"Complete: law solution"--Page 4 of cover.

Providing an essential resource for a first course in equity and trusts, Complete Equity and Trusts provides an accessible blend of cases, materials, and clear explanatory text. Designed to offer a comprehensive and stand-alone resource, the range of supporting features ensures that students feel confident in tackling the complex and diverse issues related to this field of law. Key terms and cases are highlighted throughout, while learning objectives, self-test questions, and concluding summaries for each chapter help to reinforce students' understanding and fully prepare them for assessment.

It has been estimated that there are approximately 45,000 voluntary organisations in Scotland, the majority of which are unincorporated associations. Such associations vary in size and structure and the objects and purposes range from purely charitable purposes at one end to purely member-interested purposes at the other. Within that range are a large number of associations which are not registered as charities but which are established for public benefit purposes (making up, with charities, the "Third Sector"). Scotland shares with the other parts of the United Kingdom a law of unincorporated associations which rests upon common law and has been little developed by statute. Its most striking feature is the absence of legal personality accorded to associations and clubs which do not choose to establish themselves as companies or as some other form of incorporated body. The current law does not recognise the existence of such organisations as separate legal entities. The Commission states that the definition of unincorporated associations should be an association which should have at least two members; that its objects do not include making a profit for its members; and that it has adopted a constitutive document containing certain minimum specified provisions. Minimum provisions are: the name of the association; the purpose for which it exists; the criteria for membership; the procedure for election or appointment of those managing the association; the powers and duties of its office-bearers (if any); the rules for distribution of its assets on dissolution; and the procedure for amendment of the constitutive document.

"This fifth edition retains its hallmark combination of a contextualised approach and a commercial focus. Recent developments, such as the Charities Act, are explored, the examination of the law of trusts and taxation is restructured and comparative examples help students understand the directions taken in the law of equity. Trusts Law brings a modern perspective to a subject often perceived as traditional, with suggestions for further reading guiding the student to contemporary debates"--Provided by publisher.

Excerpt from Commentaries on the Law of Private Corporations, Vol. 1 of 2: Whether With or Without Capital Stock, Also of Joint-Stock Companies and of All the Various Voluntary Unincorporated Associations Organized for Pecuniary Profit or Mutual Benefit In such an undertaking, carried forward in connection with an active practice, and now likely, as it seems, to be completed within a period of seven or eight years from the time when work was begun, even a very modest success would have been impossible but for the intelligent assistance which it gives me pleasure to acknowledge I have had, at almost every stage of the work, from my friend Edwin A. Pratt, Esq., of the Louisville bar. To his learning, faithfulness, patience and exceeding skill the profession owe much of what is valuable in these volumes. Written in a fresh and lively style and supported by a strong analytical framework, the sixth edition of Pearce & Stevens' Trusts and Equitable Obligations continues to provide students with a relevant and exciting examination of a subject that can seem remote and difficult. Revised diagrams and flow charts help to explain difficult topics such as the operation of the *pari passu*, first in, first out, and rolling charge methods of allocating funds between contributors and the circumstances in which strangers can be held personally liable as dishonest accessories to or knowing recipients of trust property in breach of trust. The authors take a modern and conceptual approach to the wide array of topics covered in undergraduate equity and trusts modules, helping students explore the many ways trusts impact on everyday life and in the world of finance and commerce. The text is accessible without compromising detailed critical comment, and engages with key issues such as the protection of privacy, enforcing informal promises, trusts and the family home, and assessing public interest in charities. Extensive rewriting has enabled the incorporation of substantial new material without an increase in the overall length of the book.

The economic importance of the non-profit sector is growing rapidly in the USA and Europe. However, the law has not kept abreast with its development. The European Court of Justice has extended certain freedoms of the EC Treaty to non-profit organisations, and more case law is expected to follow in the near future, but the observations, theories, solutions and legal and non-legal rules in this field are manifold. The chances of harmonising the law on a European level are slim. Despite these differences, a common core of international corporate governance problems and regulatory solutions can be seen. This volume of essays brings together a variety of international experts from both corporate governance and governance of non-profit organisations to compare the two areas and explore the lessons that can be learned regarding comparative corporate governance for non-profit organisations.

The Uniform Partnership Act (1997) (RUPA) is a far-reaching revision and modernization of the law of partnerships. This prototype agreement explores how a partnership agreement can be crafted to the new environment.
