

Western Civilization Since 1300 8th Edition

"Vexed!" Every American's "Bitch List", "Community Capitalism"—market-driven, community-centric, entrepreneurial capitalism—lays out the problems confronting Capitalism, those threatening once again to destroy the economic well-being of the American Nation and all of its allies and associates in Western and World Civilization. From "the Stock Market" to derivatives to banks to lawyers in politics to patenting intangibles to educational failures to unions, "Community Capitalism" lays bare the issues: the internals, the problems and the illogical, human-destructive hubris of profit-before market, divine-right "Greed Capitalism." All American legislation (and that of Western Europe, too) of the past couple of decades has favored the big corporations while putting ever more insufferable demands on small businesses. At the same time, the programs of the first eight years of the century have helped to destroy American education by forcing it into what can only be called Stalinist regimentation. No one is taking responsibility for the multi-billion dollar (and euro) financial fiascos forced on the taxpayers. This has hit the American and the Greek people with taxation imposed without their consent for actions they never agreed to—the gambling that resulted in those horrendous fees. To get the world out of this condition, "Community Capitalism" proposes a basic rethinking, and redirected application of the strengths of Capitalism, to return to community-enriching, stable, progressive commerce allied with the human-centered methods of traditional, pre-"Spreadsheet-Capitalism," pre-derivative-deranged business sensibilities. The primary concept around which this is based is that of "Fiducium," a name coined to encapsulate the spirit of fiduciary responsibility, extended into all aspects of human endeavor. Eduard Qualls calls not only on his advanced business degree, but on his extensive Humanities, historical and linguistic/cultural education, heightened and honed by the experience bestowed by his almost 30 successful years within the computer science industry. Yet it was also his experience of being misused and mal-used by the mindless machinations of fatally financial-operative, mindless mega-corporate America that spurred him to organize within this volume an exposition of that damnable, destructive dysfunction he has been witnessing as it has metastasized during these past 12+ years into the consumptive calamity we must all now contend against. This book will please neither the ultra-conservative nor the ultra-liberal. But it will ring true to all those who in free and generous equanimity love their families, their neighbors and neighborhoods, their communities, and their Nation—indeed, all those who cherish the fond hope of a more human, more humane world of opportunity for themselves, their children, and the future of their communities. In this book Mr. Qualls gives voice to all the people in the Western World who are utterly, angrily exasperated with the way the economy and sociable life are being wrecked by wantons, gamblers and wastrels, yet who must remain quiet, silently feeding that frustration because of fear of losing their jobs if they speak out. Yes, he's "Vexed!" And you should be, too!

This textbook covers the history of Western civilization from ancient times to the present day.

The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The

author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography subsequently developed and suggests how his portrait of the world's past in *The Rise of the West* should be revised to reflect these changes. "This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, *New York Times Book Review*

It presents a balanced picture of world history, with all respect for the richness and diversity of the tapestry of the human experience. The text covers individual civilizations such as China, India, and Europe, with due attention paid to the rise of the West, and provides points of comparison between and among these civilizations.

The definitive translation by Dick Davis of the great national epic of Iran—now newly revised and expanded to be the most complete English-language edition *A Penguin Classic* Dick Davis—"our pre-eminent translator from the Persian" (*The Washington Post*)—has revised and expanded his acclaimed translation of Ferdowsi's masterpiece, adding more than 100 pages of newly translated text. Davis's elegant combination of prose and verse allows the poetry of the *Shahnameh* to sing its own tales directly, interspersed sparingly with clearly marked explanations to ease along modern readers. Originally composed for the Samanid princes of Khorasan in the tenth century, the *Shahnameh* is among the greatest works of world literature. This prodigious narrative tells the story of pre-Islamic Persia, from the mythical creation of the world and the dawn of Persian civilization through the seventh-century Arab conquest. The stories of the *Shahnameh* are deeply embedded in Persian culture and beyond, as attested by their appearance in such works as *The Kite Runner* and the love poems of Rumi and Hafez. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Filled with unforgettable stories of emperors, generals, and religious patriarchs, as well as fascinating glimpses into the life of the ordinary citizen, *Lost to the West* reveals how much we owe to the Byzantine Empire that was the equal of any in its achievements, appetites, and enduring legacy. For more than a millennium, Byzantium reigned as the glittering seat of Christian civilization. When Europe fell into the Dark Ages, Byzantium held fast against Muslim expansion, keeping Christianity alive. Streams of wealth flowed into Constantinople, making possible unprecedented wonders of art and architecture. And the emperors who ruled Byzantium enacted a saga of political intrigue and conquest as astonishing as anything in recorded history. *Lost to the West* is replete with stories of assassination, mass mutilation and execution, sexual scheming, ruthless grasping for power, and clashing armies that soaked battlefields with the blood of slain warriors numbering in the tens of thousands.

After challenging the multicultural effort to “provincialize” the history of Western civilization, this book argues that the roots of the West's exceptional creativity should be traced back to the uniquely aristocratic warlike culture of Indo-European speakers.

City and state governments around the world are struggling to achieve environmentally sustainable transport. Economic, technological, city and transport planning and human behaviour solutions are often hampered by ineffective implementation. So attention is now turning to institutional, governmental and political barriers. Approaches to these implementation problems assume that transport ownership can only be public (owned by state entities) or private (corporate or personal). Another option – largely unexplored to date – is communal ownership of transport. Community-Owned Transport proposes and develops the notion that communal ownership has a historical basis and provides unique opportunities for providing personal mobility. It looks at the historical roots of modern urban transport's failings as those of technological change and the associated governing of transport systems, particularly the role of public sector institutions. Community ownership is explored through the new ‘sharing economy’ developments – car sharing, ridesharing and bicycle share schemes – and older social innovations in ecovillages and communal living. Models and practices of community ownership of transport are provided and this study also discusses how community ownership might contribute to sustainable transport. Drawing widely on different disciplines and fields of scholarship, this book explores the conceptual and practical aspects of communal ownership of transport. It will be a valuable resource for those seeking innovative approaches to addressing the pressing problems of transport, including graduate and postgraduate students, as well as policymakers, practitioners and community groups.

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, *Technics and Civilization* was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention, nearly three quarters of a century after they were written.”—*Journal of Technology and Culture*

What is public health? To some, it is about drains, water, food and housing, all requiring engineering and expert management. To others, it is the State using medicine or health education and tackling unhealthy lifestyles. This book argues that public health thinking needs an overhaul, a return to and modernisation around ecological principles. Ecological Public Health thinking, outlined here, fits the twenty-first century's challenges. It integrates what the authors call the four dimensions of existence: the material, biological, social and cultural aspects of life. Public health becomes the task of transforming the relationship between people, their circumstances and the biological world of nature and bodies. For Geof Rayner and Tim Lang, this is about facing a number of long-term transitions, some well recognized, others not. These transitions are Demographic, Epidemiological, Urban, Energy, Economic, Nutrition, Biological, Cultural and Democracy itself. The authors argue that identifying large scale transitions such as these refocuses public health actions onto the conditions on which human and eco-systems health interact. Making their case, Rayner and Lang map past confusions in public health images, definitions and models. This is an optimistic book, arguing public health can be rescued from its current dilemmas and frustrations. This century's agenda is unavoidably complex, however, and requires stronger and more daring combinations of interdisciplinary work, movements and professions locally, nationally and globally. Outlining these in the concluding section, the book charts a positive and reinvigorated institutional purpose. Western Civilization: Since 1300, Updated AP Edition Cengage Learning

Michael Burger's goal in this inexpensive overview is to provide a brief, historical narrative of Western civilization. Not only does its length and price separate this text from the competition, but its no-frills, uncluttered format and well-written, one-authored approach make it a valuable asset for every history student. The Shaping of Western Civilization begins with the ancient Near East and ends with globalization. Unlike other textbooks that pile on dates and facts, Shaping is a more coherent and interpretive presentation. Burger's skills as writer and synthesizer will enable students to obtain the background required to ask meaningful questions of primary sources. In addition to suggestions for further reading, this overview includes over 50 images and 22 maps.

This brief, best-selling Western Civilization text has helped thousands of students learn about the world they live in by exploring the story of its past. Jackson Spielvogel's engaging chronological narrative and extensive inclusion of primary source documents weave the political, economic, social, religious, intellectual, cultural, and military aspects of history into a gripping story that is as memorable as it is instructive. This edition includes new historiographical sections along with updated scholarship and new images.
