

# Usborne The Big Bug Search Great Searches

A number book like no other, introducing children to the significance of different numbers and the things they are associated with. Did you know that an octopus has 3 hearts, every snowflake has 6 points, giraffes have 7 bone in their necks, cloud cover is measure in 'oktas' from 0 to 8, and that 9 is lucky in China (but unlucky in Japan)? An unusual approach to a numbers book and a gorgeous and slightly eccentric illustration style will make this title stand out in a crowded retail environment. By the team who worked together on the acclaimed My First 100 Words Book, Count to 100 and the award-winning Big Book of Colours (winner of the School Library Association's Under 7 Children's Choice Award 2016). An effortless and enjoyable way for children to learn about topics as diverse as fractions, counting, shapes, measuring, music, dates, animals, space, sports, geography and mythology through the magic of numbers.

This text takes readers on a trip around the world, with all kinds of puzzles and games to do along the way. Each picture brings to life a different place, from a market in Thailand to a ski resort in the Alps. Small pictures around the edge of the page show things to spot, and easy-to-read captions provide snippets of information. There is also a present to find on every double-page spread and clues on where to go next - it won't be the next page in the book. Come on a bug hunt in this little flap book. Peep under leaves and into hives to see where all kinds of bugs live, and find out how some build their own homes. A new book in the delightful, popular series written by Anna Milbourne introducing young children to the natural world around them. The simple, clear information about bug homes has been
