This comprehensive resource is an invaluable teaching aid for adding a global dimension to students' understanding of American history. It includes a wide range of materials from scholarly articles and reports to original syllabi and ready-to-use lesson plans to guide teachers in enlarging the frame of introductory American history courses to an international view. The contributors include well-known American history scholars as well as gifted classroom teachers, and the book's emphasis on immigration, race, and gender points to ways for teachers to integrate international and multicultural education, America in the World, and the World in America in their courses. The book also includes a 'Views from Abroad' section that examines problems and strategies for teaching American history to foreign audiences or recent immigrants. The Americans focuses on nine themes: Diversity and the national identity; America in world affairs; Economic opportunity; Science and technology; Women and political power; Immigration and migration; States' rights; Voting rights; Civil rights. - p. [xxviii]. "A picture book look at many of the men and women who revolutionized life for African Americans throughout history"--

A Young People's History of the United States brings to US history the viewpoints of workers, slaves, immigrants, women, Native Americans, and others whose stories, and their impact, are rarely included in books for young people. A Young People's History of the United States is also a companion volume to The People Speak, the film adapted from A People's History of the United States and Voices of a People's History of the United States. Beginning with a look at Christopher Columbus's arrival through the eyes of the Arawak Indians, then leading the reader through the struggles for workers' rights, women's rights, and civil rights during the nineteenth and twentieth centuries, and ending with the current protests against continued American imperialism, Zinn in the volumes of A Young People's History of the United States presents a radical new way of understanding America's history. In so doing, he reminds readers that America's true greatness is shaped by our dissident voices, not our military generals. "On January 20, 2021, Amanda Gorman became the sixth and youngest poet, at age twenty-two, to deliver a poetry reading at a presidential inauguration. Her inaugural poem, 'The Hill We Climb,' is now available to cherish in this special edition"

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans

during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

This book offers the tools teachers need to get started with an innovative approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets Common Core State Standards (grades 7-12). The author provides over 60 primary sources organized into 7 thematic units, each structured around an essential question from U.S. history. As students analyze carefully excerpted documents--speeches by presidents and protesters, Supreme Court cases, political cartoons--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century American. Each unit connects to current events and dynamic classroom activities make history come alive. In addition to the documents themselves, this teaching manual provides: strategies to assess student learning; mini-lectures designed to introduce documents; activities to help students process, display, and integrate their learning; guidance to help teachers create their own units, and more.

The premise of the Teaching American History (TAH) project—a discretionary grant program funded under the U.S. Department of Education’s Elementary and Secondary Education Act—is that in order to teach history better, teachers need to know more history. Unique among professional development programs in emphasizing specific content to be taught over a particular pedagogical approach, TAH grants assist schools in implementing scientifically-based research methods for improving the quality of instruction, professional development, and teacher education in American history. Illustrating the diversity of these programs as they have been implemented in local education agencies throughout the nation, this collection of essays and research reports from TAH participants provides models for historians, teachers, teacher educators, and others interested in the teaching and learning of American History, and presents examples of lessons learned from a cross-section of TAH projects. Each chapter presents a narrative of innovation, documenting collaboration between classroom, community, and the academy that gives immediate and obvious relevance to the teaching and learning process of American history. By sharing these narratives, this book expands the impact of emerging practices from individual TAH projects to reach a larger audience across the nation.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

These articles and book reports have been written in the hope that readers could believe as I do that the world, including our country, is in great danger for multiple of reasons: 1.The spread of adherents to Islam threaten to engulf all persons of different faiths. They are winning through violence but also just by having more babies than every other culture. The leaders of Europe and America refuse to accept how evil this belief system is and how they have only one agenda-and that is to have dominion over all nations. 2.Our Constitution has been destroyed by the administration of President Obama and the Supreme Court. He does whatever he wants regardless of the Congress. The Court extended the commerce authority to allow the government to force citizens to purchase a service and allowed the corporations to spend anything they want to affect the outcome of elections. 3.We are drowning in debt but continue to add costly programs, making it even worse without making any attempt to reduce the strain. Military adventures continue without end. Government handouts to the so-called needy have created a permanent underclass of people being supported while not required to put forth effort. 4.The government refuses to take the steps needed to become energy efficient, which could be accomplished easily, thereby freeing us from OPEC. For those of you who don't remember, in the '50s, we exported oil.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.
