Una storia travolgente, romantica e appassionante che attraversa tre generazioni e percorre mezzo mondo. La carriera di Emma, prima ballerina a Londra, è a rischio per un infortunio a un ginocchio. Costretta al riposo, trae un bilancio della sua vita, accorgendosi con amarezza d'aver inseguito la fama e il successo invece dell'amore e dell'appagamento. Tornata in Australia, viene a sapere della morte di sua nonna Beattie e della strana eredità che le ha lasciato... Wildflower Hill è un romanzo avvincente e d'atmosfera sulla possibilità di ripartire, sul ricostruire la propria vita credendo in se stessi, sulla possibilità di scoprire che la risposta a quello che si cerca potrebbe essere molto diversa da quanto si pensi... Ecco il secondo romanzo di Viola Di Grado, giovanissima autrice dello spettacolare Settanta acrilico trenta lana, libro-rivelazione del 2011 premiato con il Campiello Opera prima e grande successo in libreria con oltre ventimila copie vendute. In Cuore cavo Viola Di Grado racconta la storia di un suicidio, di ciò che lo precede e di quello che segue: la famiglia, l'amore, la solitudine, la voglia di vivere intensamente e, dopo la morte, la nostalgia, la frequentazione fantasmatica delle persone amate. Un romanzo dalla natura crudele che racconta la decomposizione dei corpi e la vita dell'anima dopo la morte, il rimpianto per il mondo e l'aldilà senza sensi, la solitudine dei morti e quella dei vivi. Cuore cavo è un romanzo devastante, coraggioso, sorretto da una scrittura stupenda per originalità e poesia. Dietro questa scrittura straordinaria, s'intuiscono la fatica e la sofferenza con cui l'autrice scava nelle sue vene per raccontarci la vita, e al termine della lettura non si può che esserle grati.

Figlio di un senatore romano, a soli ventidue anni Valerius Magno è diventato un potente generale. Da essere umano ha condotto campagne in Grecia, Gallia e Britannia. Ma adesso è un Cacciatore oscuro, e i suoi natali gli procurano l'odio e il rancore della maggior parte dei colleghi, che fanno di tutto per tenerlo lontano da Kyrian, Kell, Zarek e Zoe. La situazione è complicata, ma potrebbe peggiorare... Il pericolo, questa volta, ha fattezze sexy e si chiama Tabitha Devereaux. Tabby fa parte di una nuova generazione di Cacciatori che ha dimostrato il proprio valore senza rinunciare alla propria anima, e ha il potere dell'intuizione. Proprio per questo è l'unica che riesce ad avvertire le emozioni e la grande solitudine di Val, a capire che il suo atteggiamento altezzoso è soltanto una facciata, una difesa che ora Tabby intende abbattere... Ma non è il momento di innamorarsi, una sanguinosa battaglia è appena cominciata e ben presto lei e Valerius si troveranno a combattere fianco a fianco contro il demone più pericoloso di tutti, capace di tornare dal regno dei morti e mettere fuori combattimento persino il grande Acheron.

With full color throughout, this unique text provides an accessible yet rigorous introduction to the basic principles, technology, and applications of nanophotonics. It explains key physical concepts such as quantum confinement in semiconductors, light confinement in metal and dielectric nanostructures, and wave coupling in nanostructures, and describes how they can be applied in lighting sources, lasers, photonic circuitry, and photovoltaic systems. Readers will gain an intuitive insight into the commercial implementation of nanophotonic components, in both current and potential future devices, as well as challenges facing the field. The fundamentals of semiconductor optics, optical material properties, and light propagation are included, and new and emerging fields such as colloidal photonics, Si-based photonics, nanoplasmonics, and bioinspired photonics are all discussed. This is the 'go-to' guide for graduate students and researchers in electrical engineering who are interested in nanophotonics, and students taking nanophotonics courses.

Johan Harmenberg had left his native Sweden because he had "given up" on serious competitive fencing. But when he came to MIT, he met an innovative coach - the late Eric Sollee. Scribbling on a napkin in a Cambridge bar, Eric, Johan, and the other MIT fencers sketched the "Three Conjectures" of a new fencing paradigm" - a way to force a more skillful opponent to play your game. On his return to Sweden, Johan developed it into an art and a science, then put it into effect with a vengeance. Despite being snubbed by the Swedish authorities because of his unorthodox style, he won the World Championship in 1977 and the Olympic Gold Medal in 1980. In this groundbreaking book, Johan reveals his methods, showing how to can neutralize the superior technique of even the best classical fencers. Plus Olympic Silver Medalist Bjorne Vaggoe adds his personal application of the new paradigm and Geoff Pingree tells how it was applied with stunning success at MIT.

Solo un figlio può far nascere un papà. Io, come papà, sono nato un po' per volta scrivendo questo diario per raccontare a mia figlia come ci siamo trovati tra otto miliardi di persone, ma

legati da un filo che abbiamo riavvolto fino a lei. In un incontro con altre coppie adottive mi sono reso conto che a tutti noi mancava qualcosa che ci prendesse per mano e ci aiutasse a sorridere di fronte alle difficoltà di questa avventura chiamata adozione. Così ho iniziato a pubblicare il diario sui social network e pian piano in tanti lo hanno condiviso, perché in fondo queste parole appartengono a tutti, anche a te che stai leggendo, non importa se genitore o meno. Ciò che importa è che puoi prenderle da questo scaffale e portarle nel posto giusto: alle mamme non ancora mamme, ai papà non ancora papà e ai bambini che li aspettano per diventare finalmente figli.

From Argentina to Italy, the intense, metaphysical and poetic story of a gardener in love, by Italy's most prominent writer. "A man's life lasts as long as three horses. You have already buried the first." Somewhere along the coastline of Italy, a man passes his days in solitude and silence, tending a garden and reading books of travel and adventure. Through these simple routines he seeks to quiet the painful memories of the past: a life on the run from Argentina's Dirty War; a young bride 'disappeared' by the military; a terrifying escape through the wilds of Patagonia. Yet everywhere he turns, new life is pulsing, ready to awaken his senses, like the force that drives his fruit trees into bloom. People and events from the past and present migrate into patterns assigned by a metaphysical geometry. A woman of the world re-introduces him to love. An African day laborer teaches him the meaning of gratitude. In this intense narrative, every acute observation, every nuance, becomes a means of salvation. Using a language that is both gripping and contemplative, *Three Horses* is an unforgettable tale. Praise for *The Sea of Memory*: "Poetic . . . charged with anger and desire." -The New York Times Book Review "Alluring . . . shimmeringly lyrical." -Publishers Weekly From the Trade Paperback edition.

In the last few decades, Japanese popular culture productions have been consolidated as one of the most influential and profitable global industries. As a creative industry, Japanese Media-Mixes generate multimillion-dollar revenues, being a product of international synergies and the natural appeal of the characters and stories. The transnationalization of investment capital, diversification of themes and (sub)genres, underlying threat in the proliferation of illegal audiences, development of internet streaming technologies, and other new transformations in media-mix-based production models make the study of these products even more relevant today. In this way, manga (Japanese comics), anime (Japanese animation), and video games are not necessarily products designed for the national market. More than ever, it is necessary to reconcile national and transnational positions for the study of this cultural production. The present

volume includes contributions aligned to the analysis of Japanese popular culture flow from many perspectives (cultural studies, film, comic studies, sociology, etc.), although we have emphasized the relationships between manga, anime, and international audiences. The selected works include the following topics: • Studies on audiences—national and transnational case studies; • Fandom production and Otaku culture; • Cross-media and transmedia perspectives; • Theoretical perspectives on manga, anime, and media-mixes.

Today we are seeing a new form of blended learning: not only is technology enhancing the learning environment but formal and informal learning are combining and there is self- and peer-assessment of results. Open learning cultures are challenging the old and long-practiced methods used by educators and transforming learning into a more student-driven and independent activity, which uses online tools such as blogs, wikis or podcasts to connect resources, students and teachers in a novel way. While in higher education institutions most assessments are still tied to formal learning scenarios, teachers are more and more bound to recognize their students' informal learning processes and networks. This book will help teachers, lecturers and students to better understand how open learning landscapes work, how to define quality and create assessments in such environments, and how to apply these new measures. To this end, Ehlers first elaborates the technological background for more collaborative, distributed, informal, and self-guided learning. He covers the rise of social media for learning and shows how an architecture of participation can change learning activities. These new paradigms are then applied to learning and education to outline what open learning landscapes look like. Here he highlights the shift from knowledge transfer to competence development, the increase in lifelong learning, and the importance of informal learning, user generated content, and open educational resources. He then shows how to manage quality by presenting a step by step guide to developing customized quality concepts for open learning landscapes. Finally, several methods dealing with assessment in these new environments are presented, including guidelines, templates and use cases to exemplify the approaches. Overall, Ehlers argues for assessment as an integral part of learning processes, with quality assurance as a method of stimulating a quality culture and continuous quality development rather than as a simple controlling exercise.

Si dice Catalogna e subito si pensa a Barcellona, alle sue spiagge, a Gaudí e alla movida. Ma la Catalogna è molto più di questo. Per scoprire i lati nascosti di questa terra insieme frenetica e selvaggia, Richard Guise, in sella alla bicicletta Benny, ha percorso quattrocento chilometri di vie secondarie costiere e collinari intorno a Barcellona. Nel suo viaggio lento tra coste bellissime e speroni di roccia abitati solo dalle capre, ha scoperto una nazione nella nazione, con una lingua e una cultura proprie, ha conosciuto gli abitanti del posto, scoperto come si balla la sardana, imparato cosa si fa in una bugaderia. Un viaggio originale e ricco di aneddoti divertenti, foto e informazioni pratiche sulle tappe.

Sono passati sei mesi da quando Claudia ha lasciato Marcello. Mentre lei sembra aver superato la rottura, lui non riesce a farsene una ragione e continua a cercarla anche dove sa che non la troverà. Così decide che è giunto il momento di svelarle i segreti di una storia che si è cucito sotto pelle. Le scrive delle lettere, dodici per l'esattezza, come i mesi dell'anno, gli anni trascorsi insieme, i nei sulle spalle di Claudia. Le parla di sé, delle debolezze, dell'egoismo, di come l'abbia adorata nel corso del tempo e ne abbia venerato il corpo, di come quell'amore feroce gli fosse talvolta sembrato l'unica malattia in grado di renderlo sano, di svestirlo del suo cinismo. Consapevole di amarla ancora, e che l'amerà per sempre, Marcello tenta disperatamente di racchiudere l'essenza di lei tra le righe, così che la parola scritta la renda eterna.
