It's been over a year since Omri discovered in The Indian in the Cupboard that, with the turn of a key, he could magically bring to life the three-inch-high Indian figure he placed inside his cupboard. Omri and his Indian, Little Bear, create a fantastic world together until one day, Omri realizes the terrible consequences if Little Bear ever got trapped in his "giant" world. Reluctantly, Omri sends the Indian back through the cupboard, giving his mother the magic key to wear around her neck so that he will never be tempted to bring Little Bear back to life. But one year later, full of exciting news, Omri gives way to temptation when he finds that his mother has left the magic key lying on the bathroom sink. A whole new series of adventures awaits Omri as he discovers that his Indian has been critically wounded during the French and Indian Wars and desperately needs Omri's help. Now, helplessly caught between his own life and his cupboard life of war and death, Omri must act decisively if he is to save Little Bear and his village from being completely destroyed. Like Michelangelo, Galileo is another Renaissance great known just by his first name--a name that is synonymous with scientific achievement. Born in Pisa, Italy, in the sixteenth century, Galileo contributed to the era's great rebirth of knowledge. He invented a telescope to observe the heavens. From there, not even the sky was the limit! He turned long-held notions about the universe topsy turvy with his support of a sun-centric solar system. Patricia Brennan Demuth offers a sympathetic portrait of a brilliant man who lived in a time when speaking scientific truth to those in power was still a dangerous proposition.

A heartfelt, deeply personal book that shines a bright light on the values and principles that Bill Gates Sr. has learned over a lifetime of "showing up": lessons that he learned growing up during the Great Depression, and that he instilled in his children and continues to practice on the world stage as the co-chair of the Bill & Melinda Gates Foundation. Through the course of several dozen narratives arranged in roughly chronological fashion, Gates introduces the people and experiences that influenced his thinking and guided his moral compass. Among them: the scoutmaster who taught him about teamwork and self reliance; and his famous son, Trey, whose curiosity and passion for computers and software led him to ultimately co-found Microsoft. Through revealing stories of his daughters, Kristi and Libby; his late wife, Mary, and his current wife, Mimi; and his work with Nelson Mandela and Jimmy Carter, among others, he discusses the importance of hard work, getting along, honoring a confidence, speaking out, and much more. Showing Up for Life translates one man's experiences over fourscore years of living into an inspiring road map for readers everywhere. As Bill Gates Sr. puts it: "I'm 83 years old. Representing the Bill & Melinda Gates Foundation and everyone who is a part of it has given me the opportunity to see more of the world and its rich possibilities than most people ever do. I never imagined that I'd be working this late in life, or enjoying it so much."

From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Brosh's debut marks the launch of a major new American humorist who will surely make even the biggest scrooge or snob laugh. We dare you not to. FROM THE AUTHOR: This is a book I wrote. Because I wrote it, I had to figure out what to put on the back cover to explain what it is. I tried to write a long, third-person summary that would imply how great the book is and also sound vaguely authoritative—like maybe someone who isn't me wrote it—but I soon discovered that I'm not sneaky enough to pull it off convincingly. So I decided to just make a list of things that are in the book: Pictures Words Stories about things that happened to me Stories about things that happened to other people because of me Eight billion dollars* Stories about dogs The secret to eternal happiness* *These are lies. Perhaps I have underestimated my sneakiness!
