Hecht brings to bear the perspective of both historical concepts and contemporary physics. While the text covers the standard range of material from kinematics to quantum physics, Hecht has carefully limited the math required to basic calculus and very basic vector analysis. He omits obscure, high-level topics while focusing on helping students

understand the fundamental concepts of modern-day physics. Calculus and vector analysis are both painstakingly developed as tools, and then used only insofar as they illuminate the physics. Hecht deliberately paces comfortably, justifies where each topic is going, stops to take stock of where the students have been, and points out the marvelous unity of the discourse. Informed by a 20th century perspective and a commitment to providing a conceptual overview of the discipline, Hecht's CALCULUS 2/e keeps students involved and focused.

Over 350 million years, sharks have evolved into the most successful hunters to roam the seas. This educational and entertaining coloring book focuses on 25 species of shark, ranging in size from the relatively tiny cookiecutter shark (1-1/2 feet long) to the monstrous whale shark (up to 65 feet). Carefully researched and skillfully rendered line drawings depict such fascinating species as the snakelike frilled shark; the thresher shark with its long, scythe-shaped tail; the rare and bizarre goblin shark; the dreaded great white shark, one of the most fearsome predators in the sea, and the swift and graceful blue shark. Also depicted are some of the shark's closest relatives: the spotted ratfish, sting ray, common skate, Atlantic torpedo ray, Atlantic guitarfish and smalltooth sawfish. A fact-filled caption accompanies each of Lynn Hunter's vivid illustrations, providing the sharks' common and scientific names, habitat, behavior, size, color, distinguishing features and other information. Further enhancing the book are a general introduction and a dramatic double-page illustration showing all 25 sharks drawn to scale. Educational and informative, Sharks of the World Coloring Book doubles as an excellent and inexpensive source of royalty-free illustrations for artists and designers.

Neuroscientists once believed your brain was essentially "locked down" by adulthood. No new cells. No major changes. If you grew up depressed, angry, sad, aggressive, or nasty, you'd be that way for life. And, as you grew older, there'd be nowhere to go but down, as disease, age, or injury wiped out precious, irreplaceable brain cells. But over the past five, ten, twenty years, all that's changed. Using fMRI and PET scanning technology, neuroscientists can now look deep inside the human brain and they've discovered that it's amazingly flexible, resilient, and plastic. Pictures of the Mind: What the New Neuroscience Tells Us About Who We Are shows you what they've discovered and what it means to all of us. Through author Miriam Boleyn-Fitzgerald's masterfully written narrative and use stunning imagery, you'll watch human brains healing, growing, and adapting to challenges. You'll gain powerful new insights into the interplay between

environment and genetics, begin understanding how people can influence their own intellectual abilities and emotional makeup, and understand the latest stunning discoveries about coma and "locked-in" syndrome. You'll learn about the tantalizing discoveries that may lead to cures for traumatic brain injury, stroke, emotional disorders, PTSD, drug addiction, chronic pain, maybe even Alzheimer's. Boleyn-Fitzgerald shows how these discoveries are transforming our very understanding of the "self", from an essentially static entity to one that can learn and change throughout life and even master the art of happiness.

Most of us know bits and pieces of our history but would like to be more sure of how it all fits together. The trick is to find a history that is so absorbing you will want to read it from beginning to end. With this book, Desmond Morton, one of Canada’s most noted and highly respected historians, shows how the choices we can make at the dawn of the 21st century have been shaped by history. Morton is keenly aware of the links connecting our present, our past, and our future, and in one compact and engrossing volume he pulls off the remarkable feat of bringing it all together – from the First Nations before the arrival of the Europeans to the failure of the Charlottetown accord and Jean Chretien’s third term as prime minister. His acute observations on the Diefenbaker era, the effects of the post-war influx of immigrants, the flag debate, the baby boom, the Trudeau years and the constitutional crisis, the Quebec referendum, and the rise of the Canadian Alliance all provide an invaluable background to understanding the way Canada works today.

The definitive account of the Jimmy Savile story, from his official biographer Dan Davies has spent more than a decade on a quest to find the real Jimmy Savile, and interviewed him extensively over a period of seven years before his death. In the course of his quest, he spent days and nights at a time quizzing Savile at his homes in Leeds and Scarborough, lunched with him at venues ranging from humble transport cafes to the Athenaeum club in London and, most memorably, joined him for a short cruise aboard the QE2. Dan thought his quest had come to an end in October 2011 when Savile's golden coffin was lowered into a grave dug at a 45-degree angle in a Scarborough cemetery. He was wrong. In the last

few years, Dan has been interviewing scores of people, many of them unobtainable while Jimmy was alive. What he has discovered was that his instincts were right all along and behind the mask lay a hideous truth. Jimmy Savile was not only complex, damaged, and controlling, but cynical, calculating, and predatory. He revelled in his status as a Pied Piper of youth and used his power to abuse the vulnerable and underage, all the while covering his tracks by moving into the innermost circles of the establishment.

For the Palestinians who live in the narrow coastal strip of Gaza, the Israeli invasion of December 2008 was a nightmare of unimaginable proportions: In the 22-day-long action 1,400 Gazans were killed, several hundred on the first day alone. And yet, while nothing should diminish Palestinian suffering through those frightful days, it is possible something redemptive is emerging from the tragedy of Gaza. For, as Norman Finkelstein details, in a concise work that melds cold anger with cool analysis, the profound injustice of the Israeli assault was widely recognized by bodies that it is impossible to brand as partial or extremist. Amnesty International, Human Rights Watch, and the UN investigation headed by Richard Goldstone, in documenting Israel’s use of indiscriminate and intentional force against the civilian population during the invasion (100 Palestinians died for every one Israeli), have had an impact on longstanding support for Israel. Jews in both the United States and the United Kingdom, for instance, have begun to voice dissent, and this trend is especially apparent among the young. Such a shift, Finkelstein contends,

can create new pressure capable of moving the Middle East crisis towards a solution, one that embraces justice for Palestinians and Israelis alike. This new paperback edition has been revised throughout and includes an extensive afterword on the Israeli attack on the Gaza Freedom Flotilla which resulted in the deaths of nine activists and further strained the loyalty of many of Israel's traditional allies around the world. It also contains a brand new appendix in which Finkelstein dissects the official Israeli investigation of the flotilla attack.
