**Brand New: The Shape of Brands to Come** Wally Olins,2014-04-22 The world's leading practitioner of branding predicts the future of companies' identities in an ever-changing marketing landscape What is the future for brands and branding? Does globalization mean that variety and individuality will be crushed out of existence by massive multinationals? Will everywhere and everything become similar, like the world of airports today? Or will there still be room for brands that thrive on being different? What about the impact of digital technology and increasing customer feedback through the internet and social media? What, in fact, do customers want? Today's businesses, in addition to thinking about price and authenticity, have to deal with corporate social responsibility. How does this affect the products and services we consume? How does it influence the way we feel about organizations? Are corporations here to maximize profits and grow, or to help society, or both? With the rapid rise of new markets in India, China, Brazil, and elsewhere, will new global brands emerge based around local cultural strengths and heritage? If so, what will this mean for the traditional dominance of brands based on Western cultural norms? Wally Olins's fascinating book looks at every aspect of the world of branding. With his customary flair and no-nonsense prose, he analyzes the problems facing today's organizations, criticizes corporate missteps, praises those companies who seem to be building and sustaining brands efficiently in our brave new world, and predicts the future of branding. No one interested in marketing, business, or contemporary culture will want to be without this book.

Flatheads and Spoonies Jens Lund, 2021-10-21 Since the early 1800s, people have made a living fishing and harvesting mussels in the lower Ohio Valley. These river folk are conscious of an occupational and social identity separate from those who earn their living from the land. Sustained by a shared love of the river, deriving joy from the beauty of their chosen environment, and feeling great pride in their ability to subsist on its wild resources and to master the skills required to make a living from it, many still identify with the nomadic houseboat-dwelling subculture that flourished on the river from the early nineteenth century to the 1950s. Today's community of fisherfolk is small and economically marginal, but their activities sustain a complex set of traditional skills and a body of verbal folklore associated with river life. In *Flatheads and Spoonies*, Jens Lund describes the activities, boats, gear, verbal lore, and sense of identity of the fisher folk of the lower Ohio River Valley and provides historical and ethnobiological background for their way of life. Lund connects the importance of river fish in the diet of inhabitants of the valley to local fishing activities and explores the relationship between river people and those whose culture is primarily land-based, painting a colorful portrait of river fishing and river life. This book offers a look—historical and ethnographic—at a little-known aspect of traditional life in the American Midwest, still surviving today despite immense changes in environment, resources, and economic base.

**Fashionable Nonsense** Alan Sokal, Jean Bricmont, 2014-01-14 In 1996 physicist Alan Sokal published an essay in *Social Text*—an influential academic journal of cultural studies—touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. In *Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science*, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere narrations or social constructions.

*Becoming the Math Teacher You Wish You'd Had* Tracy Zager, 2016 Readers, be warned: you are about to fall in love. Tracy writes, Good math teaching begins with us. With those six words, she invites you on a journey through this most magnificent book of stories and portraits ... This book turns on its head the common misconception of mathematics as a black-and-white discipline and of being good at math as entailing ease, speed, and correctness. You will find it full of color, possibility, puzzles, and delight ... Let yourself be drawn in. Elham Kazemi, professor, math education, University of

Washington While mathematicians describe mathematics as playful, be.

*Bibliography and Modern Book Production* PERCY. FREER,2024-08 *Bibliography and Modern Book Production* is a fascinating historic journey through the fields of print history, librarianship and publishing. It covers key developments from

1494 to 1949 in bibliography and book production from the history of scripts and paper manufacture to the origins of typefaces and printing. Although not a textbook, the book was a guide for library students in the 1950s on the essential literature of librarianship. As the first librarian appointed to Wits University in 1929, Percy Freer's near encyclopaedic knowledge of the subject of bibliography enabled him to develop a key resource for relevant library examinations in South Africa and abroad. Due to its immense value as a historic record, and to acknowledge Freer's contributions as scholar, librarian and publisher, it is being reissued as part of the Wits University Press Re/Presents series to make it accessible to scholars in book histories, publishing studies and information science.

**Fisherman's Workbook** J. Prado, P. Y. Dremiere, 1991-01-15 This unusual pocketbook, designed for fishermen, netmakers, boatbuilders and other professionals, provides easy reference on land or sea, to a wealth of useful information. It is presented in five parts. The first helps with the choice and use of materials; the second with the choice of fishing gear; the next outline the characteristics of echo sounders and deck machinery for handling fishing gear. Then comes information on the most effective use of fishing vessels, and guidelines for calculating costs and benefits of fishing operations. Finally basic formulae and tables are given and a section on ordering equipment. Fishing technologies are not dependent on exact science, for individual experience, knowledge and skill are of great importance. This workbook therefore contains sets of guidelines drawn from the wide experience of master fishermen, to be used in combination with the individual's own experiences, knowledge and expertise.
