

Volare Sulle Punte Piccole Ballerine

Valerio Massimo Manfredi

Volare sulle punte Rosalba Troiano,2011-06-29 Maia, Carlotta e i loro amici seguono ormai da qualche settimana le lezioni di madame Petipà quando l'insegnante annuncia che, in occasione di una visita da parte degli allievi della famosa Scuola Moscovita di Balletto, la 'Scarpette Rosa' preparerà con gli allievi più grandi un piccolo saggio sulle musiche dello Schiaccianoci. Ma, sorpresa: anche qualcuno dei piccoli verrà scelto per eseguire un paio di semplici passi davanti al pubblico! Maia e Carlotta non stanno più nella pelle dalla gioia e mettono tutto il loro impegno nella speranza che Madame Petipà scelga proprio loro due! Anche se devono vedersela con le smorfie di Vanessa che è intenzionata a emergere e suda e sgomita come una dannata! E oltre una buia galleria in pietra si nasconde anche un mistero tutto da svelare...

Once Upon a Time in America Harry Grey,1997 Inspired by the Robert De Niro film, this story spans three generations of a family of Jewish immigrants to the United States. A gang of friends discover - through trust, hard work and brutality - the true meaning of the American Dream.

The Story of the Year Hans Christian Andersen,2020-11-18 The new year had begun and January was already nearing its end, but it was still very cold. The sparrows found it strange, that the men had declared that it was the new year, as everyone knows that the year only begins with the coming of spring. However, spring was late and a few intrepid sparrows

decided to go looking for it. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include The Emperor's New Clothes, The Little Mermaid, The Nightingale, The Steadfast Tin Soldier, The Snow Queen, The Ugly Duckling and The Little Match Girl. His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films The Little Mermaid in 1989 and Frozen, which is loosely based on The Snow Queen, in 2013. Thanks to Andersen's contribution to children's literature, his birth date, April 2, is celebrated as International Children's Book Day.

Alexander: Child of a Dream Valerio Massimo Manfredi,2001-10 First volume in a trilogy about Alexander the Great.

World History of the Dance Curt Sachs,1937 This book is the most comprehensive history to appear before the public of the art which has been so fundamental an expression in every period of human history. It contains a discussion of the general types and characteristics of the dance, and also deals specifically with its forms and symbols from the Stone Age through classical antiquity, the middle ages, the 18th century, and the not so distant era of the waltz and polka, to the 20th century.

Aristophanes Carlo Ferdinando Russo,1997 This is the classic book about Aristophanes. Russo examines the plays as libretti for actors and singers rather than as mere texts, and never loses sight of the stage.

The Ascent of the Matterhorn Edward Whymper,1880 The first edition narrating the ascent of the Matterhorn, with numerous illustrations: maps, views, equipment

Mind and Places Anna Anzani,2020-05-12 This book explores the contributions of psychological, neuroscientific and philosophical perspectives to the design of contemporary cities. Pursuing an innovative and multidisciplinary approach, it addresses the need to re-launch knowledge and creativity as major cultural and institutional bases of human communities. Dwelling is a form of knowledge and re-invention of reality that involves both the tangible dimension of physical places and their mental representation. Findings in the neuroscientific field are increasingly opening stimulating perspectives on the design of spaces, and highlight how our ability to understand other people is strongly related to our corporeity. The first part of the book focuses on the contributions of various disciplines that deal with the spatial dimension, and explores the dovetailing roles that science and art can play from a multidisciplinary perspective. In turn, the second part formulates proposals on how to promote greater integration between the aesthetic and cultural dimension in spatial design. Given its scope, the book will benefit all scholars, academics and practitioners who are involved in the process of planning, designing and building places, and will foster an international exchange of research, case studies, and theoretical reflections to confront the challenges of designing conscious places and enable the development of communities.

How to Live Forever. Dedicated to Antonio Luigi Maria Bellantoni,2020

When Things Start to Think Neil Gershenfeld,2014-06-10 In *When Things Start to Think*, Neil Gershenfeld tells the story of his Things that Think group at MIT's Media Lab, the group of innovative scientists and researchers dedicated to integrating digital technology into the fabric of our lives. Gershenfeld offers a glimpse at the brave new post-computerized world, where microchips work for us instead of against us. He argues that we waste the potential of the microchip when we confine it to a box on our desk: the real electronic revolution will come when computers have all but disappeared into the walls around us. Imagine a digital book that looks like a traditional book printed on paper and is pleasant to read in bed but has all the mutability of a screen display. How about a personal fabricator that can organize digitized atoms into anything you want, or a musical keyboard that can be woven into a denim jacket? *When Things Start to Think* is a book for people who want to know what the future is going to look like, and for people who want to know how to create the future.
