Tresch and Aronow's Cardiovascular Disease in the Elderly, Fifth Edition Wilbert S. Aronow, Jerome L. Fleg, Michael W. Rich, 2013-09-04 With advances and breakthroughs in modern medicine that are allowing people to live longer, the number of older adults will continue to grow exponentially over the next several decades. Cardiologists, geriatricians, and other clinicians caring for the elderly will require—at the very least—a basic understanding of cardiovascular disorders that commonly affect the older patient. In the fifth edition of Tresch and Aronow's Cardiovascular Disease in the Elderly, each chapter has been thoroughly updated to provide a comprehensive, yet accessible overview of the epidemiology, pathophysiology, evaluation, and treatment of cardiovascular disorders in older adults. The book spans topics such as aging changes in the cardiovascular system, risk factors and epidemiology for coronary artery disease, valvular heart disease, cardiomyopathies and heart failure, arrhythmias, cerebrovascular disease, and other miscellaneous subjects. The contributors supply evidence-based recommendations with strong emphasis on new research findings. New to the Fifth Edition: Numerous chapters comprehensively revised with new authors and/or co-authors Summaries at the beginning of each chapter to facilitate easy reading Discussion of the use of new antithrombotic agents in older adults Important references in the bibliography highlighted for simplified access With contributions from recognized experts in the field, this classic work continues to serve as the premier source on the evaluation and management of cardiovascular disorders in older adults.

Gerontological Nursing: Competencies for Care Kristen L. Mauk, 2010-10-25 Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. *Gerontological Nursing: Competencies for Care, Second Edition* is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

The Pericardium David H. Spodick, 1996-10-25 Presents up-to-date coverage of the pericardium in health and medical and surgical disease, integrating recent advances in understanding normal and abnormal pericardial physiology and immunology, acute and chronic pericarditis, effusion and tamponade, and imaging methods for effusion and constriction. Incorporates clinical, hemodynamic, investigative, and experimental work conducted by leading interdisciplinary researchers--including never-before-published reports--on the normal and diseased pericardium.

Home Blood Pressure Monitoring George S. Stergiou, Gianfranco Parati, Giuseppe Mancia, 2019-10-31 Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

Cardiovascular Disease in the Elderly Patient Donald D. Tresch, Wilbert S. Aronow, 1994 Provides physicians involved in the care of elderly patients--family physicians, internists, cardiologists, surgeons, residents, and students--with an understanding of the pathophysiology of cardiac disorders in this age group; demonstrates the usual and atypical presentations of these disorders; and presents a logical approach to the treatment of elderly patients with such disorders. Special attention is given to how the disorders pertain to elderly patients and to recognizing the differences in both clinical presentation and response to therapy, compared to younger patients. Pericardial Disease J. Soler-Soler,G. Permanyer,J. Sagristà-Sauleda,2012-12-06 In November 1986, I was invited to attend a symposium held in Barcelona on Diseases of the Pericardium. The course was directed by Dr. J. Soler-Soler, director of Cardiology at Hospital General Vall d'Hebron in Barcelona. During my brief but delightful visit to this institution, my appreciation of the depth and breadth of study into pericardial diseases, carried out by Dr. Soler and his group, grew into the conviction that these clinical investigators have accumulated a wealth of information concerning pericardial diseases, and that investigators and clinicians practicing in English speaking countries would greatly profit from ready access to the results of the clinical investigations into pericardial disease carried out in Barcelona. The proceedings of the Barcelona conference were published in a beautifully executed volume in the Spanish language edited by Dr. Soler and produced by Ediciones Doyma. Because I believe that this work should be brought to the attention of the English speaking scientific and clinical communities, I encouraged Dr. Soler to have the book translated into English. I knew that this task could be accomplished and that the book would be translated into good English without change of its content. My confidence was based upon a translation of my own book, *The Pericardium*, into Spanish undertaken by Dr. Permanyer, who is a contributor and co-editor of the present volume.
