Tropical diseases pose an increasing problem for US and international travellers who travel to tropical regions. Physicians need to be aware of the wide spectrum of tropical, infectious, and parasitic diseases that patients may be exposed to. This issue of Infectious Disease Clinics includes articles written by global experts and includes topics such as range/classification of tropical diseases, venomous bites and stings, malaria, and bacterial gastrointestinal infections. Tracing the development of narrative verse in London's literary circles during the 1590s, this volume puts Shakespeare's *Venus and Adonis* and *The Rape of Lucrece* into conversation with poems by a wide variety of contemporary writers, including Thomas Lodge, Francis Beaumont, Christopher Marlowe, Thomas Heywood, Thomas Campion and Edmund Spenser. Chapters investigate the complexities of this literary conversation and contribute for the current, vigorous reassessment of humanism's intended consequences by drawing attention to the highly diverse forms of early modern classicism as well as the complex connection between Latin pedagogy and vernacular poetic invention. Key themes and topics include: -Epyllia, masculinity and sexuality -Classicism and commerce -Genre and mimesis -Rhetoric and aesthetics

Since Ovid, the concept of metamorphosis has been an irresistible temptation for writers, not only as a metaphor for shifting personal identity but as a way of exploring ideas of cultural and political transition. The essays in this volume show how authors from Ovid, Chaucer, and Shakespeare to Thomas Mann, Karen Blixen, and 20th-century science fiction writers, have used this pervasive concept to raise fundamental questions about the nature and agency of radical change. Among the broad topics addressed are how shifts in scientific understanding intersect with and even effect transformations in literary expression; the differing values attached to the language of metamorphosis over time; and the connection between these values and structures of power, particularly gender relations. In addition to the editors, the contributors are Darko Suvin, Alessandro Perutelli, Elsa Linguanti, Douglas Burnham, Enrico Giaccherini, Lia Pacinotti, Michael St John, Rocco Coronato, Silvia Bruti, Elisabetta Cori, Judith Rorai Milanesi, Catherine Burgass, Luca Biagiotti, Stefania Magnoni, Daniel Weavis, Julian North, Ashley Chantler, Martin Halliwell, Patrick Quinn, Roberta Ferrari, Silvia Bigliuzzi, and Nicoletta Caputo.
