Three years after the conclusion of his trilogy, *On This Earth, A Shadow Falls Across the Ravaged Land*, Nick Brandt returns to East Africa to photograph the escalating changes to the continent's natural world. In a series of epic panoramas, Brandt records the impact of man in places where animals used to roam, but no longer do. In each location, Brandt erects a life size panel of one of his animal portrait photographs, setting the panels within a world of explosive urban development, factories, wasteland and quarries. The people within the photographs are oblivious to the presence of the panels and the animals featured in them, who are now no more than ghosts in the landscape. Some of the animals in the panels appear to be looking out at these destroyed landscapes with sadness, as if lamenting the loss of the world they once inhabited. By the end, we see that it is not just the animals who are the victims in this out of control world, but also the humans. *Inherit the Dust* also includes plates of the original portraits of the animals that are featured in the life-size panels, the unique emotional animal portraiture for which Brandt is recognized. There are also two essays by the artist: a text about the crisis facing the conservation of the natural world in East Africa, and behind-the-scenes descriptions of Brandt's elaborate production process, with accompanying documentary photographs.

'It's not just the body that changes: Fashions and hairstyles evolve; pets come and go; typewriters, analog clocks, and telephones with cords disappear; and finally, film gives way to digital and the computer replaces the darkroom. While Weathering Time is a personal archive, and I am mining the archive to address issues of the female body, the family snapshot and loss, I am also interested in producing images that suggest some of the experiences of my generation. Indeed, the photographs underscore the cultural, technological, and physical changes that have occurred over the past thirty-five years--from my youth to the dawn of my old age.' Nancy Floyd

Experience the wildlife of Texas, up-close and personal, through the eyes of one of the country's most talented nature photographers. Where else can you look a coyote in the eye while it licks its chops? Spy the long tongue of a Nine-banded Armadillo as it drinks? Watch a rare Blue-faced Ringtail dragonfly eating its prey? Glimpse a Sanderling's feet spread midair as it scurries down the beach? See an American White Pelican's pouch turned inside-out as it yawns? Award-winning photographer Greg Lasley has been taking pictures of wildlife for thirty years, and although he has photographed some of the most exotic creatures and remote places on earth, in Greg Lasley's Texas Wildlife Portraits he gives homage to his favorite place for photography: his home state. With more than a hundred stunning color photographs, this book reflects Lasley's penchant for the state's insect life, especially dragonflies, as well as his long affection for Texas birds. In addition, many hours of patient waiting or the happenstance of a chance encounter have yielded fine images of Texas mammals and reptiles in their habitats. Veteran Texas naturalists John and Gloria Tveten open the text with an introduction to the man behind the camera. From there, photographer's comments and insightful photo captions help vividly re-create the moment each image was shot—what the animal was doing, what the photographer was thinking.
