This book contains a collection of peer-reviewed papers presented at the Eleventh Biennial Modern Studies in Property Law Conference held at Queen's University Belfast in April 2016. It is the ninth volume to be published under the name of the Conference. The Conference and its published proceedings have become an established forum for property lawyers from around the world to showcase current research in the discipline. This collection reflects the diversity and contemporary relevance of modern research in property law. Following a foreword from the keynote speaker at the Conference, Queen's alumnus Lord Kerr of Tonaghmore, the chapters address a range of issues, from the nature of land law and property rights, through claims to the home and digital assets, to the growing debate on the nature of public property. Collectively the chapters demonstrate the vibrancy and importance of property law in dealing with modern concerns across the common law world.

In a typical Wills, Trusts, and Estates (WTE) class there are both students who want to practice in WTE (either exclusively, or as part of a general practice), and those who need only to master the general concepts in order to pass the bar exam. *Wills, Trusts, and Estates in Focus* by Naomi R. Cahn, Alyssa DiRusso, and Susan Gary attends to the needs of both sets of students. For those who will practice in WTE, the concepts are presented in an engaging way and exemplified by realistic hypothetical scenarios that mirror practice and support the development of lawyering skills. For those who need only to pass the bar, the organization of the text is keyed to multi-state essay examination topics as presented on the multi-state bar exam. The well-crafted pedagogy of the Focus Series makes WTE concepts and procedure clear and accessible for all students. Case Previews shed light on each succinctly-edited case, provide legal context, and direct students to the issue at hand. Post-Case Follow-Ups review the decision and prepare students to apply the relevant legal principles to the set of exercises that follow, called Real Life Applications. Professors will appreciate the accessible approach of *Wills, Trusts, and Estates in Focus*, which combines straightforward narrative explanations with real-world examples, and problems designed to engage students in active learning. Features of *Wills, Trusts, and Estates in Focus*: Insightful authorship: The author team consists of three well-known academics with expertise in WTE and complementary areas such as family law, charities, elder law, and tax. All are elected Fellows of the American College of Trust and Estate Counsel (ACTEC), the leading professional organization of trust and estates attorneys. Conscious modernization of the WTE casebook that balances major landmark cases and 21st century authorities, including recent case decisions and developments in the law (such as the 2017 Tax Cuts and Jobs Act) Thorough coverage of core topics, combined with the Focus Series pedagogy Manageable problem sets that allow students to apply doctrine to realistic fact scenarios Research and drafting exercises that support the development of practice-based skills Professors and students will benefit from: Clear writing that promotes the learning outcomes of student competencies in knowledge and understanding of both the substantive and procedural law of WTE legal analysis and reasoning problem-solving how to exercise proper

professional and ethical responsibilities with regard to clients and the legal system A balanced emphasis on practice readiness and bar-exam readiness An author team with experience writing for students, practitioners, and lay people A clear and logical book structure and chapter organization, with cross-references to related coverage in other chapters Appendices that provide examples of how doctrine maps on to practice, as in will contest pleadings and probate filings Teaching materials include: Teacher's Manual with straightforward case summaries and answers to all problems Sample 3-credit syllabus

This affordable, practice-enhancing single volume provides targeted, authoritative coverage of estate and trust law in Illinois- both the legislative and analytical content you need to succeed in practice. The Illinois Greenbook includes the full Estate & Trust law titles found throughout the Illinois Statutes, with expert analysis of how the courts have interpreted Illinois's Estate & Trust law statutes.

Written by well-recognized scholars in the field, *Wills, Trusts, and Estates: The Essentials* by Reid Weisbord, David Horton, and Steven Urice provides a unique platform for teaching Trusts and Estates as an accessible, engaging area of the law. As its title implies, *Essentials* covers only the core legal doctrines and does so in a concise, straightforward format that focuses on practical application rather than theory. The organizational structure of each chapter facilitates student learning by providing: (1) a clear explanation of the doctrine in plain English, (2) an excerpt of relevant statutory authority where applicable, (3) an illustration of the doctrine through a carefully-selected judicial opinion, and (4) an application of the doctrine in a problem set. Each judicial opinion is followed by a series of questions, as well as narrative answers to each question. The problem sets, which are heavily emphasized, simulate the practice of law in a realistic T&E setting. Key Features: Makes a challenging course uniquely accessible. Plain English explanation of legal doctrine at the beginning of each section helps ensure students have a basic foundation of substantive knowledge, allowing the professor to focus classroom discussion on applying the doctrine. Delivers well-edited judicial opinions in a format that allows students to achieve mastery of the materials before entering the classroom. Emphasizes problem-solving through detailed problem sets that allow students to apply newly learned legal doctrine to real-world situations. Offers concise, yet comprehensive coverage. All core Trusts & Estates topics are covered in fewer than 650 pages.

The world has gone digital and so have our clients' estates. Digital assets may simply be electronic records, but they are the digital gateway to our lives. They are our memories, our money, and our records, making technology the new player at the estate planning table. *The Digital Executor®: Unraveling the New Path for Estate Planning* arms estate advisors, business owners, service providers, and the broader estate and technology industries with heightened awareness of client expectations regarding their digital estates. Everyone needs a will and in today's age of digitization, estate plans must include your client's digital life. This book is a primer for understanding a client's personal use case when navigating estate management in the digital age with introductions to technology and the underlying aspects and differences between digital asset classes. With technology being the new player at the client's estate planning table, estate advisors must be educated, motivated, and prepared, adapting policies and processes for operating in the digital world. Equally, technology and service

providers must align with the stars to be integrated partners in estate industry conversations. Sharon's first book, *Your Digital Undertaker: Exploring Death in the Digital Age in Canada*, was about digital assets in the context of an individual's or client's estate planning life cycle. This follow-up book, *Digital Executor®: Unraveling the New Path for Estate Planning* is about digital assets in the context of the estate industry. This book draws the reader into the world of estate planning with a digital twist, bringing together how the global estate industry, technology and service providers must address client expectations about their digital assets and the implications of the changing role of the fiduciary/executor. To understand the role of digital assets in the estate industry, we must first understand technology, the client's user context, and the changing role of the estate advisor. From an estate industry perspective, if today's executor is a digital executor and today's fiduciary is a digital fiduciary, then today's advisor must be a digital advisor.

Every year, there are advances in the way that we deal with information as individuals, governments, and organizations. We live and work predominantly online resulting in an enormous amount of digital data. The way that information is used is constantly changing with individuals, governments, and corporations all involved in collecting, storing, using, disclosing, and transferring information online. The growth in artificial intelligence and its effects on data will impact all individuals. It is imperative that a greater understanding of these new advances is gained, in particular, the legal implications they have for society. Legal Regulations, Implications, and Issues Surrounding Digital Data is an essential research publication that assists readers in understanding the current technology they are using, how digital data is being used by governments and organizations, and the current legal issues surrounding these areas that set out challenges in everyday life. Highlighting topics such as data protection, cybercrime, and privacy, this book is ideal for lawyers, academicians, IT specialists, policymakers, cybersecurity professionals, law professionals, researchers, academicians, and students.

On 17 December 2009, the European Commission for the Efficiency of Justice of the Council of Europe adopted the Guidelines for a better implementation of the existing recommendation of the Council of Europe on enforcement. These principles aim to

guarantee to all the access to an enforcement agent and a quality enforcement in the respect of the fundamental rights of the litigants. In the first part of the book, reference is made to the genesis of the CEPEJ Guidelines on Enforcement as well as to its state of application in the various Council of Europe Member States. The second part of the book deals with the problem of the evolution of technologies and aims to question how artificial intelligence can be put at the service of enforcement. In this respect, the analysis focuses on the importance of both electronic access to information and access to dematerialised information, to highlight the imperative need for a procedure for seizure of dematerialised assets and to consider drafting the a crypto-currency attachment procedure. \*\*\* Le 17 décembre 2009, la Commission européenne pour l'efficacité de la justice du Conseil de l'Europe a adopté des Lignes directrices pour une meilleure mise en œuvre de la recommandation existante du Conseil de l'Europe sur l'exécution. Ces principes visent à garantir à tous l'accès à un agent d'exécution et à une exécution de qualité dans le respect des droits fondamentaux des justiciables. Dans la première partie de l'ouvrage il est fait état de la genèse des Lignes directrices de la CEPEJ sur l'exécution ainsi que de son état d'application au sein des différents États membres du Conseil de l'Europe. La seconde partie de l'ouvrage aborde la problématique de l'évolution des technologies et vise à s'interroger sur la façon dont l'intelligence artificielle peut être mise au service de l'exécution. À cet égard, l'analyse porte sur l'importance tant d'un accès dématérialisé aux informations que d'un accès aux informations dématérialisées, pour relever l'impérieuse nécessité d'une procédure de saisie des avoirs dématérialisés et envisager l'ébauche d'une procédure de saisie des crypto-monnaies.

Digital Technologies and the Law of Obligations critically examines the emergence of new digital technologies and the challenges they pose to the traditional law of obligations, and discusses the extent to which existing contract and tort law rules and doctrines are equipped to meet these new challenges. This book covers various contract and tort law issues raised by emerging technologies – including distributed ledger technology, blockchain-based smart contracts, and artificial intelligence – as well as by the evolution of the internet into a participative web fuelled by user-generated content, and by the rise of the modern-day collaborative economy facilitated by digital technologies. Chapters address these topics from the perspective of both the common law and the civil law tradition. While mostly focused on the current state of affairs and recent debates and initiatives within the European Union regulatory framework, contributors also discuss the central themes from the perspective of the national law of obligations, examining the adaptability of existing legal doctrines to contemporary challenges, addressing the occasional legislative attempts to deal with the private law aspects of these challenges, and pointing to issues where legislative interventions would be most welcomed. Case studies are drawn from the United States, Singapore, and other parts of the common law world. Digital Technologies and the Law of Obligations will be of interest to legal scholars and researchers in the fields of contract law, tort law, and digital law, as well as to

legal practitioners and members of law reform bodies.

What would happen to your money if you died without a Last Will and Testament? What about your stocks, your family business, your home? What would become of your loved ones? Without a final Will, the fate of your life's work is in the hands of the court. Dying without having legally laid out your wishes is a recipe for uncertainty, ill will, financial turmoil, and heartache. You have the power to determine what will happen to your assets after your death.

The process of planning your estate can seem daunting, but with the proper information in hand and an experienced attorney on your side, you can ensure that your final wishes are met and your family taken care of. "The Individual's Guidebook to Wills and Estates" will help you understand the steps necessary to complete your legal plan. Written in understandable and accessible language with real-life examples and filled with sample documents and reference material, this book will give you the tools you need to protect your estate and your loved ones. This new casebook consists of traditional cases, statutes, and materials related to courses associated with wills, trusts, and estates. Particular attention has been directed towards international statutes and their contrast with American statutory and common law; web sites offering forms and additional resources; and the changing nature of federal and state tax considerations. The tax considerations appear throughout the casebook, but professors are offered the opportunity of either addressing taxation in the course or separating it so that it may be addressed in other courses. The authors aim is to provide professors and students with a course of study that is orderly and engaging. To meet this goal, each chapter is preceded by a Tool Bar which indexes the subjects to be discussed. This approach, similar to that found on a computer, offers professors an opportunity for an easy summary or introduction and gives students a visual grasp of the totality of the chapter. Because decedents estates involve families, their creation, dissolution, and interaction, the casebook has a distinctive familial approach, offering a classic death in the family as a starting point and ending with planning for incapacity and the decisions and assistance programs accompanying dependency. The estates of persons in community-property jurisdictions have valuable lessons to share with persons in common-law states and there are multiple examples of these interactions in cases and statutes throughout the book.

This casebook statutory supplement meets the needs of students in basic and advanced courses on wills, trusts, decedents' estates, fiduciary administration, and future interests, providing a compendium of essential uniform act provisions and official comments. It covers a wide range of topics, including intestacy, wills, rules of construction, probate administration, nonprobate transfers, disclaimers, principal and income, prudent investments, perpetuities, trust formation and modification, spendthrift and discretionary trusts, trustee powers and duties, powers of appointment, and powers of attorney. The previous edition has been updated to include the newly-promulgated Uniform Fiduciary Access to Digital Assets Act.

Hailed as one of the best casebooks in legal education, the text combines interesting cases, thoughtful analysis, notes, images, and a clear organization for an excellent teaching tool. Retaining the late Jesse Dukeminier's blend of wit, erudition, and playfulness, the Tenth Edition uses cartoons, illustrations, case documents, and photographs to provide visual commentary that augments the wide-ranging cases and other readings. Sidebars on relevant but unique persons, places, and events provide thought-provoking and fascinating context. This casebook is not only fun to read, but fun for professors to teach. New to the Tenth Edition: All new section on electronic or digital wills and the emerging case law that has begun to accept them All new section on trust decanting, now recognized in 25 states, with attention to the breadth of statutory and case law treatments of decanting Reworked coverage of same-sex marriage in light of Obergefell v. Hodges and refreshed treatment of inheritance rights for cohabiting unmarried partners Updated and expanded coverage of wealth and income inequality Refreshed treatment, with updated case law, on undue influence Attention to new case law and statutory developments in will execution and reformation of wills for mistake Revised and clarified coverage of revocable trusts and other nonprobate transfers and the difficult relationship of state wealth transfer law with

federal pension law Updated treatment of trust fiduciary law, including new case law and statutory developments on directed trusts, waiver of fiduciary duties, and trust investment law Revised treatment of creditor rights to beneficial interests in trust, with attention to choice-of-law rules and growing statutory recognition of self-settled asset protection trusts

Annotation New edition of a study of the law of electronic commerce, which requires the simultaneous management of business, technology and legal issues. Winn (law, Southern Methodist U.) and Wright (a business lawyer in Dallas) present 21 chapters that discuss introductory material such as business and technologies of e-commerce, getting online, jurisdiction and choice of law issues, and electronic commerce and law practice; contracting; electronic payments and lending; intellectual property rights and rights in data; regulation of e-business markets; and business administration. This book can help you leave the digital legacy you want.

Almost without realizing it, we have shifted toward an all-digital culture. Future heirlooms like family photos, home movies, and personal letters now exist only in digital form, and in many cases they are stored using popular services like Flickr, YouTube, and Gmail. These digital possessions form a rich collection that chronicles our lives and connects us to each other. But have you considered what will happen to your treasured digital possessions when you die? Unfortunately the answer isn't as certain as we might presume. There are numerous legal, cultural, and technical issues that could prevent access to these assets, and if you don't take steps to make them available to your heirs, your digital legacy could be lost forever. Written by the creators of TheDigitalBeyond.com, this book helps you secure your valuable digital assets for your loved ones and perhaps posterity. Whether you're the casual email user or the hyper-connected digital dweller, you'll come away with peace of mind knowing that your digital heirlooms won't be lost in the shuffle. "Death is the final frontier of cyberspace—and this book provides a road map to the key issues, problems and future prospects for bridging this ultimate transition with dignity, security and grace." — Daniel "Dazza" Greenwood, Executive Director of the eCitizen Foundation "To be ahead of one's time usually means stepping to the side of one's time in order to see it clearly. This book does just that, putting our digital lives and afterlives into sharp focus. Fascinating." — David Eagleman, neuroscientist and author "Casebook for law students in a Wills, Trusts, and Estates course"--
