

When The Body Says No The Cost Of Hidden Stress

NATIONAL BESTSELLER In this accessible and groundbreaking book -- filled with the moving stories of real people -- medical doctor and bestselling author of *Scattered Minds*, Gabor Maté, shows that emotion and psychological stress play a powerful role in the onset of chronic illness. Western medicine achieves spectacular triumphs when dealing with acute conditions such as fractured bones or life-threatening infections. It is less successful against ailments not susceptible to the quick ministrations of scalpel, antibiotic or miracle drug. Trained to consider mind and body separately, physicians are often helpless in arresting the advance of most of the chronic diseases, such as breast cancer, rheumatoid arthritis, Crohn's disease, multiple sclerosis, fibromyalgia, and even Alzheimer's disease. Gabor Maté has found that in all of these chronic conditions, there is a common thread: people afflicted by these diseases have led lives of excessive stress, often invisible to the individuals themselves. From an early age, many of us develop a psychological coping style that keeps us out of touch with the signs of stress. So-called negative emotions, particularly anger, are suppressed. Dr. Maté writes with great conviction that knowledge of how stress and disease are connected is essential to prevent illness in the first place, or to facilitate healing. *When the Body Says No* is an impressive contribution to current research on the physiological connection between life's stresses and emotions and the body systems governing nerves, immune apparatus and hormones. With great compassion and erudition, Gabor Maté demystifies medical science and, as he did in *Scattered Minds*, invites us all to be our own health advocates. Excerpt from *When the Body Says No* "Only an intellectual luddite would deny the enormous benefits that have

Read Free When The Body Says No The Cost Of Hidden Stress

accrued to humankind from the scrupulous application of scientific methods. But not all aspects of illness can be reduced to facts verified by double-blind studies and by the strictest scientific techniques. We confine ourselves to a narrow realm indeed if we exclude from accepted knowledge the contributions of human experience and insight. . . . “In 1892 William Osler, one of the greatest physicians of all time, suspected rheumatoid arthritis to be a stress-related disorder. Today rheumatology all but ignores that wisdom, despite the supporting scientific evidence that has accumulated in the 110 years since Osler first published his text. That is where the narrow scientific approach has brought the practice of medicine. Elevating modern science to be the final arbiter of our sufferings, we have been too eager to discard the insights of previous ages.”

Can a person literally die of loneliness? Is there a connection between the ability to express emotions and Alzheimer’s disease? Is there such a thing as a ‘cancer personality’? Drawing on deep scientific research and Dr Gabor Maté’s acclaimed clinical work, *When the Body Says No* provides the answers to critical questions about the mind-body link – and the role that stress and our emotional makeup play in an array of common diseases such as arthritis, cancer, diabetes, heart disease, irritable bowel syndrome and multiple sclerosis. With dozens of case studies and stories including those of Lou Gehrig, Betty Ford and Lance Armstrong, Gabor Maté reveals ‘The Seven A’s of Healing’: the principles for healing and prevention of illness from hidden stress.

This book comprehensively reviews the 10 most influential epidemics in history, going beyond morbid accounts of symptoms and statistics to tell the often forgotten stories of what made these epidemics so calamitous. • Discusses epidemic disease as a major driving force in

Read Free When The Body Says No The Cost Of Hidden Stress

shaping our world • Brings epidemic diseases out of the background of historical narratives and demonstrates how they have had an immensely important role in deciding wars, toppling empires, sparking major leaps in technology, and even changing the human genome • Integrates science with history, sociology, religion, and other disciplines to provide the reader with a unique perspective not found in most other accounts of epidemic disease • Shares fascinating insights such as how an epidemic of yellow fever helped to double the size of the United States and why tuberculosis was once considered a disease of the intellectual elite

The New York Times bestselling guide to a healthy and pain-free life. Musculoskeletal pain disorders have reached epidemic proportions in the United States, with most doctors failing to recognize their underlying cause. In this acclaimed volume, Dr. Sarno reveals how many painful conditions—including most neck and back pain, migraine, repetitive stress injuries, whiplash, and tendonitis—are rooted in repressed emotions, and shows how they can be successfully treated without drugs, physical measures, or surgery. "My life was filled with excruciating back and shoulder pain until I applied Dr. Sarno's principles, and in a matter of weeks my back pain disappeared. I never suffered a single symptom again...I owe Dr. Sarno my life." - Howard Stern

From New York Times bestselling author Eleanor Henderson comes a turbulent love story meets harrowing medical mystery: the true story of the author's twenty-year marriage defined by her husband's chronic illness—and a testament to the endurance of love Eleanor met Aaron when she was just a teenager and he was working at a local record store—older, experienced, and irresistibly charming. Escaping the clichés of fleeting young love, their summer romance bloomed into a relationship that survived college and culminated in a marriage and two

Read Free When The Body Says No The Cost Of Hidden Stress

children. From the outside looking in, their life had all the trappings of what most would consider a success story. But, as in any marriage, things weren't always as they seemed. On top of the typical stresses of parenting, money, and work, there were the untended wounds of depression, addiction, and childhood trauma. And then one day, out of nowhere: a rash appeared on Aaron's arms. Soon, it had morphed into painful lesions covering his body. Eleanor was as baffled as the doctors. There was no obvious diagnosis, let alone a cure. And as years passed and the lesions gave way to Aaron's increasingly disturbed concerns about the source of his sickness, the husband she loved seemed to unravel before her eyes. A new fissure ruptured in their marriage, and new questions piled onto old ones: Where does physical illness end and mental illness begin? Where does one person end and another begin? And how do we exist alongside someone else's suffering? Emotional, intimate, and at times agonizing, *Everything I Have Is Yours* tells the story of a marriage tested by powerful forces outside both partners' control. It's not only a memoir of a wife's tireless quest to heal her husband, but also one that asks just what it means to accept someone as they are.

Explains the science behind the brain's opiate receptors and other evidence of the intimate connections between mind and body, and their meaning for the future of Western medicine

In this groundbreaking collection, well-known and cutting-edge authors bring to light life with mental illness. These evocative essays, by writers who either suffer from or have close family members diagnosed with mental illness or a developmental disorder, aim to break down the stigma that surrounds one of the most devastating of human tribulations. The writers recount their experiences with schizophrenia, bipolar disorder, autism, obsessive-compulsive disorder, clinical depression, post-traumatic stress disorder, and dissociative identity disorder. What

Read Free When The Body Says No The Cost Of Hidden Stress

does it feel like to be psychotic? What sorts of thoughts go through your mind while you are killing yourself? How does a mother go on after her schizophrenic son throws himself into an unfinished construction site? The anthology drills to the core of compassion and disappointment—transcending hope and sometimes finding beauty in insanity. With a foreword by physician and bestselling author Gabor Maté, MD, *Hidden Lives* gives readers a place to turn and communicates not despair but courage.

In this landmark work, internationally beloved teacher of meditation and “one of the great spiritual teachers of our time” (Alice Walker, author of *The Color Purple*) Jack Kornfield reveals that you can be instantly happy with the keys to inner freedom. Through his signature warmhearted, poignant, often funny stories, with their a-ha moments and O. Henry-like outcomes, Jack Kornfield shows how we can free ourselves, wherever we are and whatever our circumstances. Renowned for his mindfulness practices and meditations, Jack provides keys for opening gateways to immediate shifts in perspective and clarity of vision, allowing us to “grapple with difficult emotions” (Publishers Weekly, starred review) and know how to change course, take action, or—when we shouldn’t act—just relax and trust. Each chapter presents a path to a different kind of freedom—freedom from fear, freedom to start over, to love, to be yourself, and to be happy—and guides you into an active process that engages your mind and heart, awakens your spirit, and brings real joy, over and over again. Drawing from his own life as a son, brother, father, and partner, and on his forty years of face-to-face teaching of thousands of people across the country, Jack presents “a consommé of goodness, heart, laughter, tears, and breath, nourishing and delicious” (Anne Lamott, author of *Bird by Bird*). His keys to life will help us find hope, clarity, relief from past disappointments and guilt, and the

Read Free When The Body Says No The Cost Of Hidden Stress

courage to go forward.

From bestselling author Gabor Maté, the essential resource for understanding the roots and behaviors of addiction--now with an added introduction by the author. Based on Gabor Maté's two decades of experience as a medical doctor and his groundbreaking work with the severely addicted on Vancouver's skid row, *In the Realm of Hungry Ghosts* radically reenvision this much misunderstood field by taking a holistic approach. Dr. Maté presents addiction not as a discrete phenomenon confined to an unfortunate or weak-willed few, but as a continuum that runs throughout (and perhaps underpins) our society; not a medical "condition" distinct from the lives it affects, rather the result of a complex interplay among personal history, emotional, and neurological development, brain chemistry, and the drugs (and behaviors) of addiction. Simplifying a wide array of brain and addiction research findings from around the globe, the book avoids glib self-help remedies, instead promoting a thorough and compassionate self-understanding as the first key to healing and wellness. *In the Realm of Hungry Ghosts* argues persuasively against contemporary health, social, and criminal justice policies toward addiction and those impacted by it. The mix of personal stories—including the author's candid discussion of his own "high-status" addictive tendencies—and science with positive solutions makes the book equally useful for lay readers and professionals.

A rigorous, skeptical, deeply reported look at the new science behind the mind's surprising ability to heal the body. Have you ever felt a surge of adrenaline after narrowly avoiding an accident? Salivated at the sight (or thought) of a sour lemon? Felt turned on just from hearing your partner's voice? If so, then you've experienced how dramatically the workings of your mind can affect your body. Yet while we accept that stress or anxiety can damage our health,

Read Free When The Body Says No The Cost Of Hidden Stress

the idea of "healing thoughts" was long ago hijacked by New Age gurus and spiritual healers. Recently, however, serious scientists from a range of fields have been uncovering evidence that our thoughts, emotions and beliefs can ease pain, heal wounds, fend off infection and heart disease and even slow the progression of AIDS and some cancers. In *Cure*, award-winning science writer Jo Marchant travels the world to meet the physicians, patients and researchers on the cutting edge of this new world of medicine. We learn how meditation protects against depression and dementia, how social connections increase life expectancy and how patients who feel cared for recover from surgery faster. We meet Iraq war veterans who are using a virtual arctic world to treat their burns and children whose ADHD is kept under control with half the normal dose of medication. We watch as a transplant patient uses the smell of lavender to calm his hostile immune system and an Olympic runner shaves vital seconds off his time through mind-power alone. Drawing on the very latest research, Marchant explores the vast potential of the mind's ability to heal, lays out its limitations and explains how we can make use of the findings in our own lives. With clarity and compassion, *Cure* points the way towards a system of medicine that treats us not simply as bodies but as human beings. A New York Times Bestseller Finalist for the Royal Society Insight Investment Science Book Prize Longlisted for the Wellcome Book Prize

At some point in life, most of us will face health challenges of some kind. Whether it's chronic back pain, the stiffness and pain of rheumatoid arthritis, or more serious illnesses, as we age our bodies often stop doing what they used to do with ease. In *How To Say Yes When Your Body Says No*, psychologist Lee Jampolsky examines how people become overwhelmed, and often unable to cope during a health challenge. He discusses the importance of focusing on

Read Free When The Body Says No The Cost Of Hidden Stress

inner work in addition to medical treatment, pointing out that the mental diet we feed ourselves has profound effects on our physical well-being. Jampolsky shares his personal health challenges, from spending months in a body cast as a young man to going deaf from an autoimmune disease. He shows how learning to alter one's thoughts and beliefs about health is the key to physical well being. *How to Say Yes When Your Body Says No* is filled with meditations and exercises to develop an attitude of openness and healing, no matter what physical and emotional challenges we face.

Now significantly revised with over 70% new material, this is the authoritative presentation of Internal Family Systems (IFS) therapy, which is taught and practiced around the world. IFS reveals how the subpersonalities or "parts" of each individual's psyche relate to each other like members of a family, and how--just as in a family--polarization among parts can lead to emotional suffering. IFS originator Richard Schwartz and master clinician Martha Sweezy explain core concepts and provide practical guidelines for implementing IFS with clients who are struggling with trauma, anxiety, depression, eating disorders, addiction, and other behavioral problems. They also address strategies for treating families and couples. IFS therapy is listed in SAMHSA's National Registry of Evidence-Based Programs and Practices.

New to This Edition *Extensively revised to reflect 25 years of conceptual refinement, expansion of IFS techniques, and a growing evidence base. *Chapters on the Self, the body and physical illness, the role of the therapist, specific clinical strategies, and couple therapy. *Enhanced clinical utility, with significantly more "how-to" details, case examples, and sample dialogues. *Quick-reference boxes summarizing key points, and end-of-chapter summaries.

"I don't think I've ever read a book that paints such a complex and accurate landscape of what

Read Free When The Body Says No The Cost Of Hidden Stress

it is like to live with the legacy of trauma as this book does, while offering a comprehensive approach to healing." --from the foreword by Bessel van der Kolk A pioneering researcher gives us a new understanding of stress and trauma, as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging. Trauma is our response to an experience in which we feel powerless or lacking agency. Until now, researchers have treated these conditions as different, but they actually lie along a continuum. Dr. Elizabeth Stanley explains the significance of this continuum, how it affects our resilience in the face of challenge, and why an event that's stressful for one person can be traumatizing for another. This groundbreaking book examines the cultural norms that impede resilience in America, especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover. It explains the science of how to direct our attention to perform under stress and recover from trauma. With training, we can access agency, even in extreme-stress environments. In fact, any maladaptive behavior or response conditioned through stress or trauma can, with intentionality and understanding, be reconditioned and healed. The key is to use strategies that access not just the thinking brain but also the survival brain. By directing our attention in particular ways, we can widen the window within which our thinking brain and survival brain work together cooperatively. When we use awareness to regulate our biology this way, we can access our best, uniquely human qualities: our compassion, courage, curiosity, creativity, and connection with others. By building our resilience, we can train ourselves to make wise decisions and access choice--even during times of incredible stress, uncertainty, and change. With stories from men and women Dr. Stanley has trained in settings as varied as military bases, healthcare facilities,

Read Free When The Body Says No The Cost Of Hidden Stress

and Capitol Hill, as well as her own striking experiences with stress and trauma, she gives readers hands-on strategies they can use themselves, whether they want to perform under pressure or heal from traumatic experience, while at the same time pointing our understanding in a new direction.

A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

hormones were disrupting every system in her body, from digestion to immunity to sleep, was she able to reclaim her health. Having healed herself—and many patients since—Dr. Pawa now shares the secrets to long-lasting health and wellness in *The Mind-Body Cure*. Most people today are familiar with chronic stress—whether it’s family or work pressures, the anxiety we experience each day never seems to end. It may even feel like we’re always in fight-or-flight mode. As Dr. Pawa explains, the continuous and excessive release of stress hormones in our bodies are behind 75 percent of visits to a doctor's office. What if we could manage our stress and its harmful side effects with easy and affordable tools? *The Mind-Body Cure* teaches you to do just that. Dr. Pawa’s original REFRAME Toolkit offers 7 simple ways to reduce chronic stress, including making specific changes to your diet, sleep, exercise habits, and more tools including meditation and mindfulness techniques. Interweaving evidence-based science with practical advice to calm your mind, *The Mind-Body Cure* helps you move from primitive fight-or-flight mode to send healing hormones into your body instead. Praise for *The Mind-Body Cure* “What a wonderful combination of medical smarts with heartfelt practical wisdom! Comprehensive, full of examples, and always so useful, *The Mind-Body Cure* is an excellent book.” —Rick Hanson, Ph.D., New York Times-bestselling author of *Budda's Brain*, *NeuroDharma*, *Just One Thing* “Dr. Pawa moves mind-body medicine from the margins to the mainstream. Written with compassion, dedication, and rigorous science, this book is the definitive guide to holistic health—both for those who know the mind’s power to help heal the body and for those who have yet to discover it.” —Shimi Kang, MD, psychiatrist, and bestselling author of *The Dolphin Parent* and *The Tech Solution* “Dr. Bal Pawa is a compassionate physician who successfully integrates recommendations for the mind and body. She helps us

Read Free When The Body Says No The Cost Of Hidden Stress

realize that our thoughts can be our reality, especially when it comes to our health. And she explains how hormones affect our sleep, immune system, and emotions and how we can support them for optimal health.” —Lorna R. Vanderhaeghe, author of *A Smart Woman’s Guide to Hormones*

A psychologist with a reputation for penetrating to the heart of complex parenting issues joins forces with a physician and bestselling author to tackle one of the most disturbing and misunderstood trends of our time -- peers replacing parents in the lives of our children. Dr. Neufeld has dubbed this phenomenon peer orientation, which refers to the tendency of children and youth to look to their peers for direction: for a sense of right and wrong, for values, identity and codes of behaviour. But peer orientation undermines family cohesion, poisons the school atmosphere, and fosters an aggressively hostile and sexualized youth culture. It provides a powerful explanation for schoolyard bullying and youth violence; its effects are painfully evident in the context of teenage gangs and criminal activity, in tragedies such as in Littleton, Colorado; Tabor, Alberta and Victoria, B.C. It is an escalating trend that has never been adequately described or contested until *Hold On to Your Kids*. Once understood, it becomes self-evident -- as do the solutions. *Hold On to Your Kids* will restore parenting to its natural intuitive basis and the parent-child relationship to its rightful preeminence. The concepts, principles and practical advice contained in *Hold On to Your Kids* will empower parents to satisfy their children’s inborn need to find direction by turning towards a source of authority, contact and warmth. Something has changed. One can sense it, one can feel it, just not find the words for it. Children are not quite the same as we remember being. They seem less likely to take their cues from adults, less inclined to please those in charge, less afraid of

Read Free When The Body Says No The Cost Of Hidden Stress

getting into trouble. Parenting, too, seems to have changed. Our parents seemed more confident, more certain of themselves and had more impact on us, for better or for worse. For many, parenting does not feel natural. Adults through the ages have complained about children being less respectful of their elders and more difficult to manage than preceding generations, but could it be that this time it is for real? -- from *Hold On to Your Kids*

We tend to believe that normality equals health. Yet what is the norm in the Western world? Mental illness is on an unstoppable rise. Some 45% of Europeans suffer high blood pressure, and nearly 70% of Americans take at least one prescription drug. Illness and trauma are defining how we live. In his new masterpiece, renowned physician, addiction expert and author Gabor Maté dissects the underlying causes of this malaise - physical and emotional, and connects the dots between our personal suffering and the pressures of modern-day living. Over four decades of clinical experience, Dr Maté has found that the common definition of 'normal' is false: virtually all disease is actually a natural reflection of life in an abnormal culture, as we grow further and further apart from our true selves. But he also shows us the pathway to reconnection and healing. Filled with stories of people in the grip of illness or in the triumphant wake of recovery, this life-affirming book shows how true health is possible - if we are willing to embrace authenticity above social expectations. *The Myth of Normal* is Gabor Maté's most ambitious, compassionate and urgent book yet.

There are so many good reasons to say yes to premarital sex? everyone around you seems to be doing it and you are physically ready! Are there any good reasons to say no and is there any good way to stick with your no? Dan Wilson, a seasoned guide, gives young men and women an easy to understand primer on why they should say no to premarital sex and then

walks them through key steps to make sure that their no sticks. Instead of moralism and hard to follow rules, Wilson offers the hope of gospel power?to turn from what's hurtful toward God's best plan for couples.

#1 NEW YORK TIMES BESTSELLING PHENOMENON More than 6 million copies sold A Reese Witherspoon x Hello Sunshine Book Club Pick A Business Insider Defining Book of the Decade "I can't even express how much I love this book! I didn't want this story to end!"--Reese Witherspoon "Painfully beautiful."--The New York Times Book Review For years, rumors of the "Marsh Girl" have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life--until the unthinkable happens. *Where the Crawdads Sing* is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps.

The go-to guide to getting infants and toddlers to fall and stay asleep, completely revised and updated Kim West, LCSW-C, known to her clients as The Sleep Lady®, has developed an alternative and effective approach to helping children learn to gently put themselves to sleep without letting them "cry it out" -- an option that is not comfortable for many parents. Essential reading for any tired parent, or any expectant parent who wants to avoid the pitfalls of

sleeplessness, Good Night, Sleep Tight offers a practical, easy-to-follow remedy that will work for all families in need of nights of peaceful slumber! New material and updates include: New yoga recommendations Updated information for parents of young infants Expanded information on nighttime potty training Ending co-sleeping Sleep training for twins and multiples This new edition includes a Foreword by Jon Kabat-Zinn, how to run an Eight Step Recovery meeting, and how to teach a Mindfulness Based Addiction Recovery programme, including teacher's notes and handouts. All of us can struggle with the tendency towards addiction, but for some it can destroy their lives. In our recovery from addiction, the Buddha's teachings offer an understanding of how the mind works, tools for helping a mind vulnerable to addiction and ways to overcome addictive behaviour, cultivating a calm mind without resentments. A practical guide to overcoming vaginismus defines the disease and discusses its causes, offering advice on how women can deal with their partners and their doctors. Original. National ad/promo. Tour.

"This highly engaging landmark work, a natural history of exercise--by the author of the best seller *The Story of the Human Body*--seeks to answer a fundamental question: were you born to run or rest The first three parts of *Exercised* roughly follow the evolutionary story of human physical activity and inactivity, even as each chapter shatters a particular myth about exercise. Because we cannot understand physical activity without understanding its absence, Part One begins with physical inactivity. What are our bodies doing when we take it easy, including when we sit or sleep? Part Two explores physical activities that require speed, strength, and power, such as sprinting, lifting, and fighting. Part Three surveys physical activities that involve endurance, such as walking, running, or dancing, as well as their effect on aging. Part Four

Read Free When The Body Says No The Cost Of Hidden Stress

considers how anthropological and evolutionary approaches can help us exercise better in the modern world. How can we more effectively manage to exercise, and in what ways? To what extent, how, and why do different types and durations of exercise help prevent or treat the major diseases that are likely to make us sick and kill us?"--

NEW YORK TIMES BESTSELLER "I come from a family forged by tragedies and bound by a remarkable, unbreakable love," Hunter Biden writes in this deeply moving memoir of addiction, loss, and survival. When he was two years old, Hunter Biden was badly injured in a car accident that killed his mother and baby sister. In 2015, he suffered the devastating loss of his beloved big brother, Beau, who died of brain cancer at the age of forty-six. These hardships were compounded by the collapse of his marriage and a years-long battle with drug and alcohol addiction. In *Beautiful Things*, Hunter recounts his descent into substance abuse and his tortuous path to sobriety. The story ends with where Hunter is today—a sober married man with a new baby, finally able to appreciate the beautiful things in life.

An expert on traumatic stress outlines an approach to healing, explaining how traumatic stress affects brain processes and how to use innovative treatments to reactivate the mind's abilities to trust, engage others, and experience pleasure--
"If you want to understand the strange workings of the human body, and the

Read Free When The Body Says No The Cost Of Hidden Stress

future of medicine, you must read this illuminating, engaging book." —Siddhartha Mukherjee, author of *The Gene* In 2014, James Hamblin launched a series of videos for *The Atlantic* called "If Our Bodies Could Talk." With it, the doctor-turned-journalist established himself as a seriously entertaining authority in the field of health. Now, in illuminating and genuinely funny prose, Hamblin explores the human stories behind health questions that never seem to go away—and which tend to be mischaracterized and oversimplified by marketing and news media. He covers topics such as sleep, aging, diet, and much more:

- Can I “boost” my immune system?
- Does caffeine make me live longer?
- Do we still not know if cell phones cause cancer?
- How much sleep do I actually need?
- Is there any harm in taking a multivitamin?
- Is life long enough?

In considering these questions, Hamblin draws from his own medical training as well from hundreds of interviews with distinguished scientists and medical practitioners. He translates the (traditionally boring) textbook of human anatomy and physiology into accessible, engaging, socially contextualized, up-to-the-moment answers. They offer clarity, examine the limits of our certainty, and ultimately help readers worry less about things that don't really matter. *If Our Bodies Could Talk* is a comprehensive, illustrated guide that entertains and educates in equal doses. In this breakthrough guide to understanding, treating, and healing Attention

denied an abortion on women's lives"--

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

In this breakthrough guide to understanding, treating, and healing Attention Deficit Disorder, Dr. Gabor Maté, an adult with ADD and the father of three ADD children, shares information on:

- The external factors that trigger ADD

A Story You Will Never Forget.* France, 1714: in a moment of desperation, a young woman makes a Faustian bargain to live forever—and is cursed to be forgotten by everyone she meets. Thus begins the extraordinary life of Addie LaRue, and a dazzling adventure that will play out across centuries and continents, across history and art, as a young woman learns how far she will go to leave her mark on the world. But everything changes when, after nearly 300 years, Addie stumbles across a young man in a hidden bookstore and he remembers her name. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

A TikTok sensation, this rom-com about a young woman who agrees to fake date a colleague and bring him to her sister's wedding has "everything you could want in a romance" (Helen Hoang, New York Times bestselling author). Catalina Martín

desperately needs a date to her sister's wedding. Especially since her little white lie about her American boyfriend has spiralled out of control. Now everyone she knows—including her ex and his fiancée—will be there and eager to meet him. She only has four weeks to find someone willing to cross the Atlantic and aid in her deception. New York to Spain is no short flight and her raucous family won't be easy to fool. Enter Aaron Blackford—her tall, handsome, condescending colleague—who surprisingly offers to step in. She'd rather refuse; never has there been a more aggravating, blood-boiling, and insufferable man. But Catalina is desperate, and as the wedding draws nearer, Aaron looks like her best option. And she begins to realize he might not be as terrible in the real world as he is at the office.

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

Dr. John E. Sarno's groundbreaking research on TMS (Tension Myoneural Syndrome) reveals how stress and other psychological factors can cause back pain--and how you can be pain free without drugs, exercise, or surgery. Dr. Sarno's program has helped thousands of patients find relief from chronic back conditions. In this New York Times bestseller, Dr. Sarno teaches you how to identify stress and other psychological factors that cause back pain and demonstrates how to heal yourself--without drugs, surgery or exercise. Find out: Why self-motivated and successful people are prone to Tension Myoneural Syndrome (TMS) How anxiety and repressed anger trigger muscle spasms How people condition themselves to accept back pain as inevitable With case histories and the results of in-depth mind-body research, Dr. Sarno reveals how you can recognize the emotional roots of your TMS and sever the connections between mental and physical pain...and start recovering from back pain today.

“This groundbreaking book offers a compelling understanding of inherited trauma and fresh, powerful tools for relieving its suffering. Mark Wolynn is a wise and trustworthy guide on the journey toward healing.” —Tara Brach, PhD, author of *Radical Acceptance* and *True Refuge* A groundbreaking approach to transforming traumatic legacies passed down in families over generations, by an acclaimed expert in the field Depression. Anxiety. Chronic Pain. Phobias. Obsessive thoughts. The evidence is

compelling: the roots of these difficulties may not reside in our immediate life experience or in chemical imbalances in our brains—but in the lives of our parents, grandparents, and even great-grandparents. The latest scientific research, now making headlines, supports what many have long intuited—that traumatic experience can be passed down through generations. *It Didn't Start with You* builds on the work of leading experts in post-traumatic stress, including Mount Sinai School of Medicine neuroscientist Rachel Yehuda and psychiatrist Bessel van der Kolk, author of *The Body Keeps the Score*. Even if the person who suffered the original trauma has died, or the story has been forgotten or silenced, memory and feelings can live on. These emotional legacies are often hidden, encoded in everything from gene expression to everyday language, and they play a far greater role in our emotional and physical health than has ever before been understood. As a pioneer in the field of inherited family trauma, Mark Wolynn has worked with individuals and groups on a therapeutic level for over twenty years. *It Didn't Start with You* offers a pragmatic and prescriptive guide to his method, the Core Language Approach. Diagnostic self-inventories provide a way to uncover the fears and anxieties conveyed through everyday words, behaviors, and physical symptoms. Techniques for developing a genogram or extended family tree create a map of experiences going back through the generations. And visualization, active imagination, and direct dialogue create pathways to reconnection, integration, and reclaiming life and health. *It Didn't Start With You* is a transformative approach to

resolving longstanding difficulties that in many cases, traditional therapy, drugs, or other interventions have not had the capacity to touch.

Traumatic experiences leave a "living legacy" of effects that often persist for years and decades after the events are over. Historically, it has always been assumed that re-telling the story of what happened would resolve these effects. However, survivors report a different experience: Telling and re-telling the story of what happened to them often reactivates their trauma responses, overwhelming them rather than resolving the trauma. To transform traumatic experiences, survivors need to understand their symptoms and reactions as normal responses to abnormal events. They need ways to work with the symptoms that intrude on their daily activities, preventing a life beyond trauma. Dr. Janina Fisher, international expert on trauma, has spent over 40 years working with survivors, helping them to navigate the healing journey. In *Transforming the Living Legacy of Trauma*, she shows how the legacy of symptoms helped them survive and offers: - Step-by-step strategies that can be used on their own or in collaboration with a therapist - Simple diagrams that make sense of the confusing feelings and physical reactions survivors experience - Worksheets to practice the skills that bring relief and ultimately healing

So you want to go into space? WHY?! (No, really - it's sort of a terrible idea. We humans are perfectly designed for life on Earth. We can walk around, breathe, drink water, eat vegetables, read books, not get poisoned or crushed to death when we go

outside - it's lovely right where we are.) Not convinced? GOOD! People have been dreaming about space travel for centuries - there's something amazing about the idea of leaving our planet behind and setting out to explore the Universe - there's so much we still don't know. UK and Ireland's best-loved comedian Dara "Briain" takes you on a journey from the safety of your comfiest chair to the furthest reaches of space (and beyond!)

****Unraveling Trauma in the Body, Brain and Mind—a Revolution in Treatment**** In this culmination of his life's work, Peter A. Levine draws on his broad experience as a clinician, a student of comparative brain research, a stress scientist and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body, brain and psyche. *An Unspoken Voice* is based on the idea that trauma is neither a disease nor a disorder, but rather an injury caused by fright, helplessness and loss that can be healed by engaging our innate capacity to self-regulate high states of arousal and intense emotions. Enriched with a coherent theoretical framework and compelling case examples, the book elegantly blends the latest findings in biology, neuroscience and body-oriented psychotherapy to show that when we bring together animal instinct and reason, we can become more whole human beings.
