Big Dog-- Little Dog Random House Books for Young Readers

A "suspenseful, atmospheric tale. . . punctured by a gut-punch twist" (Entertainment Weekly), *A Boy and His Dog at the End of the World* is a story of survival, courage and hope amid the ruins of our world. My name's Griz. I've never been to school, I've never had friends, and in my whole life I've not met enough people to play a game of football. My parents told me how crowded the world used to be, before all the people went away. But we were never lonely on our remote island. We had each other, and our dogs. Then the thief came. "This unputdownable story has everything -- a well-imagined post-apocalyptic world, great characters, incredible suspense, and, of course, the fierce love of some very good dogs." -- Kirkus (starred review)

Troy was born in Beverly Hills but raised in the prisons of Southern California. Two days before his parole from reform school, a run-in with a young black tough threatens to derail his release. He prepares to fight, ready to sacrifice freedom to maintain his reputation, but a friend comes to his rescue. Armed with two razor blades, Mad Dog takes out Troy's assailant, allowing his friend to go free. Troy does not forget the debt. Years later, Mad Dog makes a living on penny-ante heists, and Troy—who has grown into one of the smartest hoods in L.A.—is about to finish a stint in San Quentin. They join up with another old friend, Diesel Carson, and launch a spree vicious enough to put them in jail for the rest of their lives. But these three would rather die than return to prison.

In *Turtle Pond*, a child and his parents visit their local public garden throughout the year, observing the turtles as they play, dive, feed, bask, climb, hide and doze. James Gladstone's lively prose poem reveals the pleasure and curiosity that come from spending time with the turtles. Karen Reczuch's stunningly beautiful illustrations accurately portray these extraordinary creatures, both in and out of the water, surrounded by lush plants and the changing seasons beyond the greenhouse windows. Can Dog find a way to help the frogs? "Rucker's four Ware novels—Software, Wetware, Freeware, and Realware—form an extraordinary cyberweird future history with the heft of an epic fantasy novel and the speed of a quantum processor. Still exuberantly fresh despite their age, they primarily follow two characters (and their descendants): Cobb Anderson, who instigated the first robot revolution and is offered immortality by his grateful "children," and stoner Sta-Hi Mooney, who (against his impaired better judgment) becomes an important figure in robot-human relations. Over several generations, humans, robots, drugs, and society evolve, but even weird drugs and the wisdom gathered from interstellar signals won't stop them from making the same old mistakes in new ways. Rucker is both witty and serious as he combines hard science and sociology with unrelentingly sharp observations of all self-replicating beings. This classic series well deserves its omnibus repackaging, particularly suitable for libraries." — Publisher's Weekly. "Rudy Rucker is one of the modern heroes of science fiction, one of the original cyberpunks. The early cyberpunks only had a few writers who could be meaningfully called punks — writers like John Shirley and Richard Kadrey — but there was only one who could truly be called cyber: Rudy Rucker. Rucker is a mad professor, a mathematician and computer scientist with a serious, scholarly interest in the limits of computation and the physics and mathematics of higher-dimension geometry. But that's just about the only thing you can describe as 'serious' when it comes to Rucker. He's a gonzo wildman, someone for whom 'trippy' barely scratches the surface. His work is shot through with weird sex, weird drugs, weird brain chemistry, and above all, weird science." — Cory Doctorow

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. How Stella Learned to Talk is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, How Stella Learned to Talk will be the indispensable dog book for the new decade.

A new edition of Bulgakov's fantastical precursor to *The Master and Margarita*, part of Melville House's reissue of the Bulgakov backlist in Michael Glenny's celebrated translations. A key work of early modernism, this is the superbly comic story of a Soviet scientist and a scroungy Moscow mongrel named Sharik. Attempting a medical first, the scientist transplants the glands of a petty criminal into the dog and, with that, turns a distinctly worryingly human animal loose on the city. The new, lecherous, vulgar, Engels-spouting Sharik soon finds his niche in governmental bureaucracy as the official in charge of purging the city of cats. A Frankenstein fable that's as funny as it is terrifying, *Heart of a Dog* has also been read as a fierce parable of the Russian Revolution. It was rejected for publication by the censors in 1925, and circulated in samizdat for years until Michael Glenny translated it into English in 1968—long before it was allowed to be officially published in the Soviet Union. That happened only in 1987, although till this day the book remains one of Mikhail Bulgakov's most controversial novels in his native country.

From the #1 bestselling author of *Inside of a Dog*—"an incredible journey into the olfactory world of man's best friend" (O, The Oprah Magazine), Alexandra Horowitz's follow-up to her New York Times bestseller explains how dogs experience the world through their most spectacular organ—the nose. In her "fascinating book...Horowitz combines the expertise of a scientist with an easy, lively writing style" (The New York Times Book Review) as she imagines what it is like to be a dog. Guided by her own dogs, Finnegan and Upton, Horowitz sets off on a quest through the cutting-edge science behind the olfactory abilities of the dog. In addition to speaking to cognitive researchers and smell experts, Horowitz visits detection-dog trainers and training centers; she meets researchers working with dogs to detect cancerous cells and anticipate epileptic seizure or diabetic shock; and she even attempts to smell-train her own nose. As we come to

understand how rich, complex, and exciting the world around us is to the canine nose, Horowitz changes our perspective on dogs forever. Readers will finish this book feeling that they have broken free of their human constraints and understanding smell as never before; that they have, for however fleetingly, been a dog. And, as The Boston Globe says about Being a Dog, “becoming more doglike, not surprisingly, can make anyone’s life a little more vivid.”
