Many factors cause decision blunders in management, including time constraints, financial egoism, bounded rationality, industry competition, garbage-can thinking, a paradox of choice, governance failures, and groupthink. In *Domains of Decision Management*, author James E. Moffett, Sr., teaches readers to avoid these common pitfalls through his ground-breaking decision process known as DDM (Domains of Decision Management). Written in plain language that all levels of management can benefit from, DDM is a prescriptive approach, complete with structured steps, a repetitive process, and objective and subjective components. Learning this process will help you make more beneficial decisions in all areas of management -- even the infrequent, non-programmed, and novel issues that arise.

During World War II Nathalie "Lily" Sergueiew, a woman of mystery, confidently seduced the German Intelligence Service into employing her as a spy against their British enemy. Little did they know that this striking woman--who turned heads when she walked into a room with her little dog Babs--would work with their enemy against them. Her diary chronicles her months-long journey to becoming a double agent for the British under the code name Treasure. From the moment she conceived the idea of becoming a double agent, Lily faced challenges on two fronts: first, she had to convince the Germans to ask her to spy for them; second, she needed the British to believe her story. Only then could she begin the perilous work of helping free her homeland--France--from the German occupier.
