Grab your bucket and join the search for all the cool bugs outside! This fun rhyming story lists all the bugs you can imagine—creep bugs, climb bugs, sticky-slime bugs! Discover the vast world of insects in this photo-filled book.

Catch All the Buzz About Bugs! Kids love the thrill of discovery—especially when it comes to bugs. Become a young entomologist. Learn all about bees, butterflies, spiders, and other creepy crawlies. Jaret C. Daniels, author of many bug books, presents a kids' introduction to entomology. From ants and beetles to dragonflies and mosquitoes, this easy-to-understand book is a perfect guide for beginners. It features expert insights on a variety of common and important insects. It delves into such topics as what the various species eat, how long they live, and whether or not they migrate during winter. In the field-guide section, featured species are organized by where they are commonly found. Full-color photographs and descriptions of key markings help readers to identify the species they see in nature. Inside You'll Find Beginner's guide to bugs of the USA and southern Canada The basics of entomology and bug anatomy Identification guide to common and important bugs to know Fun bonus activities for the whole family

Did you know that without insects, humankind could not survive? This illustrated, fact-filled title explores the huge variety of insects, with a focus on what makes an insect an insect, the differences between the groups, and why insects are the most important animal group on Earth. Broken down into sections exploring each of the main types of insect, each section takes a different, playfully visual approach to really capture the character of the insects in the order being explored. Includes practical advice for observing insects safely and ways to encourage insects into a garden no matter how small.

Get curious about creepy, crawly, and cool bugs Crawl inside the weird world of bugs and discover the fascinating lives of arthropods, insects, and arachnids. This book for kids ages 5 to 7 explains what makes a bug a bug--from their jointed legs to their strange eyes and awkward antennae. Learn how they see, breathe, and fly, and which bugs don't fly at all. Meet amazing bugs--from magnificent moths to peculiar pill bugs--and discover where they live, what they eat, and how they change and grow. Beautiful, colorful photos bring these incredible creatures up close with plenty of fun facts and fascinating details about what makes each bug so special. Budding backyard bug-catchers will have their hands full with this informative book. The Weird and Wonderful World of Bugs includes: Wild--From elusive earwigs to glorious glowworms, explore the lives of popular backyard bugs and those that live in far-away places. Weird--Did you know that a baby spider is called a spiderling? You'll discover even more fun facts about each cool bug. Wonderful--Explore how bees make honey, why stink bugs smell, and the amazing insects that help pollinate our planet. Take a microscopic look into the super cool and curious world of bugs with this fun guide.

Bugs are usually so small that we hardly notice them, let alone think of them as living beings. But call upon the magnifying glass, and a shapeless jumble of legs, wings, and antennae suddenly start staring back at us. About 80 percent of the Earth's animals are insects. While there are millions of different species, we rarely see many of them . . . until now. Thanks to the photography of John Hallmén, who took a camera and magnified these magnificent creatures one hundred times, we can see what we've never been able to see before. Bugs Up Close takes readers on a journey into a world rarely seen, with incredible photographs of such insects as: Crane flies Yellow meadow ants Black fungus beetles Treehoppers And many more! The diversity of this insect civilization is striking and unknown to most. An insect we may never have thought twice about now looks like a creature from outer space. Fascinating and somewhat monstrous details such as compound eyes, antennae, and sharp mouth parts are visible, and with text by Lars-Åke Janzon, Bugs Up Close is an amazing close look into the strange and beautiful world of insects.

Shares in-depth information about all currently known dinosaur species organized under major periods, providing details on such topics as physical characteristics, diet and discovery dates. 25,000 first printing.

This book introduces young readers to insects with more than 100 pictures, an explorer's corner with from-the-field anecdotes and tips, fun facts throughout, maps and infographics, an illustrated diagram, a photo gallery, cool comparisons, a behind-the-scenes photograph, an interactive glossary, and more.

Larger-than-life bugs spring from the pages, peek out from behind flaps and hide under tabs, inviting young entomologists to marvel at the mind-boggling variety of arthropod life. What reader can resist a chance to look inside a cockroach's body to see how it works or open a wasps' nest to see what's inside?

It seems they're everywhere. But scientists believe bees' survival is at risk. What has put bees at risk, and should we care? Imagine a world without these important pollinators and you'll see a world with fewer and fewer critical food sources.

Meet the coolest creepy crawlies on the planet! Discovering Bugs features an in-your-face look at more than fifty fascinating insects—as if through a magnifying glass! Zoom in on the coolest bugs in the world, crawling the forest floor alongside beetles and ants, and flying the skies with bees and dragonflies. An in-depth guide to sharks includes information on where they live, how they eat, the challenges they face, and whether or not certain species pose a danger to humans.

What's the weather? Wake up to this ultimate reference, teeming with fascinating facts, amazing features, the latest science, and tons of close-up images of the wildest weather on the planet. Did you know that a bolt of lightning can crack through the air at up to 136,000 miles per hour and reach temperatures hotter than the surface of the sun? Or that if all the ice in the Antarctic melted, the oceans would rise by about 220 feet? Welcome to the amazing world of weather. From how weather happens to the most extreme weather in the world, it's all covered in this easy-to-use reference featuring all the major types of weather and what kinds of weather happen in particular places, from the desert to the tropics to the poles. The main content is highlighted with fun facts, Did You Know? details, and colorful photos and graphics. Thematic spreads cover topics such as climate change, weather survival stories, animal adaptations to weather, and much more. Fans of other National Geographic Kids Ultimate "pedias" in the same series--Dinopedia, Bugopedia, Reptileopedia, Oceanpedia, and Predatorpedia--will want to find a place for Ultimate Weatherpedia on their bookshelves.

Nancy is a beautiful dragonfly. In fact, her friends say that she is the most beautiful dragonfly ever! Her friends are Freddy Tree Frog and Little Blue Baron. Together, they are best friends, and they always have fun. Nancy thought her life would be perfect forever, until one day ... While diving to catch a mosquito, Nancy doesn't notice Blackie the Widow Spider's web. Her wing gets caught, and in a panic, Nancy pulls

herself loose. A piece of her beautiful wing is left behind, so she flies away and hides. She doesn't think her friends will like her, so she remains hidden. She expects her friends to laugh, but her best friends make her realize something important. They don't love Nancy because she's beautiful on the outside but because of a different reason altogether!

Describes the daily activities and life cycle of a pill bug or wood louse

"The most complete ocean reference ever, more than 350 amazing color photos throughout the book."

Insects & Me A-Z is full of interesting bug facts, affirming (and sometimes silly) "I" statements, colorful illustrations and a diverse cast of characters. Practice your letters while gaining a new appreciation for insects and yourself!

An introduction to the hidden worlds of popular insects profiles their habits, habitats, and diets while providing thematic spreads that share additional historical and geographical fun facts.

Enter the kingdom of bugs and their close relatives for a magical journey through the forest floor, down into the deepest caves, and even across the open ocean... Insects, arachnids, worms, and mollusks are crawling across the pages of this colorful bug book, which combines gorgeous illustrations and photos to help young animal enthusiasts spot and learn all the main bug groups. From dancing bees to cartwheeling spiders, from butterfly athletes to the beetles that eat poo, they'll learn all about the incredible secret world of creepy-crawlies. And they'll find out how bugs help to look after our planet too. The Book of Brilliant Bugs, written by insect expert Jess French and illustrated by Claire McElfrick, takes children on a fascinating journey of exploration, showing them just how amazing creepy-crawlies are, what they do for our planet, and how we can help them. It includes bug relatives such as slimy slugs, web-spinning spiders, and scuttling centipedes, plus amazing facts on how bugs pass on messages, compete for food, seek true love, and fill the air with buzzing wings.

"Find adventure! Go outside! Have fun! Be a rock hound!"--Cover.

Let me introduce you to the BUMBLE FAMILY This is a tale of the Bumblebees. My aim is to help children understand the importance of our bees and help the wildlife. To engage and hold their attention as well as stirring curiosity for more adventures both factual as ample fantasy. In this story it is about an elderly couple who cares for their garden, providing food for the Bumbles. Their young granddaughter comes to visit for the Summer and befriends a young Bumblebee called Blue Bell. Is it a dream young Peggy Parsley is having....?

Offers a close-up look at nature photography of caterpillars, and includes a scientific experiment, a glossary, and ready-reference facts on the creatures.

Catch the bug buzz and learn all about insects with the Cat in the Hat--a perfect gift for little scientists on Earth Day and every day! The Cat in the Hat's Learning Library is a nonfiction picture book series that introduces beginning readers ages 5-8 to important basic concepts. Find out all you ever wanted to know about insects when the Cat in the Hat and friends get an up-close view of life as a bug. Kids will learn how insects -- from the spittlebug to the honeybee to the moth -- see, smell, communicate, and pollinate, as well as sometimes pester and amaze and generally make life better for us humans. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library are unjacketed hardcover picture books that explore a range of nonfiction topics about the world we live in and include an index, glossary, and suggestions for further reading.

Trek into the field with insect expert and National Geographic explorer Dr. Dino Martins to study all kinds of critters that creep, crawl, and fly to learn what exactly an entomologist does! There are more than one million different kinds of insects in the world ... and curious kids seem to have just as many questions about them! That's why this book is set up in a kid-friendly question-and-answer format and has lots of wonderful images, too. Questions cover everything from "How do insects get their names?" to "How are insects helpful?" to answer all kinds of queries. Kids will learn how real scientists observe insects, capture them to study up close, and release them back into the wild. This fun book is sure to inspire kids to go out and observe the creatures crawling in their own backyards!

A guide to the human body answers common questions through text, photographs, illustrations, and diagrams that discuss body systems and health care, and includes complementary experiments and top ten lists.

Quiz your family and friends with this ultimate Big Quiz Book from National Geographic Kids, bursting with jaw-dropping facts that will keep everyone guessing and give you hours of fun.

Get the buzz on bugs in this Classic Board Book edition of Some Bugs by bestselling author Angela DiTerlizzi! Grab your magnifying glass! Find your field guide! And come hop, hide, swim, and glide through this buggy backyard world! Featuring butterflies and moths, crickets and cicadas, bumblebees and beetles, this zippy rhyming exploration of backyard-bug behavior is sure to have young insect enthusiasts bugging out with excitement!

School Library Journal Best Books of 2011 Eureka! Silver Honor Books—California Reading Association Capitol Choices 2012 list of Noteworthy Titles for Children and Teens 2012 Notable Children's Books—ALSC The new National Geographic Treasury of Greek Mythology offers timeless stories of Greek myths in a beautiful new volume. Brought to life with lyrical text by award-winning

author Donna Jo Napoli and stunning artwork by award-winning illustrator Christina Balit, the tales of gods and goddesses such as Zeus, Aphrodite, Apollo, and Athena and heroes and monsters such as Helen of Troy, Perseus, and Medusa will fascinate and engage children's imaginations. National Geographic completes the book with embellishments of each story: sidebars for each god, goddess, hero, and monster link the myths to constellations, geography, history, and culture to help young readers connect the stories to real life events, people, and places. A family tree and a "cast of characters" profile page help make relationships between the characters clear, and a mapping feature adds to the fun and fascination. Resource notes and ample back matter directing readers to more information round out this luminous book. Sure to dazzle all those intrigued with the fantastic tales of Greek mythology and enchant new readers, this vibrant book will soon become a family keepsake. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.
