The rise of authoritarian, nationalist forms of populism and the implications for rural actors and settings is one of the most crucial foci for critical agrarian studies today, with many consequences for political action. *Authoritarian Populism and the Rural World* reflects on the rural origins and consequences of the emergence of authoritarian and populist leaders across the world, as well as on the rise of multi-class mobilisation and resistance, alongside wider counter-movements and alternative practices, which together confront authoritarianism and nationalist populism. The book includes 20 chapters written by contributors to the Emancipatory Rural Politics Initiative (ERPI), a global network of academics and activists committed to both reflective analysis and political engagement. Debates about 'populism', 'nationalism', 'authoritarianism' and more have exploded recently, but relatively little of this has focused on the rural dimensions. Yet, wherever one looks, the rural aspects are key – not just in electoral calculus, but in understanding underlying drivers of authoritarianism and populism, and potential counter-movements to these. Whether because of land grabs, voracious extractivism, infrastructural neglect or lack of services, rural peoples' disillusionment with the status quo has had deeply troubling consequences and occasionally hopeful ones, as the chapters in this book show. The chapters in this book were originally published in *The Journal of Peasant Studies*.

With careful attention to detail, and evocative turns of phrase, Dave Margoshes introspectively looks back on youth. Intriguing metaphors, reminiscent of pastoral imagery, create a sharp contrast between the heavy subject matter of one's own mortality, and the beautiful, evocative comparisons between humanity and the rest of the animal kingdom, particularly birds and trees. Darwin's Theory of Evolution, is juxtaposed with the desire to give in to temptation, and become one with the world, as Margoshes makes most evident in his final poem, "Wisdom", a fitting end to a collection that would have the reader struggling between reconciling their past and present.

Peter M. F. Sichel, a fourth-generation wine merchant, found the path he was destined to walk interrupted by the Nazis while growing up as a Jew in Germany. He moved to France in 1939 but was imprisoned as an enemy alien at the outbreak of World War II. When he was released, he hid in the Pyrenees before reaching the United States in 1941. After joining the Army, he served with the U.S. Office of Strategic Services, sending spies into Germany, before becoming a senior official with the Central Intelligence Agency, where he served in key positions in Berlin, Hong Kong, and Washington. In this memoir--which needed to be cleared by the CIA--he describes how the Nazis took over Germany, the odd attitude of German Jews to being Jewish, the fault lines in U.S. intelligence during the Cold War, and the life lessons he learned in the wine business. "Peter Sichel was a true insider during the heyday of the CIA during the late 1940s and 1950s. From Berlin to Hong Kong, he served in a global secret war that was, by turns, gallant, necessary, dangerous, and wrongheaded. ... His memoir is clear-eyed, charming, and fascinating." --Evan Thomas, author of *The Very Best Men: The Daring Early Years of the CIA* "Peter Sichel is an iconic figure in the history of wine. With his European upbringing and early years in the CIA, his story is both fascinating and compelling. His success with Blue Nun is nothing short of classic marketing." --Marvin R. Shanken, Editor & Publisher, *Wine Spectator*

Tabernae were ubiquitous in all Roman cities, lining the busiest streets and dominating their most crowded intersections in numbers far exceeding those of any other form of building. That they played a vital role in the operation of the city, and indeed in the very definition of

urbanization in ancient Rome, is a point too often under-appreciated in Roman studies, and one which bears fruitful further exploration. The Roman Retail Revolution offers a thorough investigation into the social and economic worlds of the Roman shop, focusing on food and drink outlets in particular. Combining critical analysis of both archaeological material and textual sources, it challenges many of the conventional ideas about the place of retailing in the Roman city and unravels the historical development of tabernae to identify three major waves or revolutions in the shaping of retail landscapes. The volume is underpinned by two new and important bodies of evidence: the first generated from the University of Cincinnati's recent archaeological excavations into a Pompeian neighborhood of close to twenty shop-fronts, and the second resulting from a field-survey of the retail landscapes of more than a hundred cities from across the Roman world. The richness of this information, combined with the volume's interdisciplinary approach to the lives of the Roman sub-elite, results in a refreshingly original look at the history of retailing and urbanism in the Roman world.
