MORE THAN ONE MILLION COPIES IN PRINT • "One of the seminal management books of the past seventy-five years."—Harvard Business Review This revised edition of the bestselling classic is based on fifteen years of experience in putting Peter Senge's ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization's ability to learn faster than the competition. The leadership stories demonstrate the many ways that the core ideas of the Fifth Discipline, many of which seemed radical when first published, have become deeply integrated into people's ways of seeing the world and their managerial practices. Senge describes how companies can rid themselves of the learning blocks that threaten their productivity and success by adopting the strategies of learning organizations, in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create the results they truly desire. Mastering the disciplines Senge outlines in the book will: • Reignite the spark of genuine learning driven by people focused on what truly matters to them • Bridge teamwork into macrocreativity • Free you of confining assumptions and mindsets • Teach you to see the forest and the trees • End the struggle between work and personal time This updated edition contains more than one hundred pages of new material based on interviews with dozens of practitioners at companies such as BP, Unilever, Intel, Ford, HP, and Saudi Aramco and organizations such as Roca, Oxfam, and The World Bank.

On account of the growing importance of the subject of cost accounting, it has been included as a special subject in all commerce and management courses, conducted by different Indian universities and professional institutes. The present volume, Cost Accounting-Theory & Problems, has been written to meet in full measure the requirements of the students preparing for these courses. The entire books has been divided into Five sections. Section ONE explains the fundamental concepts which are necessary for the understanding of the subject. Section TWO deals with the principles of costing as applicable to certain specific industries. Section THREE explains the accounting methods. In this section besides others, intricate topics of the cost control accounts and integrated accounts have been discussed with complete clarity and simplicity of exposition. Section FOUR refers to costing as a special tool for managerial control. Adequate space has been given to this recent function of cost accounting. And here topics of budgetary control, standard costing, marginal costing and break even analysis have been elaborately discussed. Section FIVE contains revisionary problems. The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.
