This account describes the author's adventures during an 18-month journey beyond forbidden frontiers in Asia. With minimal equipment and disguised as an itinerant Muslim, he hitch-hiked and walked through southern Turkey, and the Iran of the Ayatollahs, entering Afghanistan illegally in the wake of a convoy of Chinese weapons and then spent months dodging Russian helicopter gunships with the rebel guerillas. He was the first foreigner to cross from Pakistan into the closed western province of China since the revolution on 1949.

Traumatic events happen in every age, yet there is a particularly cataclysmic feeling to our own epoch that is so attractive to some and so terrifying to others. The terrible events of September 11th 2001 still resonate and the repercussions continue to this day: the desperation of immigrants fleeing terror, the uncertainty of Brexit, Donald Trump in the White House, the rise of the alt-right and hard left, increasing fundamentalism, and terror groups intent on causing destruction to the Western way of life. If that were not enough, we also have to grapple with the enormity of climate change and the charge that if we do not act now, it will be too late. Is it any wonder many are left overwhelmed by the events they see on the news? Galvanised by the events outside of his consulting room, in 2015, David Morgan began The Political Mind seminars at the British Psychoanalytical Society and their successful run continues today. A series of superlative seminars, mostly presented by colleagues from the British Society plus a few select external experts, that examine a dazzling array of relevant topics to provide a psychoanalytic understanding of just what is going on in our world. This book is the first in The Political Mind series to bring these seminars to a wider audience. The Unconscious in Political and Social Life contains compelling contributions from Christopher Bollas, Michael Rustin, Jonathan Sklar, David Bell, Philip Stokoe, Roger Kennedy, David Morgan, M. Fakhry Davids, Ruth McCall, R. D. Hinshelwood, Renée Danziger, Josh Cohen, Sally Weintrobe, and Margot Waddell. They investigate so many vital issues affecting us today: the evolution of democracy, right-wing populism, prejudice, the rise of the far right, attitudes to refugees and migrants, neoliberalism, fundamentalism, terrorism, the Palestine-Israel situation, political change, feminism, austerity in the UK, financial globalisation, and climate change. This book needs to be read by all who are concerned by the state of the world today. Psychoanalysis and psychoanalysts with their awareness of what motivates human beings bring clarity and fresh insight to these matters. A deeper understanding of humanity awaits the reader of The Unconscious in Political and Social Life.

Constructing the Subject traces the history of psychological research methodology from the nineteenth century to the emergence of currently favored styles of research in the second quarter of the twentieth century. Kurt Danziger considers methodology to be a kind of social practice rather than simply a matter of technique. Therefore his historical analysis is primarily concerned with such topics as the development of the social structure of the research relationship between experimenters and their subjects, as well as the role of the methodology in the relationship of investigators to each other in a wider social context. The book begins with a historical discussion of introspection as a research practice and proceeds to an analysis of diverging styles of psychological investigation. There is an extensive exploration of the role of quantification and statistics in the historical development of psychological research. The influence of the social context on research practice is illustrated by a comparison of American and German developments, especially in the field of personality research. In this analysis, psychology is treated less as a body of facts or theories than a particular set of social activities intended to produce something that counts as psychological knowledge under certain historical conditions. This perspective means that the historical analysis has important consequences for a critical understanding of psychological methodology in general.

One of the most acclaimed books of our time—the definitive Vietnam War exposé and the winner of the Pulitzer Prize and the National Book Award. When he came to Vietnam in 1962, Lieutenant Colonel John Paul Vann was the one clear-sighted participant in an enterprise riddled with arrogance and self-deception, a charismatic soldier who put his life and career on the line in an attempt to convince his superiors that the war should be fought another way. By the time he died in 1972, Vann had embraced the follies he once decried. He died believing that the war had been won. In this magisterial book, a monument of history and biography that was awarded the National Book Award and the Pulitzer Prize for Nonfiction, a renowned journalist tells

the story of John Vann—"the one irreplaceable American in Vietnam"—and of the tragedy that destroyed a country and squandered so much of America's young manhood and resources.

As Europe's Muslim communities continue to grow, so does their impact on electoral politics and the potential for inclusion dilemmas. In vote-rich enclaves, Muslim views on religion, tradition, and gender roles can deviate sharply from those of the majority electorate, generating severe trade-offs for parties seeking to broaden their coalitions. *Dilemmas of Inclusion* explains when and why European political parties include Muslim candidates and voters, revealing that the ways in which parties recruit this new electorate can have lasting consequences. Drawing on original evidence from thousands of electoral contests in Austria, Belgium, Germany, and Great Britain, Rafaela Dancygier sheds new light on when minority recruitment will match up with existing party positions and uphold electoral alignments and when it will undermine party brands and shake up party systems. She demonstrates that when parties are seduced by the quick delivery of ethno-religious bloc votes, they undercut their ideological coherence, fail to establish programmatic linkages with Muslim voters, and miss their opportunity to build cross-ethnic, class-based coalitions. Dancygier highlights how the politics of minority inclusion can become a testing ground for parties, showing just how far their commitments to equality and diversity will take them when push comes to electoral shove. Providing a unified theoretical framework for understanding the causes and consequences of minority political incorporation, and especially as these pertain to European Muslim populations, *Dilemmas of Inclusion* advances our knowledge about how ethnic and religious diversity reshapes domestic politics in today's democracies.

Confronting Poverty proposes thoughtful reforms in employment and training, child support, health care, education, welfare, immigration, and urban policies, all crafted from the successes, as well as the failures, of policies over the past three decades.

High school "freshperson" Cassie Stephens attempts to rise above such inconveniences of life as her older sister, arguing parents, and school.

In *Naming the Mind*, Kurt Danziger examines the origins and presuppositions underlying psychological categories - from stimulus-response to personality, motivation and cognition.

By turns witty and profound, *The Curious Enlightenment of Professor Caritat* is a novel in the spirit of *Gulliver's Travels* or *Animal Farm*.

Telling the story of the travels of a Professor Caritat, who is in search of the perfect world, Steven Lukes us on an irreverent romp through the history of western political philosophy. Doing for that discipline what *Sophie's World* did for philosophy in general, *The Curious Enlightenment of Professor Caritat* is both a refreshing humorous introduction to the clashing ideologies of our time, and a passionate defence of the much-abused Enlightenment and its core values of reason, freedom and tolerance.

Ian Fleming could not have imagined a better place to set a thriller: an upstart mini-state on the edge of Europe, Transnistria is a nowhere-land, a Soviet museum occupied by Russian peace-keepers near the Black Sea. Its oligarchs in Adidas tracksuits hunt wild boar with AK-47s. Its young people train for revolution at the Che Guevara High School of Political Leadership. Its secret factories have supplied arms to Chechnya and electrical cable to Iran's Bushehr nuclear power plant. Its isolation and tiny size belie the real threat it poses to the West. To many observers, Transnistria is the North Korea of Europe. Yet its new president has launched a cunning coup of political marketing, appointing as his top ministers personable young women like the Facebook-savvy Cheryl Cole lookalike Foreign Minister, sexing-up the republic's image abroad, and using their glitter to obscure this internationally unrecognised non-state's shadowy past. Now Western ambassadors and foreign ministers are queuing up to meet them. Rory MacLean and Nick Danziger, two of Europe's most intrepid travellers and chroniclers, document life in the only country in the world not to have recognised the collapse of the Soviet Union. Readers will find themselves truly back in the USSR... with a difference.

The use of wedge issues such as abortion, gay marriage, and immigration has become standard political strategy in contemporary presidential campaigns. Why do candidates use such divisive appeals? Who in the electorate is persuaded by these controversial issues? And what are the consequences for American democracy? In this provocative and engaging analysis of presidential campaigns, Sunshine Hillygus and Todd Shields identify the types of citizens responsive to campaign information, the reasons they are responsive, and the tactics candidates use to sway these pivotal voters. *The Persuadable Voter* shows how emerging information technologies have changed the way candidates communicate, who they target, and what issues they talk about. As Hillygus and Shields explore the complex relationships between candidates, voters, and technology, they reveal potentially troubling results for political equality and democratic governance. *The Persuadable Voter* examines recent and historical campaigns using a wealth of data from national surveys, experimental research, campaign advertising, archival work, and interviews with campaign practitioners. With its rigorous multimethod approach and broad theoretical perspective, the book offers a timely and thorough understanding of voter decision making, candidate strategy, and the dynamics of presidential campaigns.

"A must-read war memoir... with zero punches pulled, related by one of the most incisive observers of the American political scene." —KIRKUS (starred review) "Funny, biting, thoughtful and wholly original." —Tim O'Brien, author of The Things They Carried Jeff Danziger, one of the leading political cartoonists of his generation, captures the fear, sorrow, absurdity, and unintended but inevitable consequences of war with dark humor and penetrating moral clarity. If there is any discipline at the start of wars it dissipates as the soldiers themselves become aware of the pointlessness of what they are being told to do. A conversation with a group of today's military age men and women about America's involvement in Vietnam inspired Jeff Danziger to write about his own wartime experiences: "War is interesting," he reveals, "if you can avoid getting killed, and don't mind loud noises." Fans of his cartooning will recognize his mordant humor applied to his own wartime training and combat experiences: "I learned, and I think most veterans learn, that making people or nations do something by bombing or sending in armed troops usually fails." Near the end of his telling, Danziger invites his audience—in particular the young friends who inspired him to write this informative and rollicking memoir—to ponder: "What would you do? . . . Could you summon the bravery—or the internal resistance—to simply refuse to be part of the whole idiotic theater of the war? . . . Or would you be like me?"

Unskilled workers once flocked to Detroit, attracted by manufacturing jobs paying union wages, but the passing of Detroit's manufacturing heyday has left many of those workers stranded. Manufacturing continues to employ high-skilled workers, and new work can be found in suburban service jobs, but the urban plants that used to employ legions of unskilled men are a thing of the past. The authors explain why white auto workers adjusted to these new conditions more easily than blacks. Taking advantage of better access to education and suburban home loans, white men migrated into skilled jobs on the city's outskirts, while blacks faced the twin barriers of higher skill demands and hostile suburban neighborhoods. Some blacks have prospered despite this racial divide: a black elite has emerged, and the shift in the city toward municipal and service jobs has allowed black women to approach parity of earnings with white women. But Detroit remains polarized racially, economically, and geographically to a degree seen in few other American cities. A Volume in the Multi-City Study of Urban Inequality "Understanding the Political World" offers a comparative perspective on how politics works at the global, national, group, and individual level. Memory is one of the few psychological concepts with a truly ancient lineage. Presenting a history of the interrelated changes in memory tasks, memory technology and ideas about memory from antiquity to the late twentieth century, this book confronts psychology's 'short present' with its 'long past'. Kurt Danziger, one of the most influential historians of psychology of recent times, traces long-term continuities from ancient mnemonics and tools of inscription to modern memory experiments and computer storage. He explores historical discontinuities, showing how different kinds of memory became prominent at different times, and examines these changes in the context of specific themes including the question of truth in memory, distinctions between kinds of memory, the project of memory experimentation and the physical localization and conceptual location of memory. Danziger's unique approach provides a historical perspective for understanding varieties of reproduction, narratives of the self and short-term memory.
