"A deeply beautiful book, with the fierce galloping pace of a great novel."—Liz Rosenberg Boston Globe Informed by the death of a beloved brother, here are the stories of childhood, its thicket of sex and sorrow and joy, boys and girls growing into men and women, stories of a brother who in his dying could teach how to be most alive. What the Living Do reflects "a new form of confessional poetry, one shared to some degree by other women poets such as Sharon Olds and Jane Kenyon. Unlike the earlier confessional poetry of Plath, Lowell, Sexton et al., Howe's writing is not so much a moan or a shriek as a song. It is a genuinely feminine form . . . a poetry of intimacy, witness, honesty, and relation" (Boston Globe).

NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

An esteemed journalist delivers a compelling on-the-ground account of the construction of President Trump's border wall in San Diego—and the impact on the lives of local residents. In August of 2019, Donald Trump finished building his border wall—at least a portion of it. In San Diego, the Army Corps of engineers completed two years of construction on a 14-mile steel beamed barrier that extends eighteen-feet high and cost a staggering \$147 million. As one border patrol agent told reporters visiting the site, "It was funded and approved and it was built under his administration. It is Trump's wall." 14 Miles is a definitive account of all the dramatic construction, showing readers what it feels like to stand on both sides of the border looking up at the imposing and controversial barrier. After the Department of Homeland Security announced an open call for wall prototypes in 2017, DW Gibson,

an award-winning journalist and Southern California native, began visiting the construction site and watching as the prototype samples were erected. Gibson spent those two years closely observing the work and interviewing local residents to understand how it was impacting them. These include April McKee, a border patrol agent leading a recruiting program that trains teenagers to work as agents; Jeff Schwilk, a retired Marine who organizes pro-wall rallies as head of the group San Diegans for Secure Borders; Roque De La Fuente, an eccentric millionaire developer who uses the construction as a promotional opportunity; and Civile Ephedouard, a Haitian refugee who spent two years migrating through Central America to the United States and anxiously awaits the results of his asylum case. Fascinating, propulsive, and incredibly timely, *14 Miles* is an important work that explains not only how the wall has reshaped our landscape and countless lives but also how its shadow looms over our very identity as a nation.

One of Bookpage's Most Anticipated Nonfiction Books of 2021 Join "America's funniest science writer" (Peter Carlson, Washington Post), Mary Roach, on an irresistible investigation into the unpredictable world where wildlife and humans meet. What's to be done about a jaywalking moose? A bear caught breaking and entering? A murderous tree? Three hundred years ago, animals that broke the law would be assigned legal representation and put on trial. These days, as New York Times best-selling author Mary Roach discovers, the answers are best found not in jurisprudence but in science: the curious science of human-wildlife conflict, a discipline at the crossroads of human behavior and wildlife biology. Roach tags along with animal-attack forensics investigators, human-elephant conflict specialists, bear managers, and "danger tree" faller blasters. Intrepid as ever, she travels from leopard-terrorized hamlets in the Indian Himalaya to St. Peter's Square in the early hours before the pope arrives for Easter Mass, when vandal gulls swoop in to destroy the elaborate floral display. She taste-tests rat bait, learns how to install a vulture effigy, and gets mugged by a macaque. Combining little-known forensic science and conservation genetics with a motley cast of laser scarecrows, langur impersonators, and trespassing squirrels, Roach reveals as much about humanity as about nature's lawbreakers. When it comes to "problem" wildlife, she finds, humans are more often the problem—and the solution. Fascinating, witty, and humane, Fuzz offers hope for compassionate coexistence in our ever-expanding human habitat. Winner for Best Young Adult Fiction Parents' Choice Gold Award Winner An Entertainment Weekly Best YA Book of 2017 A Vulture Best YA Book of 2017 A BuzzFeed Best YA Book of 2017 An ode to Put the Damn Guns Down, this is New York Times bestselling author Jason Reynolds's electrifying novel that takes place in sixty potent seconds—the time it takes a kid to decide whether or not he's going to murder the guy who killed his brother. A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

“Swanson has done a crucial public service by exposing the barbarous side of the Rangers.” —The New York Times Book Review A twenty-first century reckoning with the legendary Texas Rangers that does justice to their heroic moments while also documenting atrocities, brutality, oppression, and corruption The Texas Rangers came to life in 1823, when Texas was still part of Mexico. Nearly 200 years later, the Rangers are still going--one of the most famous of all law enforcement agencies. In Cult of Glory, Doug J. Swanson has written a sweeping account of the Rangers that chronicles their epic, daring escapades while showing how the white and propertied power structures of Texas used them as enforcers, protectors and officially sanctioned killers. Cult of Glory begins with the Rangers' emergence as conquerors of the wild and violent Texas frontier. They fought the fierce Comanches, chased outlaws, and served in the U.S. Army during the Mexican War. As Texas developed, the Rangers were called upon to catch rustlers, tame oil boomtowns, and patrol the perilous Texas-Mexico border. In the 1930s they began their transformation into a professionally trained police force. Countless movies, television shows, and pulp novels have celebrated the Rangers as Wild West supermen. In many cases, they deserve their plaudits. But often the truth has been obliterated. Swanson demonstrates how the Rangers and their supporters have operated a propaganda machine that turned agency disasters and

misdeeds into fables of triumph, transformed murderous rampages--including the killing of scores of Mexican civilians--into valorous feats, and elevated scoundrels to sainthood. Cult of Glory sets the record straight. Beginning with the Texas Indian wars, Cult of Glory embraces the great, majestic arc of Lone Star history. It tells of border battles, range disputes, gunslingers, massacres, slavery, political intrigue, race riots, labor strife, and the dangerous lure of celebrity. And it reveals how legends of the American West--the real and the false--are truly made.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

As a research neuroscientist, Lise Eliot has made the study of the human brain her life's work. But it wasn't until she was pregnant with her first child that she became intrigued with the study of brain development. She wanted to know precisely how the baby's brain is formed, and when and how each sense, skill, and cognitive ability is developed. And just as important, she was interested in finding out how her role as a nurturer can affect this complex process. How much of her baby's development is genetically ordained--and how much is determined by environment? Is there anything parents can do to make their babies' brains work better--to help them become smarter, happier people? Drawing upon the exploding research in this field as well as the stories of real children, *What's Going On in There?* is a lively and thought-provoking

book that charts the brain's development from conception through the critical first five years. In examining the many factors that play crucial roles in that process, *What's Going On in There?* explores the evolution of the senses, motor skills, social and emotional behaviors, and mental functions such as attention, language, memory, reasoning, and intelligence. This remarkable book also discusses: how a baby's brain is "assembled" from scratch the critical prenatal factors that shape brain development how the birthing process itself affects the brain which forms of stimulation are most effective at promoting cognitive development how boys' and girls' brains develop differently how nutrition, stress, and other physical and social factors can permanently affect a child's brain Brilliantly blending cutting-edge science with a mother's wisdom and insight, *What's Going On in There?* is an invaluable contribution to the nature versus nurture debate. Children's development is determined both by the genes they are born with and the richness of their early environment. This timely and important book shows parents the innumerable ways in which they can actually help their children grow better brains.
