#1 NEW YORK TIMES BESTSELLER | A REESE WITHERSPOON X HELLO SUNSHINE BOOK CLUB PICK "A great narrative about personal strength and really captures how books bring communities together." —Reese Witherspoon From the author of The Last Letter from

Your Lover, now a major motion picture on Netflix, a breathtaking story of five extraordinary women and their remarkable journey through the mountains of Kentucky and beyond in Depression-era America Alice Wright marries handsome American Bennett Van Cleve, hoping to escape her stifling life in England. But small-town Kentucky quickly proves equally claustrophobic, especially living alongside her overbearing father-in-law. So when a call goes out for a team of women to deliver books as part of Eleanor Roosevelt's new traveling library, Alice signs on enthusiastically. The leader, and soon Alice's greatest ally, is Margery, a smart-talking, self-sufficient woman who's never asked a man's permission for anything. They will be joined by three other singular women who become known as the Packhorse Librarians of Kentucky. What happens to them--and to the men they love--becomes an unforgettable drama of loyalty, justice, humanity, and passion. These heroic women refuse to be cowed by men or by convention. And though they face all kinds of dangers in a landscape that is at times breathtakingly beautiful, at others brutal, they're committed to their job: bringing books to people who have never had any, arming them with facts that will change their lives. Based on a true story rooted in America's past, *The Giver of Stars* is unparalleled in its scope and epic in its storytelling. Funny, heartbreaking, enthralling, it is destined to become a modern classic--a richly rewarding novel of women's friendship, of true love, and of what happens when we reach beyond our grasp for the great beyond.

*Grace Before Dying* tells the emotional story of an extraordinary breakthrough in humanity that has helped to transform one of the most dangerous maximum security prisons in the US, the Louisiana State Penitentiary at Angola, into one of the least violent. Award-winning photographer Lori Waselchuk not only shows a culture of caring and compassion that challenges stereotypes of the incarcerated, but also provides an intimate and personal perspective on what long-term and life sentences signify from those inside. Includes an essay by prominent historian Lawrence N. Powell.

*Bodies in Revolt* argues that the Americans with Disabilities Act (ADA) could humanize capitalism by turning employers into care-givers, creating an ethic of care in the workplace. Unlike other feminists, Ruth O'Brien bases her ethics not on benevolence, but rather on self-preservation. She relies on Deleuze's and Guattari's interpretation of Spinoza and Foucault's conception of corporeal resistance to show how a workplace ethic that is neither communitarian nor individualistic can be based upon the rallying cry "one for all and all for one." "This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future." —Ralph Nader, *Consumer Advocate* This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone

systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how technology can affect your life—whether you like it or not!

This book breaks new ground in ensuring access to the criminal justice system for one of the most vulnerable groups in the disability sphere: those individuals who have little or no functional speech. Their voices have been silent for too long. The book provides an international perspective on violence against children and adults with disabilities. It focusses on promising practices and approaches to reduce the risks and occurrence of violence, intervention, access to justice, increase awareness, knowledge and understanding of the violence, rape and sexual abuse against people with disabilities, with an emphasis on people who have little or no functional speech. Each chapter, written by an expert on disability and/or law and peer reviewed, contains extensive information, references, resources, manuals for practice, stories and reports of people with disabilities themselves confronting the violence they experienced. They also provide whatever data and statistics there are about the prevalence, the perpetrators, and access to justice. The UN Convention on the Rights of Persons with Disabilities (CRPD) has been ratified in over 135 countries to date. Three articles from the CRPD that apply directly to the topic of violence against people with disabilities and their access to the criminal justice system are focal throughout the book.

New from the No. 1 Sunday Times We feel more divided than ever. This riveting analysis tells you why. Walls are going up. Nationalism and identity politics are on the rise once more. Thousands of miles of fences and barriers have been erected in the past ten years, and they are redefining our political landscape. There are many reasons why we erect walls, because we are divided in many ways: wealth, race, religion, politics. In Europe the ruptures of the past decade threaten not only European unity, but in some countries liberal democracy itself. In China, the Party's need to contain the divisions wrought by capitalism will define the nation's future. In the USA the rationale for the Mexican border wall taps into the fear that the USA will no longer be a white majority country in the course of this century. Understanding what has divided us, past and present, is essential to understanding much of what's going on in the world today. Covering China; the USA; Israel and Palestine; the Middle East; the Indian Subcontinent; Africa; Europe and the UK, bestselling author Tim Marshall presents a gripping

and unflinching analysis of the fault lines that will shape our world for years to come.

Perfect for fans of original and engaging sports writing, this is the first intelligent and accessible history of soccer chants in the UK "The tales we tell each other on the terraces create something you cannot see, only feel, but it is very real and it goes very deep. . ." Soccer chants—spontaneous, witty, tribal, and, sometimes, downright offensive—are the grassroots of the game, from the Premiership all the way down to the Conference, and the sentiments behind the roar when the "Dirty northern b\*st\*rds!" meet the "Soft southern b\*st\*rds!" follow the divisions and the history of modern Britain. No other sport has a culture quite like it. In this witty and insightful narrative, Tim Marshall explores this powerful and passionate weekly ritual from the industrial revolution to the sexual revolution, touching on issues of race, class, and regional identity. Telling stories of the deep-rooted, tribal rivalries between the great industrial cities, via Elgar's chant for Wolverhampton Wanderers, to the moving origins of Captain John Currie Lauder's "Keep Right on to the End of the Road," now sung by thousands of Birmingham City fans, this book brings to life the love, hate, passion—and humor—that are the spirit of British soccer.

A spirited look at the history of alcohol, from the dawn of civilization to the modern day Alcohol is a fundamental part of Western culture. We have been drinking as long as we have been human, and for better or worse, alcohol has shaped our civilization. Drink investigates the history of this Jekyll and Hyde of fluids, tracing mankind's love/hate relationship with alcohol from ancient Egypt to the present day. Drink further documents the contribution of alcohol to the birth and growth of the United States, taking in the War of Independence, the Pennsylvania Whiskey revolt, the slave trade, and the failed experiment of national Prohibition. Finally, it provides a history of the world's most famous drinks—and the world's most famous drinkers. Packed with trivia and colorful characters, Drink amounts to an intoxicating history of the world.

"The four essays in this volume constitute Derrida's most explicit and sustained reflection on the art work as pictorial artifact, a reflection partly by way of philosophical aesthetics (Kant, Heidegger), partly by way of a commentary on art works and art scholarship (Van Gogh, Adami, Titus-Carmel). The illustrations are excellent, and the translators, who clearly see their work as both a rendering and a transformation, add yet another dimension to this richly layered composition. Indispensable to collections emphasizing art criticism and aesthetics."—Alexander Gelley, Library Journal

The last of the devastating series of conflicts resulting from the breakup of Yugoslavia in the early 1990s, the Kosovo War saw more than 13,500 fatalities, with reports of atrocities, amid controversial intervention and bombing by NATO. Twenty years have passed since the war's end on 11 June 1999, yet Kosovo's status remains uncertain and questions remain about the possibility of future conflict on European soil. Tim Marshall, then diplomatic editor at Sky News, was on the ground covering the war. This is his captivating account of how events unfolded, exploring the inside story of the way MI6 and the CIA helped the Serbian people to overthrow Slobodan Milosevic, the president of Yugoslavia. It is also a thrilling journalistic memoir, revealing key strategic insights that went on to shape the ideas behind the million-copy international and no.1 Sunday Times bestseller *Prisoners of Geography*. Drawing on personal experience, eyewitness accounts, and interviews with intelligence officials from five countries, this is the definitive account of one of the major events in recent geopolitical history, the repercussions of which continue to be felt today.

The New York Times and USA Today bestseller! "...a hauntingly atmospheric love letter to the first mobile library in Kentucky and the fierce, brave packhorse librarians who wove their way from shack to shack dispensing literacy, hope, and — just as importantly — a compassionate human connection."—Sara Gruen, author of *Water for Elephants* The hardscrabble folks of Troublesome Creek have to scrap for everything—everything except books, that is. Thanks to Roosevelt's Kentucky Pack Horse Library Project, Troublesome's got its very own traveling librarian, Cussy Mary Carter. Cussy's not only a book woman, however, she's also the last of her kind, her skin a shade of blue unlike most anyone else. Not everyone is keen on Cussy's family or the Library Project, and a Blue is often blamed for any whiff of trouble. If Cussy wants to bring the joy of books to the hill folks, she's going to have to confront prejudice as old as the Appalachias and suspicion as deep as the holler. Inspired by the true blue-skinned people of Kentucky and the brave and dedicated Kentucky Pack Horse library service of the 1930s, *The Book Woman of Troublesome Creek* is a story of raw courage, fierce strength, and one woman's belief that books can carry us anywhere—even back home. Additional Praise for *The Book Woman of Troublesome Creek*: "A unique story about Appalachia and the healing power of the written word."—Kirkus

"A timeless and significant tale about poverty, intolerance and how books can bring hope and light to even the darkest pocket of history."—Karen Abbott, New York Times bestselling author of *Liar Temptress Soldier Spy* "Emotionally resonant and unforgettable, *The Book Woman of Troublesome Creek* is a lush love letter to the redemptive power of books."—Joshilyn Jackson, New York Times and USA Today bestselling author of *The Almost Sisters*

A guide to many words in the English language, that students may encounter in a college curriculum.

This text addresses the specific lack of clinical educational support for transgender and gender nonconforming (TGNC) individuals as they age. Chapters are written by multidisciplinary healthcare experts who present topical discussions in five critical areas: essential foundational information needed to understand the life experience of older TGNC people; mental and behavioral health issues; social service considerations; specific concerns for nurses; and unique long-term medical concerns for providers. In addition, special attention is placed on providing care for TGNC veteran populations, including strategies to access social services and Social Security, and developing support networks. *Transgender Health and Aging* is an excellent resource for clinical and research professionals from a variety of medical disciplines, including geriatricians, primary care physicians, psychiatrists, public health officials, social workers, nurses as well as nonprofessional audiences interested in transgender healthcare in older adults.

A rare academic study on what John Rawls, Peter Singer, and Derek Parfit acknowledge as the finest book in ethics -- *The Methods of Ethics*. With a rather shocking conclusion that "none of us can match Sidgwick," Mariko Nakano-Okuno lucidly analyzes Henry Sidgwick's impacts on contemporary ethics. An instant New York Times bestseller, John Kerry's revealing memoir offers "a detailed record of an important life...frank, thoughtful, and clearly written...A bittersweet reminder of what the country once demanded of its leaders" (*The New York Times Book Review*). *Every Day Is Extra* is John Kerry's candid personal story. A Yale graduate, Kerry enlisted in the US Navy in 1966, and served in Vietnam. He returned home highly decorated but disillusioned, and he testified powerfully before Congress as a young veteran opposed to the war. Kerry was elected to the Senate in 1984, eventually serving five terms. In 2004 he was the Democratic presidential nominee and came within one state—Ohio—of winning. He succeeded Hillary Clinton as Secretary of State in 2013. In that position he tried to find peace in the Middle East; dealt with the Syrian civil war while combatting ISIS; and negotiated the Iran nuclear deal and the Paris climate agreement. "In these pages Kerry shows remarkable honesty, depth, even spirituality...There is remarkable poignancy—not the usual currency of the career politician and the country's top diplomat" (*The Boston Globe*). A witness to some of the most important events of our recent history, Kerry tells wonderful stories about colleagues Ted Kennedy and John McCain, as well as President Obama

and other major figures. He writes movingly of recovering his faith while in the Senate, and how he deplores the hyper-partisanship that has infected Washington. Every Day Is Extra “draws back the curtain on a life you thought you knew, but turns out to be a bit different...A surprisingly personal book” (The Washington Post) that shows Kerry for the dedicated, witty, and authentic man that he is and provides forceful testimony for the importance of diplomacy and American leadership to address the increasingly complex challenges of a more globalized world.

In this groundbreaking book, Scalia and Garner systematically explain all the most important principles of constitutional, statutory, and contractual interpretation in an engaging and informative style with hundreds of illustrations from actual cases. Is a burrito a sandwich? Is a corporation entitled to personal privacy? If you trade a gun for drugs, are you using a gun in a drug transaction? The authors grapple with these and dozens of equally curious questions while explaining the most principled, lucid, and reliable techniques for deriving meaning from authoritative texts. Meanwhile, the book takes up some of the most controversial issues in modern jurisprudence. What, exactly, is "textualism?" Why is "strict construction" a bad thing? What is the true doctrine of "originalism?" And which is more important: the spirit of the law, or the letter? The authors write with a well-argued point of view that is definitive yet nuanced, straightforward yet sophisticated.

Tim Marshall, the New York Times bestselling author of Prisoners of Geography,

offers “a readable primer to many of the biggest problems facing the world” (Daily Express, UK) by examining the borders, walls, and boundaries that divide countries and their populations. The globe has always been a world of walls, from the Great Wall of China to Hadrian’s Wall to the Berlin Wall. But a new age of isolationism and economic nationalism is upon us, visible in Trump’s obsession with building a wall on the Mexico border, in Britain’s Brexit vote, and in many other places as well. China has the great Firewall, holding back Western culture. Europe’s countries are walling themselves against immigrants, terrorism, and currency issues. South Africa has heavily gated communities, and massive walls or fences separate people in the Middle East, Korea, Sudan, India, and other places around the world. In fact, more than a third of the world’s nation-states have barriers along their borders. Understanding what is behind these divisions is essential to understanding much of what’s going on in the world today. Written in Tim Marshall’s brisk, inimitable style, *The Age of Walls* is divided by geographic region. He provides an engaging context that is often missing from political discussion and draws on his real life experiences as a reporter from hotspots around the globe. He examines how walls, borders, and barriers have been shaping our political landscape for hundreds of years, and especially since 2001, and how they figure in the diplomatic relations and geo-political events of today. “Marshall is a skilled explainer of the world as it is, and geography buffs will be pleased by his latest” (Kirkus Reviews). “Accomplished, well researched, and pacy...*The Age of Walls* is for anyone who wants to look beyond the headlines and explore the context of some of the biggest challenges facing the world today, it is a fascinating and fast read” (City AM, UK).

The compelling account of the extraordinary activities of Anti-Fascist Action (AFA) - by those who were there on the frontline - an organised and committed group of ordinary working class people who, during the 1980s and 1990s took the fight to the far right - and won! Following the electoral collapse of the National Front in 1979, fascists went on the rampage. Race attacks escalated. NF/BNP gangs employed violence on the streets, on the terraces and to control the music scene. Young anti-fascists stepped up. A new hardline leadership emerged and AFA was formed in 1985. "A state of war" was how one rueful BNP leader would describe what happened next. Not only is *Beating the Fascists* a meticulously researched study, it is also a much-needed piece of history from below. Throughout, the voices of working class anti-fascists come across hard, clear, and without apology. Illuminating and sometimes chilling by turn, the running commentary they provide helps ensure the tempo never flags. Gradually the reader is drawn into an outlaw world of back street idealism, paramilitary style violence and heroic self-sacrifice.

Altheide deals with a very simple paradox: in the past, people communicated in order to get something done; now they must first do something in order to communicate. The role of the mass media in establishing, shaping, and maintaining basic communication formats is the main focus of his book. He looks at how mass-mediated versions of events differ from those experienced first-hand, and at what would happen if everyone had unlimited access to television broadcasting facilities. Using specific examples and case studies of current events, Altheide examines the impact and implications of the mass media on a range of phenomena from international relations down to self-concept. `(This book) is an important complement to that whol
