Alice Jenkins is the worst girlfriend in the world according to the many, many boys who've shimmied up lampposts and shoplifted from New Look to impress her, only to be dumped when she gets bored of them. Alice has a very low boredom threshold. But she never gets bored with Franny, her best friend since they met at nursery school. Friends are for ever. Ain't nothing going to come between them. Girls rule, boys drool is their motto. Well, it's Alice's motto, Franny doesn't have much time for boys; they're all totes immature and only interested in one thing. But then there's Louis Allen, lead singer of Thee Desperadoes, the best band in Merrycliffe-on-sea (though that could be because they're the only band in Merrycliffe-on-sea). He's a tousle-haired, skinny-jeaned, sultry-eyed manchild, the closest thing that Franny's ever seen to the hipsters that she's read about on the internet and she's been crushing on him HARD for the last three years. She's never worked up the courage to actually speak to him but she's sure on some deeper level that goes beyond mere words, Louis absolutely knows that she's his soulmate. He just doesn't know that he knows it yet. It's why he cops off with so many other girls. So, when Alice, bored with callow youths, sets her sights on Louis it threatens to tear the girls' friendship apart, even though they're better than fighting over a boy. They strike

a devil's deal - may the best girl win. Best friends become bitter rivals and everything comes to an explosive conclusion on their first trip to London. Can true friendship conquer all?

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and

coupes, cabriolets and convertibles with particular emphasis on quality evaluation, maintenance and upgrades. Jaguar XJS takes the reader through the 20-year history of a model series which, after a lukewarm reception in 1975 by Jaguar enthusiasts who expected a replacement for the famed E-Type, matured through many evolutions into some of the most stylish cars ever to wear the Jaguar badge, earning along the way an enviable reputation on the international motor racing scene.

"Packed with spine-tingling intrigue and swoonworthy romance, the plot thickens in this YA fantasy from Amazon bestselling author, Rachel Morgan..." Guardian trainee Violet Fairdale is just weeks away from one of the most important occasions of her life: graduation. After messing up big time by bringing a human into the fae realm, Vi needs to step up her game and forget about Nate if she hopes to graduate as the top guardian of her year. Everything would be fine if she wasn't forced to partner with Ryn, her ex-friend, ex-enemy, current 'sort of friend'. They might be trying to patch up their relationship, but does she really want to spend a week undercover with him for their final assignment? On top of that, the possibly insane Unseelie Prince is still on the loose, free to 'collect' as many specially talented faeries as he can find-and Vi is still at the top of his list. Add in faerie queens, enchanted storms, complicated not-just-friends feelings, and a murder within the Guild itself, and graduation is about to become the least of Vi's problems.

Trent, the Catholic Church's attempt to put its house in order after the Reformation, has long been praised and blamed for things it never did. This one-volume history, the first in modern times, explores the volatile issues that pushed several Holy Roman emperors, kings and queens of France, five popes, and all of Europe to the brink of disaster.

The call for environmentally compatible and economical vehicles necessitates immense efforts to develop innovative engine concepts. Technical concepts such as gasoline direct injection helped to save fuel up to 20 % and reduce CO₂-emissions. Descriptions of the cylinder-charge control, fuel injection, ignition and catalytic emission-control systems provides comprehensive overview of today 's gasoline engines. This book also describes emission-control systems and explains the diagnostic systems. The publication provides information on engine-management-systems and emission-control
