The true story of the man with the Best Job in the World The Best Job in the World is the story of how following your passions can lead to life-changing opportunities. Adventurer Ben Southall shares his experiences and lessons learned as the winner of the inaugural Tourism Queensland's Best Job in the World campaign, and reveals how this has led to ongoing opportunities since. Part autobiography, part insight into the power of a unique marketing campaign, this book follows Ben's journey—from leaving the UK on his own expedition around Africa to his new role as caretaker of Hamilton Island on the Great Barrier Reef. You'll learn about the skills and experiences that shaped Ben's path, together with the inevitable pitfalls that he faced along the way to living his dream. The sole winner of the Best Job in the World campaign, Ben's perspective is a unique one to share the serious challenges that arose from being catapulted into a high profile job in an idyllic location. Humorous and poignant, the story is as much holistic life guide as travel guide, providing a motivational and inspirational tale that may just be the push you need to: Get inspired—see the opportunities around you and grab them with both hands Embrace the unknown, overcome life's obstacles and challenge expectations Live out your dreams and be your authentic self Climb out of the rut and take part in the world around you In The Best Job in the World, Ben Southall answers the questions everyone is asking: "What is it like? Is it really the best job in the world?" You'll learn how to transform your interests and passions into a flexible, long-term career, and how following the road less travelled can lead to living your best life. If you're dissatisfied, stuck in a rut or merely curious, The Best Job in the World is a must-read tale of aspiration, inspiration and motivation.

This book addresses the need for tests that can diagnose the strengths and weaknesses in learners' developing foreign language proficiency. It presents the rationale for, and research surrounding, the development of DIALANG, a suite of internet-delivered diagnostic foreign language tests funded by the European Commission. The word 'diagnosis' is common in discussions in language education and applied linguistics, but very few truly diagnostic tests exist. However, the diagnosis of foreign language proficiency is central to helping learners make progress. This volume explores the nature of diagnostic testing, emphasizing the need for a better understanding of the nature of appropriate diagnosis. The book starts with a debate about how diagnostic testing might most appropriately be developed. Charles Alderson argues that the field has neglected to construct diagnostic tests, partly because other forms of testing have dominated the field. Alderson examines how proficiency has been diagnosed in the key areas of language: reading, listening, writing, grammar and vocabulary. The value of self-assessment is discussed and exemplified as a key component in developing learners', and teachers', awareness of the complexity of language learning. The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency.

**NATIONAL BESTSELLER** • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
