

# Uflex Packaging Films

1. FACE 2 FACE MAT is a complete collection of 24 years' Solved Papers 2. The book is divided into 5 section 3. Solved Papers are provided for the practice of the question 4. We detailed answers are given for every question for better understanding Here comes "FACE 2 FACE MAT 24 years' Solved Paper (2020 – 1997)" prepared under the close guidance of experts by keeping in mind to meet all the needs of students preparing for this exam and to gain entry into top business schools. Following the methodical approach this book gives comprehensive treatment to all the 5 sections as prescribed by the board. Ample numbers of solved questions (2020-1997) are mentioned in this book giving clear guidance on how to attempt the various types of questions with tips and tricks. Solved Papers are given to get acquainted with the paper pattern and question types. Adopting the unique style of teaching this book helps students to not only learn about the concepts but also managing time in during exam. Based on the latest syllabus and providing such a huge amount of solved papers, this book is a perfect study manual assuring success at your upcoming examination.

TABLE OF CONTENT MAT SOLVED PAPER (Sept 2020), MAT SOLVE PAPER (May 2019), MAT SOLVED PAPER (May 2018), SECTION I: (Language & Comprehension), SECTION II: Intelligence & Critical Thinking, SECTION III: Mathematical Skills, SECTION IV: Data Analysis & Sufficiency, SECTION V: Indian & Global Environment.

## Read Book Uflex Packaging Films

Packaging plays an essential role in protecting and extending the shelf life of a wide range of foods, beverages and other fast-moving consumer goods. There have been many key developments in packaging materials and technologies in recent years, and Trends in packaging of food, beverages and other fast-moving consumer goods (FMCG) provides a concise review of these developments and international market trends. Beginning with a concise introduction to the present status and trends in innovations in packaging for food, beverages and other fast-moving consumer goods, the book goes on to consider modified atmosphere packaging and other active packaging systems, including smart and intelligent packaging, and the role these play in augmenting and securing the consumer brand experience. Developments in plastic and bioplastic materials and recycling systems are then discussed, followed by innovations and trends in metal, paper and paperboard packaging. Further chapters review international environmental and sustainability regulatory and legislative frameworks, before the use of nanotechnology, smart and interactive packaging developments for enhanced communication at the packaging/user interface are explored. Finally, the book concludes by considering potential future trends in materials and technologies across the international packaging market. With its distinguished editor and international team of expert contributors, Trends in packaging of food, beverages and other fast-moving consumer goods (FMCG) is an important reference tool, providing a practical overview of emerging packaging technologies and market trends for research

Flavour is an important sensory aspect of the overall acceptability of meat products. Whether we accept or reject a food depends primarily on its flavour. Both desirable and undesirable flavour effects are contemplated. Furthermore, threshold values of different flavour-active compounds have an important effect on the cumulative sensory properties of all foods. Meat from different species constitutes a major source of protein for most people. Although raw meat has little flavour and only a blood-like taste, it is a rich reservoir of non-volatile compounds with taste-tactile properties as well as flavour enhancers and aroma precursors. Non-volatile water-soluble precursors and lipids

## Read Book Uflex Packaging Films

influence the flavour of meat from different species. In addition, mode of heat processing and the nature of additives used may have a profound effect on the flavour of prepared meats. This book reports the latest advancements in meat flavour research. Following a brief overview, chapters 2 to 5 discuss flavours from different species of meat, namely beef, pork, poultry and mutton. In chapters 6 to 12 the role of meat constituents and processing on flavour are described. The final section of the book (chapters 13 to 15) summarizes analytical methodologies for assessing the flavour quality of meats. I wish to thank all the authors for their cooperative efforts and commendable contributions which have made this publication possible.

Printers nowadays are having to learn new technologies if they are to remain competitive. This innovative, practical manual is specifically designed to cater to these training demands. Written by an expert in the field, the Handbook is unique in covering the entire spectrum of modern print media production. Despite its comprehensive treatment, it remains an easy-to-use, single-volume reference, with all the information clearly structured and readily retrievable. The author covers both traditional as well as computer-aided technologies in all stages of production, as well as electronic media and multimedia. He also deals with training, research, strategies and trends, showing readers how to implement the latest methods. With 1,200 pages, containing 1,500 illustrations - over half in colour - the Handbook conveys the current state of technology together with its specific terminology. The accompanying CD-ROM includes the entire

manual in fully searchable form, plus additional software tools. Invaluable information for both beginners and "old hands" in printing works, publishing houses, trade associations, the graphics industry, and their suppliers.

This book provides extensive research into the use of augmented reality in the three interconnected and overlapping fields of the tourism industry, museum exhibitions, and cultural heritage. It is written by a virtual team of 50 leading researchers and practitioners from 16 countries around the world. The authors explore the opportunities and challenges of augmented reality applications, their current status and future trends, informal learning and heritage preservation, mixed reality environments and immersive installations, cultural heritage education and tourism promotion, visitors with special needs, and emerging post-COVID-19 museums and heritage sites. *Augmented Reality in Tourism, Museums and Heritage: A New Technology to Inform and Entertain* is essential reading not only for researchers, application developers, educators, museum curators, tourism and cultural heritage promoters, but also for students (both graduates and undergraduates) and anyone who is interested in the efficient and practical use of augmented reality technology.

In the seventy years of its independence, India has leapfrogged to become a high-growth economy fuelled by advanced business and consumer technologies. Since smartphones and cloud computing became popular five years ago, the fourth industrial revolution has been creeping into almost all sectors of the Indian economy.

Technologies like artificial intelligence, the Internet of Things (IoT), 3D printing, advanced robotics and neuroscience are transforming businesses faster than we realize. *Kranti Nation: India and the Fourth Industrial Revolution* is the first book to chronicle, through more than fifty examples, how visionary leadership in Indian industry is deploying these technologies. From water pumps to railway coaches, chai shops to burger chains, and telecom towers to warehouses, economic analyst Pranjal Sharma profiles organizations that have transformed their processes, products and services while delivering the best to consumers.

Pharmaceutical packaging requires a greater knowledge of materials and a greater intensity of testing than most other packed products, not to mention a sound knowledge of pharmaceutical products and an understanding of regulatory requirements. Structured to meet the needs of the global market, this volume provides an assessment of a wide range of issues. It covers the entire supply chain from conversion of raw materials into packaging materials and then assembled into product packs. Integrating information from many drug delivery systems, the author discusses testing and evaluation and emphasizes traceability and the need to for additional safeguards. Written to assist anyone who works with webs directly or indirectly, *The Plastic Film and Foil Web Handling Guide* is a handbook for diagnosing and correcting problems with web handling technology. Covering web handling fundamentals, process-related technologies, troubleshooting, and solutions, it includes sufficient technical information

## Read Book Uflex Packaging Films

to identify and correct defects in rolls (of film or foil). Readers will appreciate this unbiased look at web handling that also serves as a counterpoint to information from equipment suppliers. The text presents guidelines on: Roller alignment in machines  
Tensioning of webs  
Use of web spreading and guiding devices  
Use of razor slitters  
Shear knife slitters  
Edge trim removal  
Trim disposal  
Management of electrostatic charges on webs  
Waste storage equipment  
Winding technology is presented that addresses gage variation issues, cores and mandrels, vibration, speed issues, web thickness issues, web strength issues, coated web issues, laminated web issues, clear film issues, winding tension profile issues, and lay-on roller issues. A guide for troubleshooting web-handling problems and a glossary of terms for quick reference is also provided.

The third international conference on INformation Systems Design and Intelligent Applications (INDIA – 2016) held in Visakhapatnam, India during January 8-9, 2016. The book covers all aspects of information system design, computer science and technology, general sciences, and educational research. Upon a double blind review process, a number of high quality papers are selected and collected in the book, which is composed of three different volumes, and covers a variety of topics, including natural language processing, artificial intelligence, security and privacy, communications, wireless and sensor networks, microelectronics, circuit and systems, machine learning, soft computing, mobile computing and applications, cloud computing, software

engineering, graphics and image processing, rural engineering, e-commerce, e-governance, business computing, molecular computing, nano-computing, chemical computing, intelligent computing for GIS and remote sensing, bio-informatics and bio-computing. These fields are not only limited to computer researchers but also include mathematics, chemistry, biology, bio-chemistry, engineering, statistics, and all others in which computer techniques may assist.

Managing performance is a critical focus of HR activity. This title reveals what leading organisations are doing to manage their employees' performance and how they are delivering results. It shows you how to improve the management of your employees' performance.

Technological advances have vastly expanded the market for shrink sleeve labels. Today, full body decoration, 360-degree branding, the potential to decorate complex and intricate shapes, the ability to add tamper evidence, abrasion resistance and waterproof printed images are all possible due to constantly developing technology. With this increase in applications, shrink sleeve label popularity is growing fast, but advancement comes at a cost and the complexities involved in the production of these labels are also on the rise. Shrink sleeve label printing uses a variety of different films, with different degrees of shrink capability. Converters need knowledge of each of these films, along with the image distortion processes, and the shrinkability and performance requirements of inks. They must also understand the demands of the seaming process

## Read Book Uflex Packaging Films

and how printed sleeves perform during shrinkage. This book can improve your shrink sleeve production by guiding you through the film, ink, printing and processing stages. Use the detailed information to improve quality, prevent errors and correct potential faults. Ultimately, you can increase the options offered to your clients and grow your business. Chapters include: An introduction to sleeves and sleeve technology Shrink sleeve substrates and their usage Design and origination for sleeve labels Printing technologies and inks for shrink sleeve decoration Converting heat shrink sleeve labels - slitting, seaming, sheeting 50 and finishing Shrink sleeving - using the right application and shrink tunnel technology Challenges, learnings and the quest for perfection Packaging adds value to products for a consumer and has a vital role to play in a product's journey from manufacturer to end consumers. It is a key inducer of sales in the wake of evolving consumer needs and preferences. In India and as well as around the globe, flexible packaging solutions have emerged as the high growth segment of the packaging industry. Flexible packaging has been at the forefront since the last 4-5 years amidst growing need for convenient packages among consumers as well as the producers. Flexible packs are a boon for both parties and tapping the potential of the industry, Niir Project Consultancy Services has released a study on the industry titled 'Market Research Report on Future Potential of Flexible Packaging in India (Present Status, Growth Prospects, Emerging Trends, Opportunities, Demand-Supply, Market Size, Sector Outlook, Analysis & Forecasts upto 2017 with Financial Comparison of

## Read Book Uflex Packaging Films

Major Players)'. The report provides industry insights like present status, factors that will drive the growth, the emerging trends, prevalent opportunities, demand supply scenario and key player information. The report begins by discussing the current scenario of the industry and briefing on packaging industry on the whole. Further it moves ahead for elaborating on factors that will drive the growth of the industry. Flexible packaging industry has found its applicability extensively in high growth industries like FMCG and pharmaceuticals. The growth in such user industries is bound to reflect in the flexible packaging numbers. Factors like growing incomes, middle class population, urbanization and surging organized retail in the country will also lend a hand to the sector. Navigating ahead, the report then discusses the upcoming trends in the industry along with the opportunities and challenges faced by the flexible packaging sector. The report classifies factors such as rising government focus on healthcare, low capita consumption levels of flexible packaging and surge in the food processing industry as key opportunities for flexible packaging. Raw material fluctuations and mounting environmental concerns regarding the extensive use of plastics are some challenges encountered by the sector. The report moves ahead to analyze demand-supply situation in the industry. The demand is captured by analyzing the demand for flexible packaging films while supply is demonstrated by listing the capital expenditure projects announced by the incumbents. The above mentioned data is supported by graphical representation and forecasts of key indicators. A thorough analysis of the

## Read Book Uflex Packaging Films

industry is incomplete without the key player information. The next segment of the report shares information of players operating in the industry by providing company profiles and detail financial information. It includes company profiles of players like Huhtamaki PPL Ltd, Uflex Ltd, Polyplex Corporation Ltd and EsselPropack Ltd while financial information like address of registered office, director's name and financial comparison covering balance sheet, profit & loss account and several financial ratios of the players is discussed. The report ends with a positive outlook of the flexible packing industry in India along with its market sizing numbers. Indian consumer's spending patterns and product awareness have gone through a colossal change which has contributed in the high consumption of flexible packaging in the country. Rising incomes, mounting health awareness and evolving eating habits of the Indian consumers will keep pouring in growth for the user industries like FMCG and Pharmaceutical and thus will also keep the flexible packaging industry in good shape.

Reasons for Buying this Report:

- This research report helps you get a detail picture of the industry by providing overview of the industry along with the market structure and its classification
- The report provides in-depth market analysis covering major growth driving factors for the industry, emerging trends and opportunities prevalent
- This report helps to understand the present status of the industry by elucidating a comprehensive scrutiny of the demand – supply situation with forecasts
- Report provides analysis and in-depth financial comparison of major players/competitors
- The

report provides forecasts of key parameters which helps to anticipate the industry performance Our Approach: • Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years. • The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players • We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

Biology for grades 6 to 12 is designed to aid in the review and practice of biology topics such as matter and atoms, cells, classifying animals, genetics, plant and animal structures, human body systems, and ecological relationships. The book includes realistic diagrams and engaging activities to support practice in all areas of biology. The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series is aligned to current science standards.

Vinyl Sign Techniques, a compilation of "Vinyl Graphics" columns for "Signs of the Times" by industry expert, Jim Hingst, is a must-have for anyone in the vinyl sign and graphics business. The book is packed with comprehensive information for managers,

## Read Book Uflex Packaging Films

sales people, and professionals involved in vinyl graphics preparation, handling and installation. Vinyl Sign Techniques thoroughly covers the sales and marketing, fabrication, materials, installation, and removal of vinyl products of all kinds, involving both common and unusual surfaces and conditions. The book offers new ideas and techniques that will directly and immediately benefit your sales and profits.

The word 'Jumbled' simply means being mixed up. In almost all competitive entrances and recruitment examinations like CDS, CAT, NDA, MAT, Bank PO & Clerk, LIC AAO, etc, the General English section includes a decisive number of questions involving jumbled-up passages (paragraphs) and sentences (group of phrases all placed without order). The candidates have to comprehend the exact sequence in the paragraph or sentence from the provided cob-web of confusion. The present book on sentence arrangement and its formation seeks to empower you to tackle these questions confidently and correctly by giving you sufficient practice in solving different types of such problems. Through the practice of solved and unsolved questions in this book, the candidates acquire a good command over the grammatical rules and proper usage of various notions and exceptions in the English Language. This book will prove to be useful to help candidates adopt clear-cut ways of a meaningful arrangement & formation of sentences for various competitive entrances and requirement examinations like CDS, CAT, NDA, MAT, XAT, SNAP, other management entrances and recruitment examinations such as Bank PO, LIC AAO, etc. This book will help you learn the way to

rearrange the deranged.

Recycling of Flexible Plastic Packaging presents thorough and detailed information on the management and recycling of flexible plastic packaging, focusing on the latest actual/potential methods and techniques and offering actionable solutions that minimize waste and increase product efficiency and sustainability. Sections cover flexible plastic packaging and its benefits, applications and challenges. This is followed by in-depth coverage of the materials, types and forms of flexible packaging. Other key discussions cover collection and pre-treatment, volume reduction, separation from other materials, chemical recycling, post-processing and reuse, current regulations and policies, economic aspects and immediate trends. This information will be highly valuable to engineers, scientists and R&D professionals across industry. In addition, it will also be of great interest to researchers in academia, those in government, or anyone with an interest in recycling who is looking to further advance and implement recycling methods for flexible plastic packaging. Presents state-of-the-art methods and technologies regarding the processing of flexible plastic packaging waste Addresses the challenges currently associated with both waste management and available recycling methods Opens the door to innovation, supporting improved recycling methods, manufacturing efficiency and industrial sustainability and THE TRADE MARKS RULES, 2017 with The Intellectual Property Appellate Board (Salaries and allowances payable to, and other terms and conditions of service of

This volume seeks to advance cost-effective methods using newly-developed surfactants. It summarizes data from physical, chemical, surface, detergency, cleaning, toxicity and environmental sources for designing new formulations of classic organic head-tail surfactants in response to increased environmental, toxicity, safety and performance demands.

and THE PETROLEUM RULES, 2002 with The Petroleum and Natural Gas Regulatory Board Act, 2006; The Petroleum Products (Maintenance of Production, Storage and Supply) Order, 1999 The Liquefied Petroleum Gas (Regulation of Supply and Distribution) Order, 2000 Statement of Objects and Reasons; Notes with Free Access to Full Text of Judgements on Net and Mobile App

The Science and Technology of Flexible Packaging: Multilayer Films from Resin and Process to End Use provides a comprehensive guide to the use of plastic films in flexible packaging, covering scientific principles, properties, processes, and end use considerations. The book brings the science of multilayer films to the practitioner in a concise and impactful way, presenting the fundamental understanding required to

## Read Book Uflex Packaging Films

improve product design, material selection, and processes, and includes information on why one material is favored over another for a particular application, or how the film or coating affects material properties. Detailed descriptions and analysis of the key properties of packaging films are provided from both an engineering and scientific perspective. End-use effects are also covered in detail, providing key insights into the way the products being packaged influence film properties and design. The book bridges the gap between key scientific literature and the practical challenges faced by the flexible packaging industry, providing essential scientific insights, best practice techniques, environmental sustainability information, and key principles of structure design to enable engineers and scientists to deliver superior products with reduced development time and cost. Provides essential information on all aspects of multilayer films in flexible packaging Aids in material selection and processing, shortening development times and delivering stronger products Bridges the gap between scientific principles and key challenges in the packaging industry, with practical explanations to assist practitioners in overcoming those challenges

This book provides an insight in the phenomenon of Mergers and Acquisitions (M&A), including the various forms of corporate restructuring. It highlights the importance of M&A as a strategy for faster growth in the corporate. The book provides an enriched experience of the art of valuation with detailed description of M&A process, deal structuring and financing. The book also provides the broader perspective of

## Read Book Uflex Packaging Films

Accounting and Regulatory aspects of M&A. While covering the conceptual underpinnings of M&A, the book supplements it with real life examples on each sub-topic with various numeric examples. Thus the judicious blend of theory and practical aspects, through numerical as well as real life case-studies, make the book a source of vast knowledge in the complicated and dynamic world of M&A.

The complete and authoritative guide to modern packaging technologies —updated and expanded From A to Z, The Wiley Encyclopedia of Packaging Technology, Third Edition covers all aspects of packaging technologies essential to the food and pharmaceutical industries, among others. This edition has been thoroughly updated and expanded to include important innovations and changes in materials, processes, and technologies that have occurred over the past decade. It is an invaluable resource for packaging technologists, scientists and engineers, students and educators, packaging material suppliers, packaging converters, packaging machinery manufacturers, processors, retailers, and regulatory agencies. In addition to updating and improving articles from the previous edition, new articles are also added to cover the recent advances and developments in packaging. Content new to this edition includes: Advanced packaging materials such as antimicrobial materials, biobased materials, nanocomposite materials, ceramic-coated films, and perforated films Advanced packaging technologies such as active and intelligent packaging, radio frequency identification (RFID), controlled release packaging, smart blending,

nanotechnology, biosensor technology, and package integrity inspection Various aspects important to packaging such as sustainable packaging, migration, lipid oxidation, light protection, and intellectual property Contributions from experts in all-important aspects of packaging Extensive cross-referencing and easy-to-access information on all subjects Large, double-column format for easy reference First issue published as the intended annual supplement: Oceanology yearbook/directory

An engineering handbook that explains all technical aspects of webs, long thin sheets of materials, such as paper, plastic films, foils, and textiles that are wound into rolls, often after being laminated, printed, or coated. Topics covered include: tension control, roller mechanics, drives, brakes, nip control, guides, spreaders, slitters, and more. The book illustrates engineering principles with shop-floor examples and provides easy-to-understand calculations that control how web systems are designed and operated, and how webs of many different materials can be made to move efficiently over a variety of rollers. These tools are meant to help industry specialists troubleshoot and correct defects such as wrinkles, bagginess, curl, and misshapen wound rolls. As part of web handling the book provides extensive details on many roll-to-roll converting operations, such as calendaring, coating, laminating, and printing.

This basic source for identification of U.S. manufacturers is arranged by product in a large multi-volume set. Includes: Products & services, Company profiles and Catalog file.

This new book, by two of the world's foremost experts, is the definitive guide to how winding machines work and how wound rolls are formed. It covers a wide array of machines in use

## Read Book Uflex Packaging Films

across all web industries, including paper, film, foil, nonwovens, textiles, and more. It sets the standard for understanding and applying quality control in the field. Using hundreds of proven calculations, the book enables readers to understand and make the adjustments necessary to prevent roll defects and improve product quality. Dozens of examples and hands-on applications illustrate key techniques. Most of the book, especially the last section on measurement, is written in everyday language accessible to all responsible for machine operation and roll quality—from engineers to shop floor managers.-----

TABLE OF CONTENTS
Preface
About This Book and CD-ROM
Section I—MACHINES
1. Zen and the Art of Winding · The TNT's of Winding · Winder Classes · Limits on Tension, Nip and Torque Differential · The Effect of Class on Range of Wound Roll Tightness · What is Tightness? · How Does Winding Being a One-Knob Process Affect Winding Strategy? · What Class is Best and How Many Knobs Do I Need? · What About Taper or Roll Structure? · How Do You Set Taper? · A Few Words About Optimization—What is the Best Tension? · Bibliography
2. Some Winding Defects · DFM Applied to Winding · Getting Started · What is a Defect? · Blocking · Core—Crushed · Core—Loose · Corrugations or Ropes · Curl · Gauge Bands or Ridges · Hardness Variations Across a Roll · Nip Induced Defects · Offsets and Rough Roll Edges · Out-of-Round Roll · Starring and Related Defects · Telescoping · A Note on Oscillation · Summary · Bibliography
3. Winder Arrangements · Selecting a Winder · Salvage Winders · Turret Winders · Reels · Duplex Winders · Two Drum Winders · Grooving, Traction Coated and Rubber Covered Drums · Gap Winders · Bigger is Better for Drums, Spools, Cores and Rollers · Supporting Large Rolls on Drums · Summary · Bibliography
4. Roll Geometry and Properties ·

## Read Book Uflex Packaging Films

Roll Diameter · Roll Length · Resolving Roll Length Discrepancies · Roll Width · Wound Roll Offsets and Rough Edges · Telescoping and Dishing · Roll Weight and Density · Some Useful Roll Conversion Formulas · Bibliography Section II—MECHANICS 5. Simple Material Properties · Basis Weight · Caliper · Caliper Profile—A Very Important Note · Density or Bulk · Other Web Material Properties of Winding Interest · Other Roll Properties of Winding Interest · The Fiber Core—The Foundation of Most Wound Rolls · Bibliography 6. Introduction to Wound Roll Modeling · Stresses in a Wound Roll · Anisotropy and Principal Axes · MD or Tangential Modulus · ZD or Radial Modulus · In-Plane Poisson Ratio · Poisson Ratios for Winding Models · Basic Equations of Winding Models · Winding Equation · Core Modulus  $E_c$ —The Inner Boundary Condition · Winding Tightness—The Outer Boundary Condition · Bibliography 7. Simple 1-D Models · Early Models 1950-1985 · Hakiel's Models—1986 · Early Complex Models · Early Experimental Verification · The Hakiel Formulation · Spongy and Fully Compressed Behavior · Constant Tension versus Constant Torque · Large Deformations · Plane Strain versus Plane Stress Winding Models · Bibliography 8. 2-D Models and Gauge Variation · Measuring Gauge Profile · Early Models of the Effects of Gauge Variation · True 2-D Models of the Effects of Gauge Variation · Summary of the Effects of Gauge Variation · Bibliography 9. The Effect of Nip on Wound Roll Stresses · Classes of Winders · What is WOT? · Early Experimental Evidence of WOT · Early Models for WOT · Comparative Study of Different Models for WOT · WOT on Two Drum Winders · Summary of Findings · Bibliography 10. The Effects of Air Entrainment · Air Entrainment Between Webs and Rollers · When Is Air Important Between Permeable Webs and Rollers/Wound Rolls? · Some Practical Observations on Entrained Air · Air Entrainment on Centerwinders · An Introduction to Nip Rollers on Winders ·

## Read Book Uflex Packaging Films

Modeling Air Exclusion by a Nip Roller · Exhaust of Air Entrained From the Edges of a Wound Roll · The Effect of Air Entrainment on Wound Roll Stresses · Effect of Air Exhaust on Wound Roll Stresses · Summary · Bibliography 11. The Effects of Moisture and Temperature · Time Constants for Movement of Moisture/Temperature in a Wound Roll · Moisture/Temperature Profiles of a Wound Roll · Thermoelastic Behavior in Wound Rolls · Hygroscopic Behavior in Wound Rolls · Bibliography 12. Viscoelastic Behavior · Creep and Stress Relaxation · Viscoelastic Behavior · Bibliography 13. Defects Predicted by Winding Models · Pressure Related Defects · Bursts, Baggy Lanes, Ridges and Hardstreaks · Modeling of Simple Slippage Related Defects · Telescoping · Crepe Wrinkles · Starring · Tin-Canning · Core Collapse · Loose Cores and Core Stiffness · Bibliography 14. Dynamic Behavior at High Speeds · Centrifugal Effects · Vibration · Bibliography Section III—MEASUREMENT 15. Wound Roll Sampling and Inspection · Why Measure? · Measurement Methods · Methodology · Sampling · Interchangeability of Measurements · Bibliography 16. Measures of Roll Hardness · Billy Club and its Variants · RhoMeter and RhoHammer · Bactender's Friend · Schmidt (Concrete) Hammer · Parotester · TAPIO RQP · Bibliography 17. Measurements of Interlayer Pressure · Pull Tab · Smith Needle · Core Torque · Axial Press Test · Pressure Transducers · Caliper In-Roll · Acoustic Time-of-Flight · Bibliography 18. Measurements Based on Strain · Cameron Gap · J-Line · Radially Drilled Holes · Slit Roll Face · Strain Gages · WIT-WOT · Bibliography Appendix D—Dictionary 19. Density Based Measures · Air In Roll · Roll Density · Density Analyzer—History · Density Analyzer —Construction · Density Analyzer—Theory of Operation · Analysis of the Density Analyzer · Bibliography 20. Other Wound Roll Measures · Profile · Bubbleometer · X-Ray Tomography · Bibliography 21. Wound Roll Measurement
