Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

For enthusiasts reading magazines such as Motor Trend, Road & Track, and others, David Kimble is no stranger. His brilliant cutaway artwork has been gracing the pages of those publications for years. Whether he illustrated engines, transmissions, full-car chassis, sports cars, race cars, or classics, his cutaway artwork revealed, in excruciating detail, things that a camera lens could never capture. In David Kimble's Cutaways: The Techniques and the Stories Behind the Art, Kimble reveals the secrets, techniques, procedures, and the dedication to craft that is required to produce these amazing illustrations. He covers the step-by-step procedures while producing fresh artwork for this book featuring a McLaren Can-Am car as well as a vintage Harley-Davidson. Also included are the stories and tales of how it all started, traveling the world to illustrate cars, behind the scenes with manufacturers, the Corvette years, as well as a gallery of many illustrations.
