Valutare la ricerca scientifica ,2010

La valutazione della ricerca scientifica: indicatori, qualità e impatto Giovanna Loggia,2013-06-12 «La realizzazione di un sistema di valutazione della qualità della ricerca è un passo ineludibile per qualsiasi Paese che voglia continuare ad investire in conoscenza ed in innovazione e che intenda essere realmente competitivo sul piano globale. Nella costruzione di questo sistema non può mancare la “valutazione della valutazione”, entrando nel merito delle procedure adottate dagli Organismi preposti alla funzione e degli aspetti metodologici che le hanno caratterizzate. Anche in questo ambito, ugualmente fondamentale per la realizzazione di un valido sistema di valutazione della ricerca pubblica, saranno necessari testi, studi, articoli, saggi che come questo prodotto da Giovanna Loggia dovranno essere semplici, diretti, idonei ad essere strumenti agili di approfondimento di problematiche estremamente importanti per il futuro stesso della ricerca nel nostro Paese» dalla “Introduzione” di Guglielmo Trupiano

*The Evaluation of Research in Social Sciences and Humanities* Andrea Bonaccorsi,2018-01-04 This book examines very important issues in research evaluation in the Social Sciences and Humanities. It is based on recent experiences carried out in Italy (2011-2015) in the fields of research assessment, peer review, journal classification, and construction of indicators, and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities. Several chapters analyse original data made available through research assessment exercises. Other chapters are the result of dedicated and independent research carried out in 2014-2015 aimed at addressing some of the debated and open issues, for example in the evaluation of books, the use of Library Catalog Analysis or Google Scholar, the definition of research quality criteria on internationalization, as well as opening the way to innovative indicators. The book is therefore a timely and important contribution to the international debate.

**Enlarging one's vision** S. Polenghi,G. Bandini,2015-05-22 Il processo di internazionalizzazione della ricerca negli ultimi anni ha subito una rapida accelerazione ed ha comportato una serie di innovazioni. Il volume fornisce una serie di indicazioni e strumenti, per facilitare l'acquisizione di una certa dimestichezza con tali processi: come partecipare a congressi

rispondendo a call for paper, come pubblicare su riviste straniere, come trascorrere un periodo di studio all'estero e via dicendo. Il libro raccoglie 15 saggi brevi, chiari, concreti e critici al contempo, opera di studiosi già noti e altri più giovani, tutti esperti dell'argomento (G.Bandini, A.Barousse, P.Bianchini, M.Brunelli A.Cagnolati, L.Cappelli, D.Caroli, D.De Salvo, A.Debè, J.L.Hernández Huerta, F.Loparco, J.Meda, E.Patrizi. S.Polenghi, F.Pruneri).

Academic Freedom Under Pressure? Margrit Seckelmann,Lorenza Violini,Cristina Fraenkel-Haeberle,Giada Ragone,2021-08-26 Is academic freedom threatened? The book examines current challenges to academic freedom in Europe, focusing mainly on Italy and Germany. The cases discussed demonstrate that research and teaching are under pressure in European democracies: in Hungary and Poland due to political constraints, in other countries due to societal expectations. Considering different interrelated aspects, the four parts of the book explore many real and potential threats to universities, scientific institutions and researchers, ranging from the European dimension of freedom of the arts and sciences to comparative analysis of emerging challenges to academic freedom against the backdrop of the COVID-19 pandemic. They highlight threats to university autonomy from the economic orientation of university governance, which emphasizes efficiency, competition, and external evaluation, and from new rules concerning trigger warnings, speech restrictions, and ethics commissions. Detailed study of these complex threats is intended to stimulate scholarly reflection and elicit serious discussion at European and national level. The volume contributes to the search for a new role of universities and scientific institutions and is addressed to academics and political stakeholders.

*Bridging Between Cultural Heritage Institutions* Tiziana Catarci,Nicola Ferro,Antonella Poggi,2014-01-22 This book constitutes the thoroughly refereed proceedings of the 9th Italian Research Conference on Digital Libraries, held in Rome, Italy, in January/February 2013. The 18 full papers presented together with an invited paper and a panel paper were selected from extended versions of the presentations given at the conference. **A Lonely Road** AA.VV.,2020-01-21 Nowadays solitude is everywhere. Increasingly similar to monads, we are losing the ability to build solid connections between us, and to convert our private experience into public matter. What is becoming lost is an «art of translation», the capacity to build bridges between private problems and troubles and common causes, something that may connect people and make them act in accord: that is, politics as an art to «bring us together».The goal of

this book is to question, in many different ways, the link between solitude and politics. It is the result of a collective work of young researchers, trying to understand, and to fight, their own solitude and loneliness within the academia. It offers a preliminary interdisciplinary discussion aiming to forge the tools to grasp this strange oxymoron, to better comprehend this simultaneously individual and collective condition.

**I Convegno della Società italiana di scienze bibliografiche e biblioteconomiche (SISBB)** Giovanna Granata, 2024-09-23 La Società italiana di scienze bibliografiche e biblioteconomiche (SISBB) si è costituita, alla fine del 2011, come associazione accademica rappresentativa diversi aspetti delle discipline del libro. A dieci anni dalla sua nascita, ha deciso di avviare una serie di convegni, aperti a tutti gli ambiti di studio che ne caratterizzano l'orizzonte scientifico, quale occasione di incontro e di riflessione tra i soci. Il primo convegno, svoltosi a Cagliari dal 22 al 24 settembre 2022, dopo anni di conferenze virtuali è stato volutamente organizzato in presenza per consentire modalità più dirette di scambio e dialogo. Si è trattato di un'opportunità utile per condividere esperienze, idee, progetti di ricerca e per delineare nuove strade per il futuro delle biblioteche, messe a dura prova dalla chiusura forzata durante la crisi pandemica. Il volume rende disponibili gli Atti del convegno al quale, oltre ai soci SISBB, hanno contribuito alcuni ospiti esterni alla Società che hanno consentito di ampliare il quadro di riferimento anche al contesto internazionale.

**Quality Assurance in Higher Education** Stamelos Georgios, K.M. Joshi, Saeed Paivandi, 2017-01-30 The significant growth of number of students enrolled in tertiary education institutions in the recent past decades has caused an unprecedented expansion of higher education systems. The rapid and constant social, economic and technological mutations and international competition make the importance of qualitatively well-educated citizenry and labor forces very decisive. Globalization has developed a powerful impact on the development of higher education and imposes new challenges for the organization (standards, financing, regulations). Systems of higher education tend to detach from the national models and adopt a more global orientation. The implementation of quality assurance is one of the recent and most decisive transformations of higher education. Different higher education systems are trying to develop assessment tools (internal and external) to improve the quality of teaching, research and extension activities, and these are either based on experiences of selected countries or are extensively country specific. The quality assurance procedures that were often dependent on national directorial traditions have gradually tended to converge and led to a setup of common tools and standards. Countries under a centralized system tend to impose a uniform and general model while decentralized systems give greater freedom to universities to set up their own quality. International rankings of universities also contribute to impose a set of transnational standards and values, which is also being considered as indicative by the stakeholders. The present book tries to look at the quality assurance mechanism, international rankings and its impact in both absolute and comparative fashion in context of 11 countries from different parts of the world.

*Università e nuove forme di valutazione* Simona Colarusso, Orazio Giancola, 2020-07-29 Dalla fine degli anni '90, il sistema universitario italiano è stato protagonista di interventi riformisti che ne hanno cambiato la struttura didattica, le dinamiche di reclutamento, gli assetti gestionali ed organizzativi con impatti enormi sulla vita degli accademici. Negli stessi anni le immatricolazioni si sono stabilizzate, seppure con alterne fluttuazioni, configurando l'istruzione universitaria come "istruzione di massa". Parallelamente i forti tagli alla spesa per università e ricerca, contrariamente al discorso pubblico sulla transizione alla "società della conoscenza", hanno messo a dura prova la tenuta del sistema universitario nel suo complesso. In questo intricato quadro le politiche di valutazione hanno contribuito a trasformare le pratiche, le strategie e i comportamenti delle istituzioni e del corpo accademico. Nel presente volume l'attenzione è posta proprio sui mutamenti nella produzione scientifica (come espressione dell'attività di ricerca), nelle scelte strategiche e negli atteggiamenti degli accademici, tentando di evidenziare gli effetti di condizionamento a livello aggregato, di singola istituzione ed individuale.

**La rivoluzione incompiuta** Roberto Caso, 2020-01-23 Se si domanda a una persona di buon senso «a chi appartiene la scienza?», la risposta più probabile è: «a tutti!». Dietro il velo di una risposta istintiva e (apparentemente) superficiale si nasconde la storia dell'eterno conflitto tra apertura e chiusura della conoscenza, tra pubblicità e segretezza. Un conflitto che assume connotati peculiari nell'era digitale. All'alba dell'era di Internet una parte della comunità scientifica ha coltivato la speranza di potenziare il discorso scientifico e l'uso pubblico della ragione creando una Rete democratica delle menti. Questa speranza oggi appare minacciata dalla mercificazione della conoscenza e dalle forze che mirano ad accentrare il potere decisionale nelle mani di pochi. La scienza sembra sempre più in crisi. L'apertura può curare la crisi in cui versa la scienza? Cosa significa "scienza aperta"? Le risposte contenute nel libro sono parziali e attengono al dilemma evocato nel suo titolo: diritto d'autore o proprietà intellettuale?

*Bibliometria e scienze del libro: internazionalizzazione e vitalità degli studi italiani* Turbanti, Simona, 2017-03-22 La vitalità di un settore scientifico è normalmente attestata dalla ricaduta che le ricerche e le pubblicazioni hanno sulla comunità degli studiosi che la praticano e, quindi, sullo sviluppo della disciplina stessa e delle sue metodologie. Il grado di 'salute' di un campo di studio, nonché la sua capacità di uscire fuori dalla propria nicchia di studiosi e di vedere riconosciuta la propria validità, si valuta, infatti, analizzando se e in quale misura i lavori vengano letti, commentati, citati da studiosi di

altri contesti geografici e/o di altri rami scientifici. Nel volume viene descritta una ricerca incentrata sull'analisi del livello di internazionalizzazione e di vitalità degli studi italiani nelle discipline del libro e del documento, condotta attraverso una serie di indagini parallele di tipo bibliometrico (interrogazione dei database citazionali, ricerche in Google scholar, applicazione di metriche alternative, library catalog analysis).

*Digital Humanities* Fabio Ciotti,2014-09-10 Questo volume raccoglie gli atti del primo convegno annuale dell'Associazione per l'Informatica Umanistica e la Cultura Digitale (Firenze 13 e 14 dicembre 2012). L'incontro ha avuto al centro alcuni temi di particolare rilevanza nell'attuale fase di sviluppo delle Digital Humanities: come favorire la convergenza di competenze diverse per sostenere il processo di transizione al digitale dell'intero patrimonio culturale? Come ripensare e riaffermare il ruolo essenziale che l'informatica umanistica è chiamata a svolgere in questo processo di trasformazione culturale? Come valorizzare il contributo culturale e scientifico della ricerca e dei progetti condotti in ambito italiano?

*Lo spietato repertorio della contemporaneità* Giovanni Gabriele Mignosi,2020-10-15T00:00:00+02:00 Il testo esplora le pieghe di una contemporaneità che attraversa gravi e larvati cambiamenti culturali, sociali e psicologici. A partire da un'analisi critica dei processi che tendono a naturalizzare i dispositivi culturali egemoni, viene approfondita la figura dell'individuo tipo della civiltà globale: ben adattato, apparentemente sano ed innocuo, mostra però i segni di un narcisismo tracimato in una sociopatia paranoica e sadomasochistica, nel culto sfrenato della propria immagine, collocato in una bolla di alienante sacralità e così immiserito da una tossicodipendenza da oggetti di consumo. Tutto ciò è promosso e incoraggiato in un quadro culturale deistituzionalizzato e completamente occupato dai principi suadenti del neoliberismo. Viene infine proposto un tentativo di riformulare il lavoro dello psicologo-clinico, affinché fronteggi più adeguatamente la trasformazione radicale del mondo e della sofferenza psichica, evitando i rischi dell'autoreferenzialità e del miope tecnicismo.

Vita Curriculi Davide Filippi,2024-07-29 Da quando si è imposto il "nuovo spirito del capitalismo" i luoghi in cui si elabora la conoscenza hanno assunto un ruolo particolarmente rilevante negli assetti del capitalismo globale. In questo contesto, i sistemi universitari contemporanei si presentano come luoghi che mostrano il senso e le conseguenze delle trasformazioni delle forme di governo globali, con caratteristiche specifiche che il volume analizza. I ricercatori precari infatti possono essere definiti come un soggetto paradigmatico per rappresentare quelli che sono definiti come knowledge worker e approfondire le dinamiche che intervengono nel dare un orientamento alla loro soggettività permette di comprendere tanto i processi che agiscono nella generalità delle relazioni sociali contemporanee, sia le peculiarità espresse dalle esperienze professionali ed esistenziali di questi lavoratori.
