In this book we offer a collection of texts by various people, each attempting to describe their experiences of learning Kung Fu with their Sifu. We are happy to be able to offer reports from those learning within other branches of Kung Fu. The book is enriched by stories and anecdotes from former pupils of Yip Man, relating to the time they spent training in his school. Furthermore we discuss the various training methods, training equipment and techniques.

This particular anthology on wing chun features only two authors: Dr. Joyotpaul Chaudhuri and Master Jeff Webb. Their academic and practical experience bring a rich text for anyone interested in this unique art, famed for its specialized training methods, combative efficiency, and noted associations with Yip Man, Bruce Lee, and the kung fu film industry.

Wing chun is a southern Chinese system, so usually terms are written to reflect Cantonese, often using different romanization systems or mixtures of these systems. On top of this hodgepodge, politics among leading wing chun figures have brought preferences for specific spellings to reflect their unique branches in the wing chun evolutionary tree.

Because of this, I have not standardized the romanization in this anthology, as it does not greatly effect the reading. In chapter one, Dr. Chaudhuri analyzes the keys to motion in the second empty-hand form of wing chun: the bridge seeking routine. The focus is on the proper maintenance of the body's central axis and its motions, which helps with developing the foundations for delivering power. In the following chapter, Jeff Webb discusses the structure and body mechanics of punching techniques, plus various training methods employed for developing power. Also, punching strategy is shown as the greatest factor in differentiating these punches from those of other styles. Chaudhuri then analyzes the structure and function of the primary stance in wing chun's first form (sil lim tao), which instills the relational structure of bone, ligament, joint, tendon, muscle, line and angle, while also teaching the inner virtues of softness, stillness, sinking and emptiness. Two following chapters are by Jeff Webb. The ability to apply martial art techniques at a high rate of speed is essential to overall fighting effectiveness. By looking beyond the physical to the conceptual, he details wing chun's theories that reveal proper timing to be a significant multiplier. His final piece describes both the fundamental and complex methods of "sticking hands" training in detail. It also explains the rationale and theories behind this method as well as discusses a variety of factors that can either improve or retard the acquisition of tactile reflexes. The final two chapters by Chaudhuri and Webb presents some of their favorite techniques. The content of these chapters explain wing chun rationale and unique fighting methods, plus provides logic and advice to benefit the practitioner.

Wing Chun is the most popular form of Chinese Kung Fu in the world today, with over four million practitioners. The art as it is presently understood has been handed down from teacher to student for more than three hundred years. Until now, no one has ever stepped back and taken a critical look at why this art's techniques are presented and performed the way they are. This book, by Wing Chun master Danny Xuan and martial-arts authority John Little, is the first to decipher these techniques that until now have been encrypted within this art. Xuan and Little reveal how Wing Chun was designed holistically, based on the laws of physics, human nature, and biomechanics. It was also designed with economy, efficiency, and productivity in mind. Unlike other martial arts, Wing Chun doesn't focus on making a person larger, more rugged, acrobatic or animal-like; rather, it focuses on making optimal use of one's own bodily structure and power potential by applying the sciences of biomechanics and physics. Thus, it is possible for males and females of all ages and sizes to excel in this art. The Tao of Wing Chun provides a readable, authoritative means of cultivating personal protection skills, enhanced flexibility, improved coordination, greater stamina, and physical and mental fitness while simultaneously cultivating humility, focus, determination, self-confidence, character, camaraderie, and deep inner strength.
