This lush, beautifully illustrated narrative breathes humanity and warmth into one of the most famous and enigmatic koans of the Zen tradition. The Story of Mu uses luminous illustrations and a mythic narrative structure to convey the great potential for peace and enlightenment that we all carry hidden within ourselves. Shot through with ineffable "thisness and thussness," Mu spins a visually rich, cosmogonic fable about the origins of the universe of space, time, matter, and life. It also touches something lost but always present within the human heart: an awakens that is without flaw, from the beginning before the beginning.

'An intriguing study of the minds of some of rugby's greatest leaders' - Tom English, BBC Sport An Official Licensed Product of the British & Irish Lions A British & Irish Lions tour presents one of the greatest challenges in sport. Rugby is a game that rewards creative expression, toil, teamwork and a never-say-die attitude. It can be joyful, vibrant and beautiful. Equally, it can brutally expose human flaws and frailties – even more so in the hugely pressurised environment of a Lions tour. Every team, no matter how talented, will find itself in dark and difficult situations both on and off the field; the successful ones are those with a leadership group that can navigate these challenging moments. In Legacy of the Lions, former Lions captain Gavin Hastings draws on his own experiences in the famous red jersey and interviews other greats of the game – including, among many others, Sam Warburton, Warren Gatland, Paul O'Connell, Brian O'Driscoll, Martin Johnson, Finlay Calder and Sir Ian McGeechan, plus a selection of their illustrious opponents, such as Kieran Read, John Smit and John Eales – to explore how to forge a successful team in this most rarefied of environments, the difficulties they each encountered and what leadership lessons they learned. Inspiring, humorous and illuminating, Legacy of the Lions casts a unique light on leadership, team-building and elite performance and reveals a new perspective on touring with – and playing against – The British & Irish Lions in the modern era.

On a winter's day in 1968, in a town in South Africa, a nineteen-year-old medical student changed the course of his country's history. Steve Biko's philosophy of Black Consciousness would inspire thousands of black students to demand an equal education. In this wide-ranging history and analysis, Manju Soni melds her own personal history with the growth of the youth movement against apartheid. She chronicles that movement's evolution from the sporadic protests of the Soweto Uprising, to the emergence of a national youth movement with over a million members. Delving deep into the archives of South Africa's Truth and Reconciliation Commission, she profiles in chilling detail the individuals in the apartheid government who made assassination a key tool of state policy. This story captures the power and desire of young black South Africans to become the agents of change. It is essential reading for readers of all ages, regardless of race.

An in-depth look at one of the most storied dynasties in Detroit sports history.

It remains a unique achievement. In 1971 the British Lions went to New Zealand and beat the All Blacks in a test series on their own soil. With gritty, never-say-die forwards like Ian McLaughlan and Mervyn Davies, and brilliant backs like Barry John, Gerald Davies and David Duckham, and under the inspired management of one of the finest coaches of all time, Carwyn James, the Lions won the first match, lost the second, and then came back to clinch the series in the third. But this unique rugby feat also spawned a unique book, for after the touring party had returned to the UK, the Lions captain John Dawes had the idea of organising an International Players' Conference, at which he and some of the key members of his victorious team would discuss the latest trends in rugby and offer the fruits of their experience in how to beat the greatest rugby team in the world. These talks and lectures were subsequently edited into a book, The Lions Speak by the Daily Telegraph's Rugby Correspondent, John Reason. In the years since it was first published, it has assumed cult status as one of the best and most insightful books ever published about the game of rugby. It stands as both a fascinating period piece about a sport that was played very differently in those days - when Bob Hiller would toe-punt penalties and conversions from a lovingly-crafted mud tee, and scrum halves like Gareth Edwards would launch his back-line from the scrum with a flamboyant diving pass - and a brilliant and witty deconstruction of the game's strategy and psychology by some of its most greatest and most intelligent practitioners, that is as relevant and valuable today as it ever was. Who better to talk about kicking and controlling the game than Barry John, or Mike Gibson on the role of the centre, or Carwyn James himself to reveal the secrets of his coaching methods that brought about the 1971 Lions' historic victory and British rugby's finest hour?

The illegal killing of Cecil – a famous and magnificent black-maned Zimbabwean lion – by an American big-game hunter in 2015 sparked international outrage. More significantly, it drew the world's attention to the devastating plight of Africa's lions. A century ago, there were more than 200,000 wild lions living in Africa. Today, with that population reduced by more than 90 per cent, many experts believe that without effective conservation plans, Africa's remaining wild lions could be completely wiped out by the mid-half of this century. When the Last Lion Roars explores the historic rise and fall of the lion as a global species, and examines the reasons behind its catastrophic decline. Interwoven with vivid personal encounters of Africa's last lions, Sara Evans questions what is being done to reverse (or at least stem) this population collapse, and she considers the importance of human responsibility in this decline and, more crucially, in their conservation. From the Lion Guardians in Kenya to the Living Walls of Tanzania, and the Hwange Lion Research Project in Zimbabwe, Sara meets both lions and their champions, people who are fighting to bring this iconic species back from the brink of extinction.

Football is an unmistakable part of the culture of Penn State, though the experience of a Nittany Lions home game—from the crowds and tailgates to the spectacle of the game itself—has changed significantly over the years. This richly illustrated and researched book tells the story of the structure that has evolved along with the university's celebrated football program: the iconic Beaver Stadium. Historian Lee Stout and engineering professor Harry H. West show how Beaver Stadium came to be, including a look at its predecessors, "Old" Beaver Field, built in 1893 on a site centrally located northeast of Old Main, and "New" Beaver Field, built on the northwest corner of campus in 1909. Stout and West explore the engineering and construction challenges of the stadium and athletic fields and reveal the importance of these facilities to the history of Penn State and its cherished traditions. Packed with archival photos and fascinating stories, Lair of the Lion is a celebration of the ways in which Penn State fans, students, and athletes have experienced home games from the 1880s to the present day, and of the monumental structure that the Lions now call home.

'Bravely pursued, acutely observed and elegantly told.' John Vaillant, author of The Tiger 'Urgent and important. This moving tale with a heroic cast of characters, leonine and human, is a must-

read for anyone passionate about wildlife and wild places.' Tony Park, author of Last Survivor This is the riveting and illuminating story of Australian writer Anthony Ham's extraordinary journey into the world of lions. Haunted by the idea that they might disappear from the planet in our lifetime, he ventured deep into the African wilderness, speaking to local tribespeople and activists as well as to rangers, scientists and conservationists about why lions are close to extinction and what can be done to save them. In The Last Lions of Africa, we walk alongside Anthony as he reveals the latest extraordinary science surrounding the earth's dwindling lion populations and their often surprising relationship to mankind. As he uncovers heartbreaking and astonishing accounts of individual lions, prides and habitats, each chapter unfolds as both gripping campfire story and deeply researched exploration of larger mysteries in the natural world. Anthony's vivid storytelling weaves together natural history, ancient lore and multidisciplinary science to show us a world in which human populations are growing and wild lands are shrinking; where lions and indigenous peoples fight not for sovereignty over the land but for their very existence. In this gripping and crucial book, Anthony Ham brings Africa, its people and its endangered lions to magnificent life and shows the surprising ways those last lions might be saved.

Anagarika Dharmapala (1864–1933) was a leading Sinhalese Buddhist reformer and national activist who ranks high among the makers of modern Buddhism. The Lion's Roar is one of the first detailed accounts of Anagarika Dharmapala's life and the pioneering role he played in the Sinhalese Buddhist nationalism at a time when resistance to colonial rule was mainly confined to the elite. The book explores his lifelong struggle for re-establishing Buddhist management of their own sacred places under Hindu control, particularly the Mahabodhi site in Bihar, India. Dharmapala's association with the Bengali intelligentsia, the 'bhadralok', and close interactions with Gandhi and Nehru in India, where he spent a greater part of his life, form an interesting part of the narration. Using a rich variety of primary sources, most importantly, Dharmapala's diaries, the book situates his life within the socio-political and cultural ethos of Ceylon (Sri Lanka) and chronicles the zealous efforts of a Buddhist crusader and monk who

wished to reform the religion in his native land and propagate it in the Western world.
