This text provides an important overview of the contributions of edible insects to ecological sustainability, livelihoods, nutrition and health, food culture and food systems around the world. While insect farming for both food and feed is rapidly increasing in popularity around the world, the role that wild insect species have played in the lives and societies of millions of people worldwide cannot be ignored. In order to represent this diversity, this work draws upon research conducted in a wide range of geographical locations and features a variety of different insect species. *Edible Insects in Sustainable Food Systems* comprehensively covers the basic principles of entomology and population dynamics; edible insects and culture; nutrition and health; gastronomy; insects as animal feed; factors influencing preferences and acceptability of insects; environmental impacts and conservation; considerations for insect farming and policy and legislation. The book contains practical information for researchers, NGOs and international organizations, decision-makers, entrepreneurs and students.

In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

This volume provides, for the first time, a pan-European view of the development of written languages at a key time in their history: that of the 16th century. The major cultural and intellectual upheavals that affected Europe at the time - Humanism, the Reformation and the emergence of modern nation-states - were not isolated phenomena, and the evolution of the orthographical systems of European languages shows a large number of convergences, due to the mobility of scholars, ideas and technological innovations throughout the period.

As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World

War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. Tenor saxophonist Dexter Gordon was one of the major innovators of modern jazz. In a context of biography, history, and memoir, Maxine Gordon has completed the book that her late husband began, weaving his "solo" turns with her voice and a chorus of voices from past and present. She shows that his image of the cool jazzman fails to come to terms with the three-dimensional man full of humor and wisdom, a figure who struggled to reconcile being both a creative outsider who broke the rules and a comforting insider who was a son, father, husband, and world citizen. -- adapted from publisher info

was hailed as a jazz classic. To this day it remains the bestselling jazz album of all time, embraced by fans of all musical genres. The album represented a true watershed moment in jazz history, and helped to usher in the first great jazz revolution since bebop. *The Making of Kind of Blue* is an exhaustively researched examination of how this masterpiece was born. Recorded with pianist Bill Evans, tenor saxophonist John Coltrane, composer/theorist George Russell and Miles himself, the album represented a fortuitous conflation of some of the real giants of the jazz world, at a time when they were at the top of their musical game. The end result was a recording that would forever change the face of American music. Through extensive interviews and access to rare recordings Nisenson pieced together the whole story of this miraculous session, laying bare the genius of Miles Davis, other musicians, and the heart of jazz itself. This posthumous work by Jacques Arends offers new insights into the emergence of the creole languages of Suriname including Sranantongo or Suriname Plantation Creole, Ndyuka, and Saramaccan, and the sociohistorical context in which they developed. Drawing on a wealth of sources including little known historical texts, the author points out the relevance of European settlements prior to colonization by the English in 1651 and concludes that the formation of the Surinamese creoles goes back further than generally assumed. He provides an all-encompassing sociolinguistic overview of the colony up to the mid-19th century and shows how ethnicity, language attitude, religion and location had an effect on which languages were spoken by whom. The author discusses creole data gleaned from the earliest sources and interprets the attested variation. The book is completed by annotated textual data, both oral and written and representing different genres and stages of the Surinamese creoles. It will be of interest to linguists, historians, anthropologists, literary scholars and anyone interested in Suriname.

The Last Miles
The Music of Miles Davis, 1980-1991
University of Michigan Press
Consider Miles Davis, horn held high, sculpting a powerful musical statement full of tonal patterns, inside jokes, and thrilling climactic phrases—all on the fly. Or think of a comedy troupe riffing on a couple of cues from the audience until the whole room is erupting with laughter. Or maybe it's a team of software engineers

brainstorming their way to the next Google, or the Einsteins of the world code-cracking the mysteries of nature. Maybe it's simply a child playing with her toys. What do all of these activities share? With wisdom, humor, and joy, philosopher Stephen T. Asma answers that question in this book: imagination. And from there he takes us on an extraordinary tour of the human creative spirit. Guided by neuroscience, animal behavior, evolution, philosophy, and psychology, Asma burrows deep into the human psyche to look right at the enigmatic but powerful engine that is our improvisational creativity—the source, he argues, of our remarkable imaginational capacity. How is it, he asks, that a story can evoke a whole world inside of us? How are we able to rehearse a skill, a speech, or even an entire scenario simply by thinking about it? How does creativity go beyond experience and help us make something completely new? And how does our moral imagination help us sculpt a better society? As he shows, we live in a world that is only partly happening in reality. Huge swaths of our cognitive experiences are made up by “what-ifs,” “almosts,” and “maybes,” an imagined terrain that churns out one of the most overlooked but necessary resources for our flourishing: possibilities. Considering everything from how imagination works in our physical bodies to the ways we make images, from the mechanics of language and our ability to tell stories to the creative composition of self-

consciousness, Asma expands our personal and day-to-day forms of imagination into a grand scale: as one of the decisive evolutionary forces that has guided human development from the Paleolithic era to today. The result is an inspiring look at the rich relationships among improvisation, imagination, and culture, and a privileged glimpse into the unique nature of our evolved minds.

As the medium matured in the Forties, Fifties and Sixties, an intense flowering of new

styles spawned almost as many forms - free jazz, West Coast cool, hard bop, modal jazz, fusion - as musicians. All these strains come together to demonstrate that, with all the variety, one constant remains: jazz, the vibrant, living art form, is thriving.

Provides a study of musical improvisation, using theories from cultural and cognitive studies. The author presents a systemic view, with chapters funneling outward in scope from the perspective of a solo improviser to that of a group interacting in performance, to the long-term dynamics of an improvising group from formation to dissolution.

This research and information guide provides a wide range of scholarship on the life, career, and musical legacy of Miles Davis, and is compiled for an interdisciplinary audience of scholars in jazz and popular music, musicology, and cultural studies. It serves as an excellent tool for librarians, researchers, and scholars sorting through the massive amount of material in the field.

NEW YORK TIMES BESTSELLER • The “compassionate” (People), “startling” (Baltimore Sun), “moving” (Chicago Tribune) true story of two kids with the same name from the city: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. In development as a feature film executive produced by

Stephen Curry, who selected the book as his “Underrated” Book Club Pick with Literati The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a spectacularly botched armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn’t shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they’d hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices

would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, *The Other Wes Moore* tells the story of a generation of boys trying to find their way in a hostile world. **BONUS:** This edition contains a new afterword and a *The Other Wes Moore* discussion guide.

This handbook includes state-of-the-art research on love in classical, modern and postmodern perspectives. It expands on previous literature and explores topics around love from new cultural, intercultural and transcultural approaches and across

disciplines. It provides insights into various love concepts, like romantic love, agape, and eros in their cultural embeddedness, and their changes and developments in specific cultural contexts. It also includes discussions on postmodern aspects with regard to love and love relationships, such as digitalisation, globalisation and the fourth industrial revolution. The handbook covers a vast range of topics in relation to love: aging, health, special needs, sexual preferences, spiritual practice, subcultures, family and other relationships, and so on. The chapters look at love not only in terms of the universal concept and in private, intimate relationships, but apply a broad concept of love which can also, for example, be referred to in postmodern workplaces. This volume is of interest to a wide readership, including researchers, practitioners and students of the social sciences, humanities and behavioural sciences. In the 1970s through the 90s, I was told that globalization was homogenizing cultures into a worldwide monoculture. This volume, as risky and profound as the many adventures of love across our multiplying cultures are, proves otherwise. The authors revolutionary and courageous work will challenge our sensibilities and expand the boundaries of what we understand what love is. But that's what love does: It communicates what is; offers what can be; and pleads for what must be. I know you'll enjoy this wonderful book as much as I do! All That Jazz--Total Access to the music and the players.

Investigates the connections between jazz, sexual identity, and radical black politics In his controversial essay on white jazz musician Burton Greene, Amiri Baraka asserted that jazz was exclusively an African American art form and explicitly fused the idea of a black aesthetic with radical political traditions of the African diaspora. In *The Break* is an

extended riff on “The Burton Greene Affair,” exploring the tangled relationship between black avant-garde in music and literature in the 1950s and 1960s, the emergence of a distinct form of black cultural nationalism, and the complex engagement with and disavowal of homoeroticism that bridges the two. Fred Moten focuses in particular on the brilliant improvisatory jazz of John Coltrane, Ornette Coleman, Albert Ayler, Eric Dolphy, Charles Mingus, and others, arguing that all black performance—culture, politics, sexuality, identity, and blackness itself—is improvisation. For Moten, improvisation provides a unique epistemological standpoint from which to investigate the provocative connections between black aesthetics and Western philosophy. He engages in a strenuous critical analysis of Western philosophy (Heidegger, Kant, Husserl, Wittgenstein, and Derrida) through the prism of radical black thought and culture. As the critical, lyrical, and disruptive performance of the human, Moten’s concept of blackness also brings such figures as Frederick Douglass and Karl Marx, Cecil Taylor and Samuel R. Delany, Billie Holiday and William Shakespeare into conversation with each other. Stylistically brilliant and challenging, much like the music he writes about, Moten’s wide-ranging discussion embraces a variety of disciplines—semiotics, deconstruction, genre theory, social history, and psychoanalysis—to understand the politicized sexuality, particularly homoeroticism, underpinning black radicalism. *In the Break* is the inaugural volume in Moten’s ambitious intellectual project—to establish an aesthetic genealogy of the black radical
