This nonfiction reader compares and contrasts two ferocious birds. Readers will learn about each animal's anatomy, behavior, and more. Then compare and contrast the battling pair before finally discovering the winner.

My wife just shot our waiter between the eyes when he came in with breakfast! But, he had it coming to him as he had a gun on the tray and was going to give us Eggs Benedict with a Glock! Join Marsha and I as we work really hard to protect the Sea Empress and her passengers from threats from every direction. There have been so many shots taken at this ship by terrorists that the cruise line thought their business would sink. That is why we were hired to provide security.

Things go so bad that the passengers were taking photos and video and emailing the explosions and hostage scene to CNN and Fox News. Instead of scaring off passengers, bookings for the ship went through the roof. The Seven Seas Company caught the spirit of the passengers and even set up a special for the ship theatre with a pirate theme! Finally, my wife and I needed a break and took a week off to sail on a private charter at the Grenadines and wouldn't you know, two local thugs dressed up as pirates tried to rob us while we sat at anchor for an intimate dinner for two. Well, our cook was great at other things besides her lobster spaghetti.

Who Would Win? is back with another exciting bind-up featuring five more books in this action-packed animal series! When Deadly Creatures Fight - Who Would Win? Over many thousands of years some truly fearsome creatures have evolved. From big cats armed with razor sharp talons, and teeth capable of tearing through the toughest hide, through highly venomous reptiles, snakes and insects, to the giant and ferocious creatures swimming in our oceans. Each is a master of its own realm, and each will attack relentlessly if it feels threatened. But, if nature were to throw these creatures together into a battle arena to face-up to one another, just who would win? This book does just that. It pits predator

against deadly predator, examines their strengths and weaknesses, looks at real matches that have been fought throughout history, and reveals in detail, When deadly creatures fight - who would win. The battle lines are drawn between ten pairs of terrifying killing machines: The mighty Lion versus the ferocious Grizzly Bear The Tarantula versus the Scorpion The Crocodile versus the Alligator The Rhinoceros versus the African Elephant The Hippopotamus versus the Crocodile The Eagle versus the Vulture The Killer Whale versus the Great White Shark The Grey Wolf versus the Spotted Hyena The Polar Bear versus the Kodiak Bear The Lion versus the Tiger The perfect book for boys aged 8 - 12, teenagers with their mates, student discussions in the early hours and dads who want to impress their children! Sixteen different jungle animals battle it out in an epic fight! Who will be the champion?

Introduces killer whales, discussing their physical characteristics, diet, habitats, and status as an endangered species. Famed in story as "the great leviathans," sperm whales are truly creatures of extremes. Giants among all whales, they also have the largest brains of any creature on Earth. Males can reach a length of sixty-two feet and can weigh upwards of fifty tons. With this book, Hal Whitehead gives us a clearer picture of the ecology and social life of sperm whales than we have ever had before. Based on almost two decades of field research, Whitehead describes their biology, behavior, and habitat; how they organize their societies; and how their complex lifestyles may have evolved in this unique environment. Among the many fascinating topics he explores is the crucial role that culture plays in the life of the sperm whale, and he traces the consequences of this argument for both evolution and conservation. Finally, drawing on these

findings, Whitehead builds a general model of how the ocean environment influences social behavior and cultural evolution among mammals as well as other animals. The definitive portrait of a provocative creature, Sperm Whales will interest animal behaviorists, conservationists, ecologists, and evolutionary biologists as well as marine mammalogists. What would happen if a polar bear and a grizzly bear met and had a fight? This nonfiction reader compares and contrasts the two species. Students will learn about the animals' anatomies, behaviors, and more. Includes beautiful photos, charts, illustrations, and fascinating facts.
