Robotics is undergoing a major transformation in scope and dimension. From a largely dominant industrial focus, robotics is rapidly expanding into human environments and vigorously engaged in its new challenges. Interacting with, assisting, serving, and exploring with humans, the emerging robots will increasingly touch people and their lives. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The Springer Tracts in Advanced Robotics (STAR) is devoted to bringing to the research community the latest advances in the robotics field on the basis of their significance and quality. Through a wide and timely dissemination of critical research developments in robotics, our objective with this series is to promote more exchanges and collaborations among the researchers in the community and contribute to further advancements in this rapidly growing field.

Every person has a story, a personal narrative that informs their life, their decisions, and their way of thinking. But did you know that it also affects the wiring of your brain? Renowned psychiatrist and professor at Harvard Medical School John Sharp, M.D., offers an eight-step process to discovering your unconscious narrative and using your new insight to eradicate the "false truth" that has been at the core of your self-sabotage. His unique approach integrates four core domains of applied psychology—control mastery theory, attachment theory, narrative therapy, and positive psychology—with his own research and professional experience to construct an insightful and soul-searching path to insight. Throughout his step-by-step process, Dr. Sharp provides:

- The "Sharp Focus" to distill and emphasize important concepts
- Quizzes to help you analyze your internal and external tendencies
- "First Impressions" case studies from his professional practice
- Awareness, insight, change, and narrative tools to facilitate your transformation
- "Gut Checks" to help you figure out if you are ready to move on to the next step in the process

Dr. Sharp's approach is simple and accessible, with the power to

A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. Lexus: The Relentless Pursuit reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue Covers the racetrack triumph—and tragedy—behind the new US\$375,000 Lexus LFA supercar Offers important business lessons for brand managers and executives For car enthusiasts, business leaders, and anyone interested in branding and marketing, Lexus: The Relentless Pursuit offers an amazing story of excellence and innovation in the automotive industry.

The Industrial Revolution began in America in Pawtucket, Rhode Island at the Slater Mill in 1793 where water power was first harnessed for factory work , and

where Sam Patch went to work as a child early in the 19th Century. Very little is known of the real man, except that he began leaping from the roof of the mill into the Blackstone River and after that there was no stopping him as he jumped from ships' masts, bridges, and over cataracts, including Niagara Falls. This novel places him at a time of early American expansion to the West, when the Erie Canal first opened, and imagines his life in the mills, his heroic dreams of wealth and fame, his love for a Native American woman, and his inexorable rush to an early and spectacular death.

120 - audit starter. Tension and intermediate rollers. Changing the rear disc brake pad and do an audit of the fingers in the brackets. Eliminating vibration in the front brakes. Replacement of the fuel filter. Replacing the cabin filter. Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were ‘just too many rivers and too few roads’. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, ‘First Overland’, is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, “smart highways” designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. *Our Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. “An important book that shows the dawn of a new kind of

environmental movement?an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us.” —Katie Patrick, author of How to Save the World

The first Land Cruiser appeared at about the same time as the Land-Rover. Styling changes occurred in 1952 with the modern range designated F25s and F28s. The FJ43 appeared in the mid-1960s, the 40 and 45 Series in Australia in 1967/8. The FJ55 was introduced in 1969, the 43 series continued to be made in Japan and the 40 and 45 Series had improvements made throughout the 1970s. Production of the FJ55 ceased in 1980 to be followed by the Series 60. This was only available with an in-line, six-cylinder engine of 3980cc. A generous five-seater, and good load carrier, there were few changes made to it after production commenced. This is a book of contemporary road & comparison tests, new model introductions, technical & specification data, driving impressions, of road tests, long-term reports, buying second hand. Models covered include:- FWD Pick-up, Station Wagon, LX, De Luxe, Diesel.
