To be a storyteller is an incredible position from which to influence hearts and minds, and each one of us has the capacity to utilise storytelling for a sustainable future. This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy. Stories can shape our perspective of the world around us and how we interact with it, and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted. The craft of storytelling is as old as time and has influenced human experience throughout the ages. The conscious use of storytelling in higher education is likewise not new, although less prevalent in certain academic disciplines; what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area. Written by academics and storytellers, the book is based on the authors' own experiences of using stories within teaching, from a story of "the Ecology of Law" to the exploration of sustainability in accounting and finance via

contemporary cinema. Practical advice in each chapter ensures that ideas may be put into practice with ease. In addition to examples from the classroom, the book also explores wider uses of storytelling for communication and sense-making and ways of assessing student storytelling work. It also offers fascinating research insights, for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories. Everyone working as an educator should find some inspiration here for their own practice; on using storytelling and stories to co-design positive futures together with our students. The author shared personal reflections, anecdotes, wisdom, and guidance in his letters to Francesca, a first-year teacher, as he attempted to help her deal with the challenges she faced and encouraged her to do her best.

Business presentations could be simpler, more engaging and so much more effective, and our business lives so much more rewarding if we remember to restore the emotional power of storytelling. In an age that is Data Rich but Insight-Poor and when most people in the world of business find themselves caught up in a system of numbers and spread sheets, this book shows that the time has come to restore the lost art of storytelling; to put the "author" back in "authority"; to write less and think more. Through a simple step-by-step approach, the author

Through accessible language and candid discussions, *Storytelling for Social Justice* explores the stories we tell ourselves and each other about race and racism in our society. Making sense of the racial constructions expressed through the language and images we encounter every day, this book provides strategies for developing a more critical understanding of how racism operates culturally and institutionally in our society. Using the arts in general, and storytelling in particular, the book examines ways to teach and learn about race by creating counter-storytelling communities that can promote more critical and thoughtful dialogue about racism and the remedies necessary to dismantle it in our institutions and interactions. Illustrated throughout with examples drawn from contemporary movements for change, high school and college classrooms, community building and professional development programs, the book provides tools for examining racism as well as other issues of social justice. For every facilitator and educator who has struggled with how to get the conversation on race going or who has suffered through silences and antagonism, the innovative model presented in this book offers a practical and critical framework for thinking

Fox Eades shows how storytelling is a crucial element of children's education that can enrich the school curriculum and encourage social and thinking skills. She discusses the different kinds of story that are useful in the classroom, and explores the impact of individual and group dynamics on the telling and reception of these stories.

This practical handbook begins with the philosophy and psychology underpinning the therapeutic value of story telling. It shows how to use story telling as a therapeutic tool with children and how to make an effective response when a child tells a story to you. It is an essential accompaniment to the "Helping Children with Feelings" series and covers issues such as: Why story telling is such a good way of helping children with their feelings? What resources you may need in a story-telling session? How to construct your own therapeutic story for a child? What to do when children tell stories to you? Things to do and say when working with a child's story.

Children love family storytelling and parents can learn this practical, magical art. Here are methods, tips and resources to enable you to: create a listening space, use the day's events and rhythms to make stories, transform old stories and make up new ones, bring your personal and family stories to life, learn stories by heart using pictures, inner theatre, walk-about, singing the story and other methods, and find the tale you want from Nancy's rich story-cupboard.

foretelling the ways the future is approaching the present, prompting a re-storying of the past. Storytelling has progressed and is about a diversity of voices, not just one teller of one past; it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present. With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies. Within this exciting new book, David M. Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future. This, after all, is where management practice concentrates its storytelling, while much of the theory and method work is all about how the past might recur in the future. *Storytelling Organizational Practices* takes the reader on a journey: from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re-storying of the past.

Like Stephen Krashen's important work in *The Power of Reading*, *Story Proof* collects and analyzes the research that validates the importance of story, story reading, and storytelling to the brain development and education of children and adults.

Accomplished researcher and storyteller Kendall Haven, establishes the need for understanding the research findings in neural psychology and brain development and the value of a common definition of story if one is to fully grasp the importance and necessity of story to the development of the human mind. To support his case, he reviews a wealth of research from storytellers, teachers, and others who have experienced the power of story firsthand. The author has collected anecdotal experiences from over 100 performing storytellers and from 1,800 story practitioners (mostly teachers) who have made extensive use of stories. He has read more than 150 qualitative and quantitative research studies that discuss the effectiveness of stories and/or storytelling for one or more specific applications (education, organizational management, knowledge management, medical and narrative therapy, etc.). Forty of these studies were literature reviews and comparative studies including analysis of over

Storytelling in Early Childhood is a captivating book which explores the multiple dimensions of storytelling and story acting and shows how they enrich language and literacy learning in the early years. Foregrounding the power of children's own stories in the early and primary years, it provides evidence that storytelling and story acting, a pedagogic approach first developed by Vivian Gussin Paley, affords rich opportunities to foster learning within a play-based and language-rich curriculum. The book explores a number of themes and topics, including: the role of imaginary play and its dynamic relationship to narrative; how socially situated symbolic actions enrich the emotional, cognitive and social development of children; how the interrelated practices of storytelling and dramatisation enhance language and literacy learning, and contribute to an inclusive classroom culture; the challenges practitioners face in aligning their understanding of child literacy and learning with a narrow, mandated curriculum which focuses on measurable outcomes. Driven by an international approach and based on new empirical studies, this volume further advances the field, offering new theoretical and practical analyses of storytelling and story acting from complementary disciplinary perspectives. This book is a potent and engaging read for anyone intrigued by Paley's storytelling and story acting curriculum, as well as those practitioners and students with

Learning Through Storytelling in Higher Education explores ways of using storytelling as a teaching and learning tool. When storytelling is formalized in meaningful ways, it can capture everyday examples of practice and turn them into an opportunity to learn - encouraging both reflection, a deeper understanding of a topic and stimulating critical thinking skills. The technique can accommodate diverse cultural, emotional and experiential incidents, and may be used in many different contexts eg formal/informal; one-on-one/group setting. The authors outline the different models of storytelling and explain how to make use of this technique and encourage a 'storytelling culture' within the workplace or in tutorial sessions. Academic yet accessible, this book provides a new perspective on learning techniques and will be a great asset to any educator looking to improve reflective practice.

Connections. We all want them. We seek them in our everyday lives, in our relationships with people, places and things. Emotion is at the heart of any meaningful connection, and how we talk to each other taps into it. Our character, brought to life through our voice, is the most powerful tool we have to connect with people, especially when it comes to connecting on an emotional level. In the past, a transactional relationship with customers was sufficient. A simple

This book focuses on the role of a voice and tone strategy as a part of a successful content strategy. *Voice and Tone Strategy: Connecting with People through Content* shows you how to create a voice and tone strategy that addresses customer needs and helps you build exceptional customer relationships.

Storytelling with Data: A Data Visualization Guide for Business Professionals John Wiley & Sons Since the early 2000s, storytelling as a means of managerial communication has been increasingly advocated, with a focus on the management practices of leadership, change and organizational culture. Most research on storytelling in management practice derives from practitioner experience, but little is known about the specific dynamics behind storytelling as a tool for managerial communication. This book derives from one of the first research studies into storytelling in management practice, which sought to evaluate the assumed, but not necessarily proven, effectiveness of storytelling as a management tool. Building on existing theories of narrative and storytelling in organizations, the book explores how managers use storytelling in their daily practice, revealing that it can be employed both, purposively - like a tool, and perceptively - spontaneously and intuitively. The book explains that storytelling has different functions in management practice at different levels of the organization, such as: Creating direction for the organization Translating strategic messages into operational ones and supporting the professional development of staff Shaping the organization's social fabric through the sharing of personal stories Aided by a wealth of interviews and case studies,

Storytelling in Management Practice reveals an analysis of the dynamic relationship between story, storyteller, audience and organizational context. As such, it will be useful for students and researchers working across a variety of sub-disciplines, including: leadership, organizational behaviour and business communication.

Can you captivate an audience with your story? Many of us would love to hold the attention of a crowd, a classroom, or just a group of our friends by telling them a great story. We have felt the pressure of a public presentation or the disappointment of telling a story that others ignore. We are ready to be heard, ready to captivate. In *The Art of Storytelling*, John Walsh takes us through the steps to presenting a compelling story—outlining the strategies that helped him move from stutterer to storyteller. This book will help any person with a story to share by walking you through all aspects of presentation . . . from what to do with your hands as you speak all the way to crafting a killer ending. Whether you're telling bedtime stories to your children or Bible stories to a congregation, this book will take your storytelling to a new level. "In *Story* screenwriting guru Robert McKee presents his powerful and much sought-after knowledge in a comprehensive guide to the essentials of screenwriting and storytelling." -- Methuen.

Take control of your communications—before someone else does What if someone told you that your behavior was controlled by a powerful, invisible force? Most of us would be skeptical of such a claim—but it's largely true. Our brains are constantly transmitting and receiving signals of which we are unaware. Studies show that these constant inputs drive the great majority of our decisions about what to do next—and we become conscious of the decisions only after we start acting on them. Many may find that disturbing. But the implications for

leadership are profound. In this provocative yet practical book, renowned speaking coach and communication expert Nick Morgan highlights recent research that shows how humans are programmed to respond to the nonverbal cues of others—subtle gestures, sounds, and signals—that elicit emotion. He then provides a clear, useful framework of seven “power cues” that will be essential for any leader in business, the public sector, or almost any context. You’ll learn crucial skills, from measuring nonverbal signs of confidence, to the art and practice of gestures and vocal tones, to figuring out what your gut is really telling you. This concise and engaging guide will help leaders and aspiring leaders of all stripes to connect powerfully, communicate more effectively, and command influence.

Listen deeply. Tell stories. This is the mantra of the Center for Digital Storytelling (CDS) in Berkeley California, which, since 1998 has worked with nearly 1,000 organizations around the world and trained more than 15,000 people in the art of digital storytelling. In this revised and updated edition of the CDS's popular guide to digital storytelling, co-founder Joe Lambert details the history and methods of digital storytelling practices. Using a "7 Steps" approach, Lambert helps storytellers identify the fundamentals of dynamic digital storytelling--from seeing the story, assembling it, and sharing it. As in the last edition, readers of the fourth edition will also find new explorations of the applications of digital storytelling and updated appendices that provide resources for budding digital storytellers, including information about past and present CDS-affiliated projects and place-based storytelling, a narrative-based approach to understanding experience and landscape. A companion website further brings the entire storytelling process to life. Over the years, the CDS's work has transformed the way that community activists, educators, health and human services agencies, business professionals,
