*Travel Hacking Secrets* Sebastian Ritter, 2017-04-07 Travel Hacking is a term that's been thrown around a million times over. With so much information available online, you're basically given a hundred different concepts, but no real direction. This book aims to change that. Combining technical wisdom with real-world, achievable action steps, I'll give you the nuts and bolts of travel hacking: the methods, steps and resources I used to get the absolute best travel experiences available, with the least amount of money possible. Here's what you'll learn: How to properly set a travel goal and determine the miles you need for your dream trip How airline alliances work and which cards to sign up for Strategies on how to meet the minimum spend and rack up your mileage How to track your miles efficiently And ultimately, how to redeem your miles for free or upgraded flights, cheap transportation and hotel stays Do you: Want to jump into travel hacking with a clear and simple plan in place? Want to start without having to spend hours on research and weighing the countless options available? Want to know how to lay the foundation for earning miles, racking up your mileage, and redeeming those miles to fund free or very low-cost trips? This is the blueprint you've been waiting for. Because you go online and see it every day: average, working class people who are able to see their travel dreams come to life. It could be your co-worker who just filed a leave to see the Big 5 in Africa, or your neighborhood Instagrammer who seems to be traversing one country after another. You'd love to do the same - only you don't have the money to do so. And money, in fact, is the biggest factor that comes between most people and their travel goals. My name is Sebastian Ritter, and like you, I don't have lots of it either. I've travelled to 15 countries, seen 5 of 7 continents, using airline miles almost entirely. I removed money from the equation and used my know-how in travel hacking to be able to travel wherever I want, whenever I want, and as frequently as I do. And I want to show you that you can do it, too. There are millions of sources online on Travel Hacking, and it can be confusing with all those flight alliances, rewards programs, credit cards and promotions involved. I created this resource to keep you from having to visit a million websites and go through a hundred different concepts. Here, I provide the nuts and bolts of travel hacking - discussing in clear detail the exact steps, methods and resources that you need to earn hundreds of thousands of miles, fly first class, and get a free stay in a hotel suite. And you don't even need to travel a lot to do so, as it's possible to earn your miles right from the comfort of your own home. If you're new to travel hacking, or have simply given up because of the lack of a solid resource on the subject, this is the blueprint you've been waiting for. So let's get started! Sincerely, Sebastian Ritter

Or about the time when the electricity went down and I got trapped inside the Cheops pyramid in Cairo. I could tell you how I ended up working on Hollywood movie sets in London, how I spent weeks with always naked hippies up in the Swiss mountains, how I climbed waterfalls, how I swam with wild dolphins in the Indian Ocean or I could also tell the story where I got almost arrested in Israel and in Italy. *Hacking Your Education* Dale J. Stephens, 2013-03-05 It's no secret that college doesn't prepare students for the real world. Student loan debt recently eclipsed credit card debt for the first time in history and now tops one trillion dollars. And the throngs of unemployed graduates chasing the same jobs makes us wonder whether there's a better way to "make it" in today's marketplace. There is—and Dale Stephens is proof of that. In *Hacking Your Education*, Stephens speaks to a new culture of "hackademics" who think college diplomas are antiquated. Stephens shows how he and dozens of others have hacked their education, and how you can, too. You don't need to be a genius or especially motivated to succeed outside school. The real requirements are much simpler: curiosity, confidence, and grit. *Hacking Your Education* offers valuable advice to current students as well as those who decided to skip college. Stephens teaches you to create opportunities for yourself and design your curriculum—inside or outside the classroom. Whether your dream is to travel the world, build a startup, or climb the corporate ladder, Stephens proves you can do it now, rather than waiting for life to start after "graduation" day.
