The enormously puzzling TV series *The Prisoner* has developed a rapt cult following, and has often been described as "surreal" or "Kafkaesque." In *I Am (Not) a Number*, Cox takes an opposing view. While the series has surreal elements, he believes it provides the answers to all the questions which have confounded viewers: who is Number 6? Who runs *The Village*? Who—or what—is Number 1? According to Cox, the key is to view the series in the order in which the episodes were made, not in the order of the UK or US television screenings. In this book he does exactly that, and provides an entirely original and controversial "explanation" for what is perhaps the best, and certainly the most perplexing, TV series of all time.

Grab the best seat in the house with this funny, touching picture book about a giraffe who keeps being mistaken for a chair! From the acclaimed author-illustrator of *There's a Giraffe in My Soup*, Ross Burach, comes a curious tale about finding one's courage and standing up for oneself. Full of vibrant and playful illustrations and hilariously absurd logic, kids will want to read it again and again. Could there be anything worse for Giraffe? Maybe being sat on by a skunk or smooshed by two hapless hippos, or worst of all—cornered by a hungry lion? No one seems to notice that Giraffe is not standing around just to be sat upon. Will he be able to find his voice and make his friends realize who he really is?

Exploring biblical, theological and historical perspectives, Robert A. Peterson and Michael D. Williams critique problematic aspects of Arminian thought, particularly Arminian views on human nature and God's sovereignty. *Why I am not a Christian and other religious essays: Am I An Atheist Or An Agnostic?; My Religious Reminiscences; Religion and Metaphysics; Has Religion Made Useful Contributions to Civilization?; How I Came by My Creed; Or, What I Believe: Why I Am a Rationalist.*

Bertrand Arthur William Russell, 18 May 1872–2 February 1970) was a British philosopher, logician, mathematician, historian, writer, social critic and political activist. At various points in his life he considered himself a liberal, a socialist, and a pacifist. In the early 20th century, Russell led the British "revolt against idealism". He is considered one of the founders of analytic philosophy along with his predecessor Gottlob Frege, colleague G. E. Moore, and his protégé Ludwig Wittgenstein. He is widely held to be one of the 20th century's premier logicians. With A. N. Whitehead he wrote *Principia Mathematica*, an attempt to create a logical basis for mathematics.

Comedy legend Johnny Leland has called in his chips. He's organizing a charity telethon and needs TV cop Richard Belzer to cohost. Not one to let down an old friend -- much less the guy who gave him his start in stand-up comedy -- The Belz gets ready to head out to Las Vegas for the headlining event when he receives a mysterious phone call. Twenty-six years ago, beautiful starlet Bridget Burgeon was found dead in her Hollywood apartment. Sleeping pills, the coroner ruled, but many questioned whether her relationship with handsome, up-and-coming California congressman Mark Kaye played a role. Kaye's death in a tragic auto accident put an end to any investigation but not to the speculation. Conspiracy theorists have been working overtime ever since, and Paul Venchus, an old newspaper colleague whom Richard hasn't seen in thirty years, claims to have made a breakthrough in the case. A well-known conspiracy theorist himself, The Belz can't resist hearing him out and agrees to meet. When Venchus turns up dead and a wacky, self-proclaimed female psychic shows up at his hotel in Vegas insisting that Belzer continue their investigation, he reluctantly relents. Relying on The Belz's TV cop know-how and celebrity status, they begin to piece together a series of mysterious

deaths that, while rooted a quarter of a century in the past, present some very real dangers in the present. As the bodies start piling up, Belzer finds a legendary hit man hot on his trail and must utilize all of his talents not only to pull off a successful telethon but to solve one of our history's most scandalous conspiracies before his Vegas stint becomes his closing act.

'The most gratifying thing for me [is] that [this book] was listed as a millennium book [by The Pioneer] along with Dr. B. R. Ambedkar's *Annihilation of Caste*. Moreover, it has been translated into several Indian languages. In a way it has become a weapon in the hands of Dalitbahujan activists' (from the Afterword to the second edition). Kancha Ilaiah Shepherd writes with passionate anger, laced with sarcasm, on the caste system and Indian society. He looks at the socioeconomic and cultural differences between the Dalitbahujans and Hindus in the contexts of childhood, family life, market relations, power relations, Gods and Goddesses, death and, not the least, Hindutva. Synthesizing many of the ideas of Bahujans, he presents their vision of a more just society. In this second edition, Ilaiah Shepherd presents an Afterword that discusses the history of this book, often seen as the manifesto of the downtrodden Dalitbahujans. He talks of its reviews as well as of the abuse he has received from its detractors. He reminds us of the need for an ongoing dialogue. As he says, he wrote the book 'for all who have open minds. My request to Brahmin, Baniya and neo-Kshatriyas [upper class Sudras] is this: You learnt only what to teach others—the Dalitbahujans. Now in your own interest and in the interest of this great country, you must learn to listen and to read what we have to say.'

Autobiographical reminiscences of a former civil servant of India discussing the sorry state of Indian civil services.

Outspoken critic Jessa Crispin delivers a searing rejection of

contemporary feminism . . . and a bracing manifesto for revolution. Are you a feminist? Do you believe women are human beings and that they deserve to be treated as such? That women deserve all the same rights and liberties bestowed upon men? If so, then you are a feminist . . . or so the feminists keep insisting. But somewhere along the way, the movement for female liberation sacrificed meaning for acceptance, and left us with a banal, polite, ineffectual pose that barely challenges the status quo. In this bracing, fiercely intelligent manifesto, Jessa Crispin demands more. *Why I Am Not A Feminist* is a radical, fearless call for revolution. It accuses the feminist movement of obliviousness, irrelevance, and cowardice—and demands nothing less than the total dismantling of a system of oppression. Praise for Jessa Crispin, and The Dead Ladies Project "I'd follow Jessa Crispin to the ends of the earth." --Kathryn Davis, author of *Duplex* "Read with caution . . . Crispin is funny, sexy, self-lacerating, and politically attuned, with unique slants on literary criticism, travel writing, and female journeys. No one crosses genres, borders, and proprieties with more panache." --Laura Kipnis, author of *Men: Notes from an Ongoing Investigation* "Very, very funny. . . . The whole book is packed with delightfully offbeat prose . . . as raw as it is sophisticated, as quirky as it is intense." --The Chicago Tribune

Paying particular attention to the issue of God's sovereignty, Jerry L. Walls and Joseph R. Dongell critique biblical and theological weaknesses of Calvinist thought.

Those who practice the Muslim faith have resisted examinations of their religion. They are extremely guarded about their religion, and what they consider blasphemous acts by skeptical Muslims and non-Muslims alike has only served to pique the world's curiosity. This critical examination reveals an unflattering picture of the faith and its practitioners. Nevertheless, it is the truth, something that has either been

deliberately concealed by modern scholars or buried in obscure journals accessible only to a select few.

National Bestseller Nominated for the Academy Award for Best Documentary To compose his stunning documentary film *I Am Not Your Negro*, acclaimed filmmaker Raoul Peck mined James Baldwin's published and unpublished oeuvre, selecting passages from his books, essays, letters, notes, and interviews that are every bit as incisive and pertinent now as they have ever been. Weaving these texts together, Peck brilliantly imagines the book that Baldwin never wrote. In his final years, Baldwin had envisioned a book about his three assassinated friends, Medgar Evers, Malcolm X, and Martin

Luther King. His deeply personal notes for the project have never been published before. Peck's film uses them to jump through time, juxtaposing Baldwin's private words with his public statements, in a blazing examination of the tragic history of race in America. This edition contains more than 40 black-and-white images from the film.

A brief meditation on the role of technology in his own life and how it has changed the landscape of the United States from "America's greatest philosopher on sustainable life and living" (Chicago Tribune). "A number of people, by now, have told me that I could greatly improve things by buying a computer. My answer is that I am not going to do it. I have several reasons, and they are good ones." Wendell Berry first challenged the idea that our advanced technological age is a good thing when he penned "Why I Am Not Going to Buy a Computer" in the late 1980s for Harper's Magazine, galvanizing a critical reaction eclipsing any the magazine had seen before. He followed by responding with "Feminism, the Body, and the Machine." Both essays are collected in one short volume for the first time.

"A provocative essay challenging the idea of Buddhist exceptionalism, from one of the world's most widely respected philosophers and writers on Buddhism and science. Buddhism has become a uniquely favored religion in our modern age. A burgeoning number of books extol the scientifically proven benefits of meditation and mindfulness for everything ranging from business to romance. There are conferences, courses, and celebrities promoting the notion that Buddhism is spirituality for the rational; compatible with cutting-edge science; indeed, "a science of the mind." In this

provocative book, Evan Thompson argues that this representation of Buddhism is false. In lucid and entertaining prose, Thompson dives deep into both Western and Buddhist philosophy to explain how the goals of science and religion are fundamentally different. Efforts to seek their unification are wrongheaded and promote mistaken ideas of both. He suggests cosmopolitanism instead, a worldview with deep roots in both Eastern and Western traditions. Smart, sympathetic, and intellectually ambitious, this book is a must-read for anyone interested in Buddhism's place in our world today."--Provided by publisher.

I Am Not a Tractor! celebrates the courage, vision, and creativity of the farmworkers and community leaders who have transformed one of the worst agricultural situations in the United States into one of the best. Susan L. Marquis highlights past abuses workers suffered in Florida's tomato fields: toxic pesticide exposure, beatings, sexual assault, rampant wage theft, and even, astonishingly, modern-day slavery. Marquis unveils how, even without new legislation, regulation, or government participation, these farmworkers have dramatically improved their work conditions. Marquis credits this success to the immigrants from Mexico, Haiti, and Guatemala who formed the Coalition of Immokalee Workers, a neuroscience major who takes great pride in the watermelon crew he runs, a leading farmer/grower who was once homeless, and a retired New York State judge who volunteered to stuff envelopes and ended up building a groundbreaking institution. Through the Fair Food Program that they have developed, fought for, and

implemented, these people have changed the lives of more than thirty thousand field workers. I Am Not a Tractor! offers a range of solutions to a problem that is rooted in our nation's slave history and that is worsened by ongoing conflict over immigration.

The Iglesia Ni Cristo or INC started in the Philippines in 1914 and has a Unitarian theology. What makes it unique is it boasts the Bible contains dozens of prophecies of their founder (Felix Manalo), their church, and the Philippines. It loudly proclaims it's the only "True Church" and all who refuse to convert will suffer eternal torment in the "lake of fire." It also imposes a level of control over its members that is abnormal in today's free societies, such as dictating to whom to vote, imposing public shunning and humiliation of disciplined or former members, and "discouraging" its members from conducting independent Bible study. This book examines and refutes every INC claim of prophetic fulfillment. It scrutinizes the INC assertion of exclusive authority to baptize and establishes the utter futility of its baptism since Felix Manalo cannot give what he does not have. This book also examines the Bible's teachings on the person of Jesus Christ and provides specific passages demonstrating the Bible teaches he is also "God" in addition to being a man. Lastly, it also provides proof that the Bible teaches the Holy Spirit is a sentient entity who is also "God."

Many consider the nature of human consciousness

to be one of the last great unsolved mysteries. Why should the light turn on, so to speak, in human beings at all? And how is the electrical storm of neurons under our skull connected with our consciousness? Is the self only our brain's user interface, a kind of stage on which a show is performed that we cannot freely direct? In this book, philosopher Markus Gabriel challenges an increasing trend in the sciences towards neurocentrism, a notion which rests on the assumption that the self is identical to the brain. Gabriel raises serious doubts as to whether we can know ourselves in this way. In a sharp critique of this approach, he presents a new defense of the free will and provides a timely introduction to philosophical thought about the self – all with verve, humor, and surprising insights. Gabriel criticizes the scientific image of the world and takes us on an eclectic journey of self-reflection by way of such concepts as self, consciousness, and freedom, with the aid of Kant, Schopenhauer, and Nagel but also Dr. Who, The Walking Dead, and Fargo.

"Highly readable and informative, this critical series of vignettes illustrates a long history of the corruption of science by folk beliefs, careerism, and sociopolitical agendas. Marks repeatedly brings home the message that we should challenge scientists, especially molecular geneticists, before we accept their results and give millions of dollars in

public and private funds toward their enterprises."—Russell Tuttle, The University of Chicago "Jonathan Marks has produced a personal and compelling story of how science works. His involvement in scientific endeavor in human biology and evolution over the past three decades and his keen sense of the workings of science make this book a must read for both scientists and lay readers. In this sense, the lay reader will learn how scientists should and shouldn't think and some scientists who read this book will come away thinking they are truly not scientists nor would they want to be."—Rob DeSalle, American Museum of Natural History "Jonathan Marks's *Why I Am Not a Scientist* provides food for thought, and as expected, it's digestible. In unusually broad perspective, this anthropology of knowledge considers science and race and racism, gender, fraud, misconduct and creationism in a way that makes one proud to be called a scientist."—George J. Armelagos, Emory University

This book was written from the REAL perspective of everyday men and women that struggle with finding peace in their home. No clinical sounding or Doctoral thesis was necessary to discuss what real people like you and I need to know. Stop paying the bills for drama to live in your home. A PLEA FOR CHANGE is here. Long time friends and Co-Authors Gregory Wright and Aaron Cox look at the real issues that

divide men and women in today's relationships. They feel society has conditioned us how to think, act and look. They also believe mass media ploys are becoming more main stream than family values. The hearts of men and women in this society have been suppressed by emotional thinking. They ask the question "Is society REALLY interested in your well being and quality of life"? Is it true to say our emotions drive our wants, but needs are attached to the heart? Our chapters will also identify how our wants have taken priority and our needs have been put off until another day that will come too late, if at all. Please don't be offended or take anything personally, we had to keep it REAL. Along with some laughs this book guarantees to put you back on track for what's REALLY important and living the American dream and not the American theme. Do you REALLY want to know why I am not at home exposes key issues to why we REALLY don't want to be home.

"I am as firmly convinced that religions do harm as I am that they are untrue" - preface.
