50 years after the establishment of the Runnymede Trust and the Race Relations Act of 1968 which sought to end discrimination in public life, this accessible book provides commentary by some of the UK's foremost scholars of race and ethnicity on data relating to a wide range of sectors of society, including employment, health, education, criminal justice, housing and representation in the arts and media.

The first thorough study of the co-existence of crime and democratic processes in Indian politics In India, the world's largest democracy, the symbiotic relationship between crime and politics raises complex questions. For instance, how can free and fair democratic processes exist alongside rampant criminality? Why do political parties recruit candidates with reputations for wrongdoing? Why are one-third of state and national legislators elected--and often re-elected--in spite of criminal charges pending against them? In this eye-opening study, political scientist Milan Vaishnav mines a rich array of sources, including fieldwork on

political campaigns and interviews with candidates, party workers, and voters, large surveys, and an original database on politicians' backgrounds to offer the first comprehensive study of an issue that has implications for the study of democracy both within and beyond India's borders.

The Northern Ireland Experience of Conflict and Agreement presents a salutary warning to the international community against the fashionable view that there is an 'Irish model' which can be exported to cauterise ethnic troubles around the globe. The book draws on extensive archive research in London and Dublin on the 1970s power-sharing experiment, and on interviews with senior officials and political figures from the two capitals—as well as reconciliation practitioners—about the negotiation and chequered implementation of the Belfast agreement. It shows how stereotyped conceptions of the problem as a product of 'ancient hatreds', allied to solutions based on Realpolitik, have failed to transform Northern Ireland from a fragile peace, following the exhaustion of protracted paramilitary campaigns, to genuine reconciliation. The book concludes with practical proposals for constitutional reforms which would favour genuine power-sharing—rather than merely sharing power out—and set Northern Ireland on the road to the 'normal', civic society its long-suffering residents desire. It will be essential reading not only for academics and postgraduates interested in ethnic

conflict but also for policy-makers who confront it in practice.

The Islamic State is a group known for doing things a bit differently, for its capacity for innovation, and for its many 'firsts.' Two of those 'firsts' happened within months of each other. The first occurred in October 2016 when the group used a bomb-laden drone to kill, after the explosive hidden within the drone killed two Kurdish peshmerga soldiers who were investigating the device. Another 'first' happened in January 2017 when the Islamic State released a propaganda video that showed nearly a dozen examples of the group releasing munitions on its enemies from the air with a fair degree of accuracy via quadcopter drones it had modified. And it wasn't long before the group's bomb-drop capable drones would go on to kill, too. After reaching a high point in the spring of 2017, the scale of the

Islamic State drone threat-like many other dimensions of the group and its power has already been significantly degraded. A surprisingly little amount of analytical attention, however, has been given to how the Islamic State was able to pull off its drone feats and bring its program to scale in a relatively short amount of time. This report seeks to address this gap by evaluating the main factors that helped the Islamic State to effectively use modified commercial drones as weapons. It also highlights some of the broader threat and policy implications associated with the Islamic State's pioneering use of drones. This compilation includes a reproduction of the 2019 Worldwide Threat Assessment of the U.S. Intelligence Community.

"If there is anything that characterizes God's people in America today, it is the loss of the fear of God," states Henry Blackaby. When you do not fear God, he contends, you will not fear sin. The troubling result of this issue is that many Christians fail to recognize that they have sinned against God. The lack of holiness within the Church has reached epidemic levels. "True revival can only come," notes Blackaby, "when the people of God return to a healthy, holy fear of Him." God, in His holiness, is grieved by our lack of it. In this worthy book, Blackaby urges believers to look inward, to see sin from God's perspective, and to live to the standard that He has set in Scripture. He writes, "The salvation of the nation has little to do with Washington or Hollywood-it has to do with the people of God!" As referenced in 2 Chronicles 7:14, Blackaby notes that the redemption of America lies in the repentance of the people of God. He challenges readers by adding, "If America depended on your prayer life, would there be revival?" Revival waits on the holiness of His people; this book provides the path that will lead us back.
