Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

In this hilarious collection of old car stories, Canada's very own "Old Car Detective" Bill Sherk presents 80 of his favourite stories from all 10 provinces, spanning the years from 1925 to 1965. In this book you will meet the man in New Brunswick who chopped the top off his 1927 Whippet sedan in honour of the coronation of Queen Elizabeth II; the young fellow from Kingston, Ontario, who thought his 1937 Ford coach looked better with all four fenders taken off; the owner of a 1947 Hudson that burned so much oil he had to wear a snorkel mask while driving it; the father who borrowed his son's hot-rodded '53 Monarch (built only in Canada!) and got pulled over by the police for street racing; and the grandmother who moved from England to Canada and drove her Morris Minor on the wrong side of the road. Behind every old car there's a story waiting to be told, all the way from your grandparents' Model T Ford to the Mustang you drove in high school. All the stories and photographs in this book are in chronological order from 1925 to 1965, giving you a 40-year journey through Canada's rich automotive heritage and brought to life by the people who owned and drove the cars of yesteryear – and some still do! PART ONE (1925 to 1942) takes you from the middle of the Roaring Twenties to February 1942, when the Second World War brought automobile production to a halt for three long years. PART TWO (1946 to 1965) takes you through the Baby Boom years when cars driven by Canadians went through many exciting changes in styling and engineering. If you have ever owned (or still own) a car that was built between 1925 and 1965, turn to the last page in this book to see how you can send in your story for Bill Sherk's next book.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital
