestep the need to unlearn all the bad parts. Of course, if you want to find out more about the bad parts and how to use them badly, simply consult any other JavaScript book. With *JavaScript: The Good Parts*, you'll discover a beautiful, elegant, lightweight and highly expressive language that lets you create effective code, whether you're managing object libraries or just trying to get Ajax to run fast. If you develop sites or applications for the Web, this book is an absolute must.

A little boy has a series of adventures and misadventures with a bunch of wild animals.

A humorous look at what happens when taxidermy goes terribly wrong, by the founder of the hit website [crappytaxidermy.com](http://crappytaxidermy.com). A relaxed toad enjoying a smoke and a brew. A cat with eerily flexible front legs. A smiling lion with receding gums. Whether you choose to laugh or cringe at these spectacularly bad attempts at taxidermy, you won't be able to tear your eyes away from the curiosities inside. This volume brings together the very best of the worst (along with a DIY "Stuff Your Own Mouse" lesson by an Insect Preparator from the American Museum of Natural History), showcasing the most perverse yet imaginative anatomical reconstructions of the animal kingdom you'll ever see.

A hilarious picture book about surviving the school bus and the first day of school. \* "Outrageously humorous." --School Library Journal, starred review \* "Worthy of being shelved next to Jon Scieszka's funniest." --Kirkus Reviews, starred review Kyle is dreading his first trip on the school bus. Luckily, his big brother, James, is a school-bus expert. James gives Kyle ten rules for riding the bus that he absolutely, positively must obey if he wants to avoid getting laughed at, yelled at, pushed around, or even pounded. On his fateful first ride, Kyle struggles to remember and follow each of his brother's rules, but along the way, he learns the school bus isn't so bad after all--and he may even have a thing or two to teach his brother.

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, *The Absolutely True Diary of a Part-Time Indian*, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color

interior art throughout, this edition is perfect for fans and collectors alike.

John Lister is one of Britain's most respected wrestling journalists. Mixing travelogue, humour, fiction, history and opinion, this collection brings together the best of his work from the past fourteen years. The first section of this book features three epic accounts of voyages to see wrestling in the United States, from the ECW Arena to the Dallas Sportatorium by way of WWF pay-per-views and Memphis television. The second section comprises more than 40 articles, some previously unpublished, including histories of British and American wrestling, the statistics behind WCW's collapse, and a disgraceful allegation about Tommy Rich. Note: This is a revised 2nd edition, with a new cover design, new page design, lower page count and a lower retail price. However, the content of the book is unchanged from the first edition.
