

Wild Sea Creatures Sharks Whales And Dolphins Wild Kratts Step Into Reading

Over 350 million years, sharks have evolved into the most successful hunters to roam the seas. This educational and entertaining coloring book focuses on 25 species of shark, ranging in size from the relatively tiny cookiecutter shark (1-1/2 feet long) to the monstrous whale shark (up to 65 feet). Carefully researched and skillfully rendered line drawings depict such fascinating species as the snakelike frilled shark; the thresher shark with its long, scythe-shaped tail; the rare and bizarre goblin shark; the dreaded great white shark, one of the most fearsome predators in the sea, and the swift and graceful blue shark. Also depicted are some of the shark's closest relatives: the spotted ratfish, sting ray, common skate, Atlantic torpedo ray, Atlantic guitarfish and smalltooth sawfish. A fact-filled caption accompanies each of Lynn Hunter's vivid illustrations, providing the sharks' common and scientific names, habitat, behavior, size, color, distinguishing features and other information. Further enhancing the book are a general introduction and a dramatic double-page illustration showing all 25 sharks drawn to scale. Educational and informative, *Sharks of the World Coloring Book* doubles as an excellent and inexpensive source of royalty-free illustrations for artists and designers. Some types of animals look alike but they are not the same! *Whale or Fish?* explores the stealthy differences between the two animals. Kids will learn to look at how they breathe, the texture of their skin, how they move and more. Simple sentences and eye-catching photographs will keep kids engaged. Fun facts will help them learn new things. Step-by-step animal crafts help kids demonstrate what they have discovered with this fun title. Aligned to Common Core standards and correlated to state standards. Super Sandcastle is an imprint of Abdo Publishing, a division of ABDO.

The Octoalert is sounded when Dashi is accidentally swallowed—by a whale shark! It is up to Barnacles, Peso, and Kwazii to venture inside the huge ocean animal to rescue her. Octonauts, let's do this!

Discover Reading Early Reader Amazing Animals live in the Ocean Read all about ocean animals in this Discover Reading Beginning Reader. Fish, coral, sharks and more are featured in manageable sentences for kindergarten, first, and second graders. The Wild Kratts roar in this Step into Reading story about lions! sharks."--Amazon.com.

“A spellbinding, heart-stopping adventure.” —Booklist (starred review) “A dreamily written, slyly educational, rousing maritime adventure.” —New York Times Book Review In the stand-alone companion to the New York Times–bestselling *A Wolf Called Wander*, a young orca whale must lead her brother on a tumultuous journey to be reunited with their pod. This gorgeously illustrated animal adventure novel explores family bonds, survival, global warming, and a changing seascape. Includes information about orcas and their habitats. For Vega and her family, salmon is life. And Vega is learning to be a salmon finder, preparing for the day when she will be her family’s matriarch. But then she and her brother Deneb are separated from their pod when a devastating earthquake and tsunami render the seascape unrecognizable. Vega must use every skill she has to lead her brother back to their family. The young orcas face a shark attack, hunger, the deep ocean, and polluted waters on their journey. Will Vega become the leader she’s destined to be? *A Whale of the Wild* weaves a heart-stopping tale of survival with impeccable research on a delicate ecosystem and threats to marine life. New York Times–bestselling author Rosanne Parry’s fluid writing and Lindsay Moore’s stunning artwork bring the Salish Sea and its inhabitants to vivid life. An excellent read-aloud and read-alone, this companion to *A Wolf Called Wander* will captivate fans of *The One and Only Ivan* and *Pax*. Includes black-and-white illustrations throughout, a map, and extensive backmatter about orcas and their habitats.

One medium-size whale carcass delivers as much food to the dark, cold ocean depths as 4,000 years of sinking food particles. When a dead whale arrives, the café opens for business, and who better than Dan Tavis to show us the bizarre deep-ocean diners who show up? Hagfish, zombie worms, sleeper sharks—this group of patrons is stranger than the denizens of the Mos Eisley Cantina in *Star Wars*. A fish in a lab coat, piloting a deep-sea submersible, is our guide to the weirdly fascinating goings-on miles beneath the ocean surface. The backmatter includes rare whale-fall photos from the Monterey Bay Aquarium Research Institute. Dr. Robert Vrijenhoek of MBARI and Dr. Craig Smith, a deep-ocean ecologist at the University of Hawaii, have helped Jacquie Sewell to ensure scientific accuracy.

An illustrated look at the weird and wonderful creatures that live in the very deepest parts of the sea. Humans have always wondered, with a mixture of fear and fascination, what lurks beneath the surface in the depths of the ocean. In this book, Erich Hoyt introduces 50 of the oddest creatures you will ever meet in the sea. From the carnivorous comb jelly to the lantern-carrying deep-sea dragonfish, from a vampire squid with giant eyes to dancing jellyfish, Hoyt explores these peculiar conditions and their equally peculiar environment. These creatures have adapted to lack of light and, using sound pulses (echolocation) or light-producing organs and pigment cells (emitting light via bioluminescence), they are able to communicate without giving their location away to predators. These stunning, captivating photographs weren't taken from the portholes of submarines. Photographers David Shale, Solvin Zanki and Jeff Rotman worked with oceanography institutes, museums and the BBC Natural History Unit, taking long cruises across the ocean to record and try to understand these little-studied residents of the deep sea. To capture the creatures for observation, a net was lowered far beneath the surface. As soon as the trawl was hauled aboard, the photographers would race to transfer the most unusual animals to fresh seawater aquariums in a

Online Library Wild Sea Creatures Sharks Whales And Dolphins Wild Kratts Step Into Reading

chilled laboratory on board. These pages let readers gaze into strange, wild eyes and study faces with toothless or crooked smiles that witness the fruits of deep-sea evolution. Informative captions explain what the patterns of lights on their bodies are "saying" to others in their absolutely dark world. The wonder and extraordinary weirdness of what lives in the deep seas, so far away from us and yet so close, will become more familiar with this book.

Wild Sea Creatures Sharks, Whales, and Dolphins! Random House Books for Young Readers

A collection of five previously released Wild Kratts animal adventures.

The Wild Kratts go in search of creatures that come out at night in this full-color storybook!
