Does children's literature portray the authentic perspectives of children, or does it present the views of the adults who write, sell, and review the books? How does it demonstrate the ways in which perceptions of childhood have developed over the centuries? How are issues of censorship and freedom of speech brought to light in children's books? Addressing these and many other issues, *Crosscurrents of Children's Literature: An Anthology of Texts and Criticism* is the only anthology of classic and contemporary readings in children's literature to combine primary works with related critical essays. Organized thematically around modern critical debates, the selections explore how children's literature integrates instruction and entertainment, oral and written traditions, realism and fantasy, words and pictures, classics and adaptations, and perspectives on childhood and adult life. Illuminating the rich diversity of children's literature studies, the book incorporates approaches from several different fields including psychology, education, history, cultural studies, and literary criticism. It spans a wide range of literary periods and genres, balancing contemporary and historical texts, excerpts and longer selections, traditional and nontraditional materials, and English and translated works. The volume includes Native American and African American writings and offers insights into a variety of cultural and ethnic traditions. It is enhanced by introductory essays, illustrations, an alternate table of contents organized by genre, a timeline, and a bibliography of critical works. An Instructor's Manual and a Website (<http://crosscurrentsoup.org>) provide additional helpful resources. Examining how literary forms and genres, diverse influences, and evolving attitudes toward childhood have shaped the field of children's literature, *Crosscurrents of Children's Literature: An Anthology of Texts and Criticism* encourages students and other readers to challenge common assumptions about children, childhood, and children's books.

Examining the work of contemporary Black artists who are dismantling the white gaze and demanding that we see--and see Blackness in particular--anew. In *A Black Gaze*, Tina Campt examines Black contemporary artists who are shifting the very nature of our interactions with the visual through their creation and curation of a distinctively Black gaze. Their work--from Deana Lawson's disarmingly intimate portraits to Arthur Jafa's videos of the everyday beauty and grit of the Black experience, from Kahlil Joseph's films and Dawoud Bey's photographs to the embodied and multimedia artistic practice of Okwui Okpokwasili, Simone Leigh, and Luke Willis Thompson--requires viewers to do more than simply look; it solicits visceral responses to the visualization of Black precarity. Campt shows that this new way of seeing shifts viewers from the passive optics of looking at to the active struggle of looking with, through, and alongside the suffering--and joy--of Black life in the present. The artists whose work Campt explores challenge the fundamental disparity that defines the dominant viewing practice: the notion that

Blackness is the elsewhere (or nowhere) of whiteness. These artists create images that flow, that resuscitate and revalue the historical and contemporary archive of Black life in radical ways. Writing with rigor and passion, Camp describes the creativity, ingenuity, cunning, and courage that is the *modus operandi* of a Black gaze.

In this volume, Peter S. Perry describes what performance criticism is and shows its application to biblical studies and theology. He draws on the best thinkers and practitioners in this field as well as his own experience to show how performance criticism can open up the meaning of and appreciation for biblical texts. In addition, Perry presents challenges for the future of performance criticism and its role in biblical interpretation generally. Each volume in the new Insights series discusses discoveries and insights gained into biblical texts from a particular approach or perspective in current scholarship. Accessible and appealing to today's students, each Insight volume will discuss (1) how this method, approach, or strategy was first developed and how its application has changed over time; (2) what current questions arise from its use; (3) what enduring insights it has produced; and (4) what questions remain for future scholarship.

In *Between Biblical Criticism and Poetic Rewriting*, Samuel Tongue offers an account of how poetic rewritings of the Bible question the disciplinary constitution of Biblical Studies, ultimately demonstrating the performativity of all interpretation.

Before Liz Lemon, before "Weekend Update," before "Sarah Palin," Tina Fey was just a young girl with a dream: a recurring stress dream that she was being chased through a local airport by her middle-school gym teacher. She also had a dream that one day she would be a comedian on TV. She has seen both these dreams come true. At last, Tina Fey's story can be told. From her youthful days as a vicious nerd to her tour of duty on Saturday Night Live; from her passionately halfhearted pursuit of physical beauty to her life as a mother eating things off the floor; from her one-sided college romance to her nearly fatal honeymoon -- from the beginning of this paragraph to this final sentence. Tina Fey reveals all, and proves what we've all suspected: you're no one until someone calls you bossy. (Includes Special, Never-Before-Solicited Opinions on Breastfeeding, Princesses, Photoshop, the Electoral Process, and Italian Rum Cake! This Enhanced eBook experience also includes special audio clips from Tina Fey, speculation on what an eBook really is, a bonus section of new-to-you photos, interpretive drawings, and a chapter read by the author!)

This book explains the wide basis of perspectives on which we build an understanding of people's behaviours and why we respond in the way we do.

Heralded as the exponents of a 'new atheism', critics of religion are highly visible in today's media, and include the household names of Richard Dawkins, Daniel Dennett and Sam Harris. David Fergusson explains their work in its historical perspective, drawing comparisons with earlier forms of atheism. Responding to the critics through conversations on the credibility of religious belief, Darwinism, morality, fundamentalism, and our approach to reading sacred texts, he establishes a compelling case for the practical and theoretical validity of faith in the contemporary world. An invitation to engage in a rich dialogue, Faith and Its Critics supports an informed and constructive exchange of ideas rather than a contest between two sides of the debate. Fergusson encourages faith communities to undertake patient engagement with their critics, to acknowledge the place for change and development in their self-understanding whilst resisting the reductive explanations of the new atheism.

When a couple enters therapy, both partners have either explicit or implicit understandings of what can—and, more importantly, cannot—be discussed in therapy. Even when empirically tested assessments are used to help pinpoint areas of concern and conflict, couples may choose to identify only those areas that are relatively safe and do not seriously threaten each partner's sense of integrity and vulnerability. How is a therapist supposed to proceed when a couple comes in for a tune-up, not realizing that their entire transmission needs to be serviced? Therapists know that some relationships, like some transmissions, can continue to function on some level even without proper care—sometimes even for years—before the couple seeks therapy. If, when they come in, the therapist can help the couples to repair and regain their lost equilibrium, they'll be more likely to seek help when the transmission next begins to slip. In its clear, precise

prose, insightful case studies, and thought-provoking discussion questions, *Couples in Collusion* lays out guidelines for identifying, understanding, and dealing with the unspoken agreements and collusive systems that couples build up over time. Clinicians will find each chapter replete with concrete strategies they can use in practice as well as thorough explanations of the assessment tools, suggestions on how to use them, and even advice on how to build the tools' costs into clinicians' limited budgets.

What will happen to the theater when there are no more critics? With the decline of print media and the rise of online journalism, theater critics are facing hard times. As their influence fades, will the industry they cover be adversely affected or can bloggers and message boards fill the void? Can a new economic model be created for theater criticism? How can critics lucky enough to still have jobs stay relevant in the age of social media? Speaking of which, what does a theater critic really do, and how do you become one? In this book, Matt Windman, a theater critic himself, interviews more than 50 critics from New York and around the country, including Ben Brantley, Charles Isherwood, John Lahr, Terry Teachout, Linda Winer, Chris Jones, David Cote, John Simon and Peter Filichia. They discuss their long careers and the nightly process of evaluating plays and musicals, and offer their thoughts on the future of the profession.

Emotion-focused therapy is a research-informed psychological therapy that to date has mainly been studied in the context of depression, trauma and couple distress. The evidence suggests that this therapy has a lasting and transformative effect. Ladislav Timulak presents EFT as a particular therapeutic approach that addresses psychological human suffering, offering a view that puts more emphasis on attending to the distress, rather than avoiding or suppressing it. Focusing on the latest developments in EFT, *Transforming Emotional Pain in Psychotherapy* presents a theory of human suffering and a model of therapy that addresses that suffering. The model of suffering assumes that the experienced emotional pain is a response to an injury that prevents or violates the fulfilment of the basic human needs of being loved, safe, and acknowledged. This book focuses on a particular way of

transforming emotional pain in psychotherapy through: helping the client to tolerate the pain; assisting the client to identify the core of the difficult emotional experiences; identifying the needs connected to the core pain which are unmet or being violated, and responding (with compassion and protective anger) to the underlying needs of the client that transforms the original pain.

*Transforming Emotional Pain in Psychotherapy* provides an account of how emotional pain can be conceptualised and how it can be addressed in therapy. It provides practical tips for therapists working with emotional pain and shows how it can then be made more bearable and transformed allowing the client to be more sensitive to the pain of others, and to seek support when needed. This book will be essential reading for clinical and counselling psychologists, psychotherapists and counsellors in practice and training, as well as for fully qualified professionals undergoing further training in EFT.

This international collection studies how the financial crisis of 2007 and the ensuing economic and political crises in Europe and North America have triggered a process of change in the field of economics, law and politics. Contributors to this book argue that both elites and citizens have had to rethink the nature of the market, the role of the state as a market regulator and as a provider of welfare, the role of political parties in representing society's main political and social cleavages, the role of civil society in voicing the concerns of citizens, and the role of the citizen as the ultimate source of power in a democracy but also as a fundamentally powerless subject in a global economy. The book studies the actors, the areas and the processes that have carried forward the change and proposes the notion of 'incomplete paradigm shift' to analyse this change. Its authors explore the multiple dimensions of paradigm shifts and their differentiated evolution, arguing that today we witness an incomplete paradigm shift of financial regulations, economic models and welfare systems, but a stillbirth of a new political and economic paradigm.

*De-Gendering Gendered Occupations* brings together contributions from researchers on language and gender studies and workplace discourse to unpack and challenge hegemonic gendered norms encoded in what are traditionally considered female occupations. The volume integrates a range of theoretical frameworks, including conversation analysis, pragmatics, and interactional sociolinguistics, to analyse data from such professions as primary education, healthcare, and speech and language

therapy across various geographic contexts. Through this lens, the first part of the book examines men's linguistic practices with the second part offering a comparative analysis of 'male' and 'female' discourse. The settings discussed here allow readers to gain insights into the ways in which cultural, professional, and gendered identity intersect for practitioners in these professions and in turn, future implications for discourse around gendered professions more generally. This book will be key reading for students and researchers in sociolinguistics, discourse analysis, gender studies, cultural studies, and professional discourse.

Introduces key aspects of narrative interpretation to offer a richly rewarding approach to reading the Bible.

Transforming Generalized Anxiety: An Emotion Focused Approach examines an approach to treating generalized anxiety disorder (GAD) which attempts to uncover the deeper, underlying emotional experiences that clients are afraid of. It also demonstrates how these painful experiences can be transformed in therapy into a form of emotional resilience by generating experiences of self-compassion and healthy, boundary setting, protective anger. Though most of the literature on treating GAD is dominated by Cognitive Behavior Therapy, this book presents emotion-focused therapy as an alternative treatment of this condition. The emotional resilience this particular approach instils serves as a resource when encountering triggers of emotional vulnerability, but also decreases the client's need to avoid hitherto feared triggers and the emotional experiences they bring. Developed in a series of research studies, and illustrated with reference to case examples, this book offers a practical, theoretically informed, evidence based guide, to conducting therapy with clients. Using clinical material, and applying the outcome of a series of research studies, Transforming Generalized Anxiety will equip psychotherapists and counsellors with the means to help GAD clients transform core painful experiences into a sense of empowerment and inner confidence.

By "literary criticism" we usually mean a self-conscious act involving the technical and aesthetic appraisal, by individuals, of autonomous works of art. Aristotle and Plato come to mind. The word "social" does not. Yet, as this book shows, it should--if, that is, we wish to understand where literary criticism as we think of it today came from. Andrew Ford offers a new understanding of the development of criticism, demonstrating that its roots stretch back long before the sophists to public commentary on the performance of songs and poems in the preliterate era of ancient Greece. He pinpoints when and how, later in the Greek tradition than is usually assumed, poetry was studied as a discipline with its own principles and methods. *The Origins of Criticism* complements the usual, history-of-ideas approach to the topic precisely by treating criticism as a social as well as a theoretical activity. With unprecedented and penetrating detail, Ford considers varying scholarly interpretations of the key texts discussed. Examining Greek discussions of poetry from the late sixth century B.C. through the rise of poetics in the late fourth, he asks when we first can recognize anything like the modern notions of literature as imaginative writing and of literary criticism as a special knowledge of such writing. Serving as a monumental preface to Aristotle's *Poetics*, this book allows readers to discern the emergence, within the manifold activities that might be called criticism, of the historically specific discourse on poetry that has shaped subsequent Western approaches to literature.
