It has been 40 years since the TurboTrain first rocketed to its record-breaking speeds, and touched the hearts of a new generation of railfans. Part train, part jet aircraft, the TurboTrain was the latest in ground transport innovation. But the Turbo's promise of a new era of passenger travel sadly went unfulfilled. A gas turbine powered train introduced at a time of unprecedented hostility towards passenger train travel and unprecedented high fuel prices had little chance. Despite its obstacles, the TurboTrain was a success with the travelling public and, by the time the last trains were retired in 1982, Turbo was running at over 97 percent efficiency. This made it the most reliable passenger train in North America. TurboTrain: A Journey is the first book ever to tell the story of the TurboTrain through history, stories, and photographs, the

majority of which have never been published before.

This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.

Water Management Challenges in Global Change contains the proceedings of the 9th Computing and Control for the Water Industry (CCWI2007) and the Sustainable Urban Water Management (SUWM2007) conferences. The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods. Issues such as economic globalisation, climate changes and water shortages call for a new approach to water systems management, which addresses the relevant technical, social and economic aspects. This collection represents the views of academic and industrial experts from a number of countries, who provide technical solutions to current water management problems and present a vision for addressing the global questions. The themes underlying many of the contributions include energy and material savings, water savings and the integration of different aspects of water management. The papers are grouped into three themes covering water distribution systems, sustainable urban water management and modelling of wastewater treatment plants. The water distribution topics cover asset and information management, planning, monitoring and control, hydraulic modelling of steady state and transients, water quality and treatment, demand and leakage management, optimisation, design and decision support systems, as well as reliability and security of water distribution systems. The sustainable urban water management topics include urban drainage systems, water reuse, social aspects of water management and also selected facets of water resources and irrigation. Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems. To address this imbalance, this book presents a number of modelling techniques developed specifically for these plants. *Water Management Challenges in Global Change* will prove to be invaluable to water and environmental engineering researchers and academics; managers, engineers and planners; and postgraduate students.

A witty and romantic novel of Regency love, family and appalling scandal, from a latter-day Jane Austen When their strait-laced, domineering father, Sir Clement Carnell, dies, Valentine throws open their Devonshire estate of Pennacombe to their fashionable cousins from London and Louisa feels free at last to reject the man Sir Clement wanted her to marry. Soon, the temptations of Regency London beckon, including the beautiful, scandalous, and very married Lady Harriet Eversholt, with whom Valentine becomes dangerously involved. Meanwhile, Louisa finds that freedom of choice is as daunting as it is exciting. Will the opportunity to indulge in a little folly lead to fulfillment--or disaster? *A Little Folly* is a novel to make Jane Austen proud and Georgette Heyer envious. An acclaimed author of historical fiction, Jude Morgan weaves together the very best of Regency era writing with "refreshingly original characters, an intriguing plot, and an elegantly ironic style." (RT Book Reviews on *Indiscretion*). In this exciting new novel, Morgan delivers a story that, yet again, will bring cheers from critics and readers alike.

The First World War's centenary generated a mass of commemorative activity worldwide. Officially and unofficially; individually,

collectively and commercially; locally, nationally and internationally, efforts were made to respond to the legacies of this vast conflict. This book explores some of these responses from areas previously tied to the British Empire, including Australia, Britain, Canada, India and New Zealand. Showcasing insights from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary. How far did commemoration become celebration, and how merited were such responses? To what extent did the centenary serve wider social and political functions? Was it a time for new knowledge and understanding of the events of a century ago, for recovery of lost or marginalised voices, or for confirming existing clichés? And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities? The contributors to this book grapple with these questions, coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the 'war to end all wars'.

It is appropriate that a surgical teacher, Robert E. Hermann, M.D., with a large experience in a specialized field should author the beautifully illustrated Manual of Surgery of the Gallbladder, Bile Ducts, and Exocrine Pancreas. This manual, which takes its place in the distinguished series sponsored by Richard H. Egdahl, M.D., is designed for the working surgeon, resident or practitioner, who wishes to refresh his memory or to bring himself abreast of current thinking and techniques. The carefully planned format and the elegant color illustrations of Mr. Robert Reed permit this with the expenditure of a minimum of time and effort, and surgeons who must operate on the organs and structures it covers will wish to have it available for reference. Stanley O. Hoerr, M.D., former Chairman, Division of Surgery Cleveland Clinic Chairman, Department of Surgery Fairview General Hospital Cleveland, Ohio

Preface Operations on the gallbladder and bile ducts are among the surgical procedures most commonly performed by general surgeons. In most hospitals, cholecystectomy is the most frequently performed operation within the abdomen; approximately 60,000 are performed each year in the United States. In addition, an estimated 120,000 bile duct operations are performed yearly. Pancreatic surgery is less frequent, but because of the close relation between the biliary system and the pancreas, knowledge of pancreatic problems is equally essential to the surgeon.

The night Dad had a few cheeky ones after work, forgot the milk and tripped over the rubbish, Mum called him A Wild Thing and left him to it for the rest of the evening. . . . In this hilarious, touching homage to Maurice Sendak's *Where the Wild Things Are*, a 'tired and emotional' dad finds himself drifting off to the place where the Wild Dads went. 'Now party like real men!' he said. And there was never a manliness like it. In a riot of headbanging, air guitar and table football he finds himself at the centre of a great escape, but pretty soon he begins to miss the place he left behind... Lovingly illustrated by the award-winning Sholto Walker, this little book is the perfect gift for new dads - or any parent who's ever wanted to run away from it all.

The newest addition to the *Grub Street Classics* range is this fascinating, insightful and, at times, nail-biting account by the World War One veteran, Leonard H. Rochford. This book has been out of print for more than thirty years and we are delighted to be putting it back on the shelves, with black and white photographs throughout. In these exciting memoirs, •Tichê Rochford writes about his two action-filled years as a World War I fighter pilot with the famous No. 3 (Naval) Squadron when he flew planes such as the Sopwith Pup and the Sopwith Camel. While flying many hundreds of hours in operations he was credited with many single-handed victories or driven out of control, and he vividly recalls these engagements in the air and the exploits of the pilots with whom he flew, names that include other fighter aces like Raymond Collishaw, who has written a foreword to this book, T. F. Havell, R. H. Mulock and L. S. Breadner. A member of his flight, Lt. Col. Kirkpatrick said of him, •I always had the impression that what he did came naturally to him. If he saw an enemy aircraft and decided to attack, that was that. He went screaming down on it and we all had our work cut out to keep up with him. One could be pretty sure of the victim going down in flames.ê

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social

history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.
